Les concepts et méthodes sont décrits à la fin de la présente publication.

# Section III

## Adjustment Factors by Industry, Canada and Provinces

## Facteurs d'ajustement par activité économique, Canada et provinces

## Note on Adjustment Factors for Comparing 1987 Estimates to 1986 and Earlier Years

The data presented in Section II of this issue of Employment, Earnings and Hours have been revised to reflect the full impact of the survey sampling frame improvements phased-in over the January - April 1987 period and to provide these estimates on a consistent basis. It is necessary, however, to adjust for the frame changes when comparing 1987 data to 1986 and earlier years. Adjustment factors have been derived for this purpose and are presented in the tables following this note.

The first table provides the factors for estimates of employment, earnings and hours for all sizes of firm by industry and province. The second table presents the factors for the take-all firms.

(Note that factors for certain published variables are not shown but are available on request.)

### How to use the factors

Data for 1986 or earlier years must be multiplied by the factor shown in the accompanying tables when making comparisons to 1987 estimates.

To use the factors, follow these steps:

1. **Identify the industry code(s)** of the variable of interest from the usual data tables in the publication; this, combined with the name of the variable and the geographic area desired, will enable you to locate the adjustment factor in the accompanying tables.

2. **Select the appropriate adjustment factor table,** either for all sizes of firms or for take-all firms; the variable names are listed across the top of the table while the province name and industry codes are shown on the left-hand side of the page. Locate the province and industry code of interest; the adjustment factor to be used will be on that line in the column of the chosen variable.

3. **Calculate the adjusted estimate;** once the factor has been located, simply multiply the 1986 or earlier estimate by the factor; this effectively adjusts the data for the frame changes and allows direct comparison to the 1987 data.

The following example demonstrates the use of the factors:

What has been the change in employment in the industrial aggregate for all employees in all sizes of firms between April 1986 and April 1987?

## Note sur les facteurs d'ajustement pour la comparaison des estimations de 1987 à celles de 1986 et des années antérieures

Les données de la partie II de ce numéro de Emploi, gains et durée du travail ont été révisées afin de prendre en compte l'intégralité des améliorations incorporées entre janvier et avril 1987 à la base de sondage de l'enquête, et également, pour présenter ces estimations sur une base cohérente. Cependant, lorsque l'on compare les données de 1987 à celles de 1986 et des années antérieures, il faut corriger en fonction des modifications apportées à la base de sondage. Des facteurs d'ajustement ont été mis au point pour cela, et ils figurent aux tableaux qui suivent cette note technique.

Le premier tableau contient les facteurs des estimations de l'emploi, des gains et de la durée du travail pour toutes les tailles d'entreprises par activité économique et province. Le deuxième tableau présente les facteurs pour les entreprises à tirage complet.

(Il est à noter que les facteurs pour certaines variables publiées n'y sont pas indiqués mais peuvent être obtenus sur demande).

### Comment utiliser les facteurs

Les données pour 1986 ou les années antérieures doivent être multipliées par le facteur figurant dans les tableaux appropriés lorsque l'on fait des comparaisons avec les estimations de 1987.

Pour utiliser les facteurs, procéder comme suit:

1. **Relever le, ou les, codes** d'activités économiques de la variable en question dans les tableaux de données habituels de la publication; ces renseignements, avec le nom de la variable et la région visée, vous permettront de repérer le facteur d'ajustement dans les tableaux ci-après.

2. **Sélectionner le tableau des facteurs d'ajustement appropriés,** soit pour toutes les tailles d'entreprises ou pour les entreprises à tirage complet. Les noms des variables sont marqués en haut du tableau, tandis que le nom de la province et les codes des activités économiques se trouvent à gauche de la page. Trouver la province et le code d'activité économique visés. Le facteur d'ajustement à utiliser se trouvera sur cette ligne dans la colonne de la variable choisie.

3. **Calculer l'estimation corrigée:** une fois le facteur repéré, multiplier simplement l'estimation pour 1986 ou l'année antérieure par celui-ci, ce qui corrigera les données en fonction des modifications à la base de sondage et permettra de faire des comparaisons directes avec les données de 1987.

L'exemple ci-dessous illustre l'utilisation de ces facteurs.

Quelle a été la variation de l'emploi pour l'ensemble des activités pour tous les employés pour toutes les catégories de taille d'entreprises entre avril 1986 et avril 1987?

**Identification of industry code(s)**

- the industry codes for the industrial aggregate are 031-951;

**Selection of the appropriate adjustment factor table**

- looking in the all sizes of firms table, we find industry 031-951 for Canada;

**Calculate the adjusted estimate**

- the first entry on the line, under the heading "Total-employees" is 1.0575;

- multiplying the April 1986 estimate of employment by the factor we get:

  9,056.6 thousand x 1.0575 = 9,577.4

- this figure can now be compared to the April 1987 estimate of 9,796.2 thousand thus showing an increase in employment of 218.8 thousand or 2.3%.

If you experience any difficulty in using the factors or require more information on the technique used in deriving them, please contact the Labour Division for assistance.

**Identification du code de la branche d'activité**

- les codes pour l'ensemble des activités sont 031-951;

**Sélection du tableau des facteurs d'ajustement appropriés**

- en consultant le tableau de toutes les tailles d'entreprises, nous trouvons l'ensemble des activités 031-951 pour le Canada;

**Calcul de l'estimation corrigée**

- le premier chiffre sur la ligne sous la rubrique "total - salariés" est 1.0575;

- en multipliant l'estimation pour avril 1986 de l'emploi par le facteur, nous obtenons:

  9,056.6 milliers x 1.0575 = 9,577.4

- ce chiffre peut être comparé maintenant à l'estimation pour avril 1987 de 9,796.2 milliers, ce qui donne une augmentatiuon de l'emploi de 218.8 milliers, ou 2.3%.

Si vous avez des problèmes pour utiliser les facteurs, ou si vous avez besoin de plus de renseignements sur la technique qui a servi à les établir, veuillez vous adresser à la Division du travail.

**Adjustment Factors by Industry, Firms of All Sizes, Canada and Provinces**
**Facteurs d'ajustement par activité économique, entreprises de toutes les tailles, Canada et provinces.**

## NOTES TO USERS

### 1. SAMPLE SIZE INCREASE IN MANUFACTURING INDUSTRIES

The sample size of the Survey of Employment, Payrolls and Hours was increased by 2,000 establishments in the manufacturing industry in order to improve the quality of the estimates at the detailed industry level. Commencing with the data for January, 1986, all manufacturing firms with 50 to 199 employees were included in the sample with certainty. These firms had previously been surveyed on a sample basis. Estimates originally published for January and February, 1986, did not include these additional units so that the impact on the manufacturing data and the Industrial Aggregate could be assessed prior to publication. Data for January and February, revised to reflect this change, were first presented in the March 1986 issue of this publication.

### 2. INDUSTRIAL COMPOSITE

Note that the publication of the Estimates of Average Weekly Earnings for "Industrial Composite" was terminated with the December 1985 estimates.

### 3. URBAN AREAS

Effective with **June 1985,** data for urban areas have been removed from the publication and the remaining statistical tables have been re-numbered as a result of the changes. (See the June 1985 issue for the conversion from the old to the new table numbers).

Data for urban areas will continue to be made available to users on request.

### 4. REVISIONS TO HISTORICAL DATA

**1984**

There has been a revision to the data published monthly in the January to July 1984 issues of Catalogue 72-002 for the industries listed below. The revised series appear in the September 1984 issue. All data variables for the following series at the Canada, Provinces and Territories level may be affected:

1. Total Number of Employees - All Survey Units
2. Salaried Employees - All Survey Units
3. Total Number of Employees - Take-All Units
4. Salaried Employees - Take-All Units

## AVIS AUX UTILISATEURS

### 1. AUGMENTATION DE LA TAILLE DE L'ÉCHANTILLON DANS LES INDUSTRIES MANUFACTURIÈRES

Dans le but d'améliorer la qualité des séries publiées par l'enquête sur l'emploi, la rémunération et les heures de travail sur les industries manufacturières, 2,000 entreprises ont été ajoutées à l'échantillon de ce secteur. À partir du mois de référence de janvier 1986, toutes les entreprises manufacturières ayant 50 à 199 salariés sont incluses dans l'échantillon. Auparavant, seul un échantillon de ces entreprises était enquêté. Les chiffres originalement publiés pour les mois de janvier et de février 1986 n'incluaient pas ces unités additionnelles. Le but de ce délai était de déterminer l'impact sur les estimations des industries manufacturières et de l'ensemble des activités économiques. Il est important de noter que les chiffres de janvier et février, révisés pour refléter le changement, ont été publiés dans le numéro de mars 1986 de ce catalogue.

### 2. ENSEMBLE DES INDUSTRIES

Veuillez noter que les Estimations de la rémunération hebdomadaire moyenne pour l'"ensemble des industries" ont cessé d'être publiées avec les estimations révisées de décembre, 1985.

### 3. RÉGIONS URBAINES

À partir de **juin 1985,** les données pour les régions urbaines ont été supprimées et les tableaux qui font encore partie de cette publication ont été rénumérotés. (Voir la publication de juin 1985, pour la conversion des anciens aux nouveaux numéros de tableaux).

Les données pour les régions urbaines sont toujours disponibles sur demande.

### 4. RÉVISIONS AUX DONNÉES HISTORIQUES

**1984**

Des révisions ont été apportées aux chiffres publiés dans le catalogue mensuel numéro 72-002 pour les mois de janvier à juillet 1984, pour les industries mentionnées ci-dessous. Les séries révisées figurent dans le catalogue du mois de septembre 1984. Toutes les variables pour les séries qui suivent aux niveaux du Canada, provinces et territoires peuvent être affectées:

1. Nombre total de salariés - Ensemble des unités
2. Employés - Ensemble des unités
3. Nombre total de salariés - Unités à tirage complet
4. Employés - Unités à tirage complet

| Industry | SIC 1970 CAÉ | Industrie |
|---|---|---|
| Industrial aggregate | 031 - 951 | Ensemble des activités |
| Goods producing industries | 031 - 421 | Branches productrices de biens |
| Construction | 404 - 421 | Construction |
| Engineering | 406, 409 | Génie civil |
| Other engineering | 409 | Autre génie civil |
| Service producing industries | 501 - 951 | Branches productrices de services |
| Community, business and personal services | 801 - 899 | Services socio-culturels, comm. et pers. |
| Education and related services | 801 - 809 | Enseignement et services annexes |
| Education, excluding libraries and museums | 809T | Enseignement et services sauf bibliothèques, musées |
| Education, n.e.s. | 809 | Enseignement, n.c.a. |

| | | |
|---|---|---|
| Health and Welfare Services | 821 - 828 | Services médicaux et sociaux |
| Welfare organizations | 828 | Organismes de bien-être |
| Amusement and recreation | 841 - 849 | Divertissements et loisirs |
| Theatrical and other Staged Entertainment | 845 | Services de théâtre et autres spectacles |
| Misc. amusement and recreation | 849 | Services divers de divertissements et de loisirs |
| Services to business management | 851 - 869 | Services fournis aux entreprises |
| Engineering and scientific services | 864 | Bureaux d'études et services scientifiques |
| Misc. services | 891 - 899 | Services divers |
| Misc. services, n.e.s. | 899 | Services divers, n.c.a. |

For additional information on any of the above issues, or on the use or application of data series, please contact Renée Arsenault of the Labour Division at (613) 991-4090.

Pour de plus amples renseignements sur les sujets précités, ou sur l'utilisation et l'application de séries alternatives, communiquer avec Renée Arsenault de la Division du travail à (613) 991-4090.

## CONCEPTS AND METHODS

### Objectives

The Survey of Employment, Payrolls and Hours is designed to measure, on a monthly basis, the levels and month-to-month trends of employment, paid hours and earnings. These measures are compiled at detailed industrial and geographic levels.

All industries are covered by the survey with the exception of agriculture, fishing and trapping, private household services, religious organizations, and military services.

### Source of Data

The statistics contained in this report are based on information obtained through a mail survey of firms, institutions and organizations of all sizes.

The **firm** is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but, in some cases, the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

### Industrial Classification

All **firms** are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The **establishment** (typically a factory, mine, store or a similar unit) is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into **reporting units** which, although not capable of reporting all basic industrial statistics, can report employment, payrolls and hours data for particular locations.

The industrial classification of the statistics contained in this report is based on the 1970 version of the Standard Industrial Classification. A description of the various industries and groups of industries is contained

## CONCEPTS ET MÉTHODES

### Objectifs

L'enquête sur l'emploi, la rémunération et les heures de travail a pour objet de mesurer mensuellement les niveaux et les tendances de l'emploi, des heures rémunérées et des gains. Ces mesures sont rassemblées à des niveaux détaillés selon l'activité économique et le lieu géographique.

L'enquête vise tous les secteurs de l'activité économique sauf l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

### Source des données

Les statistiques présentées dans ce bulletin se fondent sur des renseignements recueillis au moyen d'une enquête postale menée auprès des entreprises et autres organismes ou établissements de toutes tailles.

Le terme **entreprise** désigne toute entité commerciale ou industrielle constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme quelconque d'organisation, telle une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité.

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu par la Division des profils et du registre des entreprises de Statistique Canada.

### Classement par activité économique

Toutes les **entreprises** appartiennent à une branche d'activité économique déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un **établissement.** À des fins statistiques, on définit l'établissement (en général une usine, une mine, un magasin ou une unité semblable) comme la plus petite unité constituant un ensemble fonctionnel distinct capable de déclarer, à l'égard de l'activité économique, tous les éléments statistiques de base qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour obtenir des statistiques géographiques détaillées, souvent on subdivise l'établissement en **unités déclarantes** qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi, la rémunération et les heures de travail relativement à certains endroits.

Le classement des statistiques que nous présentons dans ce volume s'inspire de la Classification des activités économiques, de 1970. Vous trouverez une description de ces diverses activités et de leurs groupements dans le bulletin de la Classification

in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. Code" columns on the tables correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual":

a) Industrial aggregate (031-951) represents the sum of all the industries included in the survey (see Objectives).

b) Goods-producing industries (031-421) comprise forestry, mining, manufacturing and construction.

c) Service-producing industries (501 to 951) consist of transportation, communication and other utilities, trade, finance, insurance and real estate, services (except for religious organizations and private households), and public administration (with the exception of military personnel, and other government services).

d) Durable goods manufacturing (durable) includes wood industries (251-259), furniture and fixture industries (261-268), primary metal industries (291-298), metal fabricating industries except machinery and transportation equipment (301-309), machinery industries except electrical machinery (311-318), transportation equipment industries (321-329), electrical products industries (331-339), and non-metallic mineral products industries (351-359).

e) Non-durable goods manufacturing (non-dur) is the sum of food and beverage industries (101-109), tobacco products industries (151-153), rubber and plastic products industries (162-165), leather industries (172-179), textile industries (181-189), knitting mills (231-239), clothing industries (243-249), paper and allied industries (271-274), printing, publishing and allied industries (286-289), petroleum and coal products industries (365-369), chemical and chemical products industries (372-379), and miscellaneous manufacturing industries (391-399).

f) Building construction (404, 421) comprises building construction (404) and special-trade contractors (421).

g) Industrial and Heavy (Engineering) construction (406, 409) includes highway, bridge and street construction (406) and other construction (409).

h) Education services (809T) consist of kindergartens and nursery schools (801), elementary and secondary schools (802), schools of arts and performing arts (803), vocational centers, trade schools and business colleges (804), post-secondary non-university educational institutions (805), universities and colleges (806), and education and related services (809).

i) Public administration (909-951) contains only the establishments engaged in activities that are gov-

des activités économiques, n$^{o}$ 12-501 au catalogue. Les codes C.A.É. qui apparaissent dans les colonnes de certains tableaux de notre publication correspondent au codes de ce bulletin. Les tableaux en question renferment aussi les groupes suivants, qui ne figurent pas dans la Classification des activités économiques:

a) Ensemble des activités économiques (031-951) — Il s'agit de la somme des diverses activités économiques visées par l'enquête (voir objectifs).

b) Branche productrice de biens (031-421) — Ce groupe englobe les forêts, les mines, les manufactures et la construction.

c) Branche des services (501-951) — Englobe les transports, les communications et autres services publics, le commerce, les finances, assurances et affaires immobilières, les services (sauf les organismes religieux et les ménages privés), et l'administration publique (à l'exception du personnel militaire et des autres services gouvernementaux).

d) Fabrication des biens durables (durables) — Englobe les industries du bois (251-259), l'industrie du meuble et des accessoires d'ameublement (261-268), l'industrie de première transformation des métaux (291-298), l'industrie des produits métalliques (sauf les machines et le matériel de transport) (301-309), la fabrication des machines (sauf le matériel électrique) (311-318), l'industrie du matériel de transport (321-329), l'industrie des appareils et du matériel électriques (331-339) et l'industrie des produits minéraux non métalliques (351-359).

e) Fabrication des biens non durables (non dur.) — Englobe l'industrie des aliments et boissons (101-109), l'industrie du tabac (151-153), l'industrie du caoutchouc et des produits en matière plastique (162-165), l'industrie du cuir (172-179), l'industrie textile (181-189), la bonneterie (231-239), l'industrie de l'habillement (243-249), l'industrie du papier et des produits connexes (271-274), l'imprimerie, l'édition et industries connexes (286-289), l'industrie du pétrole, du charbon et de leurs dérivés (360-369), l'industrie chimique et des produits connexes (372-379), et les industries manufacturières diverses (391-399).

f) Bâtiment (404, 421) — Englobe la construction de bâtiments (404) et l'activité des entrepreneurs spécialisés (421).

g) Construction industrielle et lourde (travaux de génie) (406, 409) — Englobe la construction de routes, ponts et rues (406) et autres constructions (409).

h) Enseignement et services connexes (809T) — Englobe les jardins d'enfants et écoles maternelles (801), les écoles primaires et secondaires (802), les écoles de beaux-arts (803), les centres de formation professionnelle, écoles de métiers et collèges commerciaux (804), les établissements d'enseignement postsecondaire non universitaire (805), les universités et collèges (806), et l'enseignement et services connexes (809).

i) Administration publique (909-951) — Comprend les établissements dont les activités ont un caractère essentiellement

ernmental in character and those serving as internal service agencies of the public service. Government owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level.

## Geographic Classification

Reporting units are assigned to a province, a census division, an economic region (for the province of Quebec and Ontario) and, where applicable, to a metropolitan or urban area. The survey selected metropolitan and urban areas as delineated for the 1981 Census of Population; these areas usually consist of the urban centre as well as the surrounding territory and had a population of 25,000 inhabitants or more. The reporting units not located in a tabulated urban area or not allocated to a compiled census division are included in the provincial and national totals.

A description of the various geographical areas is contained in the "Standard Geographical Classification Manual, 1981", Catalogue No. 12-567.

## Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are asked to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to **strikes,** unpaid holidays or other similar unpaid circumstances, the data reported are not representative of the last seven days of the month, adjustments are made to reflect the economic situation of the reference period (i.e. when a strike effects the last seven days of the survey month, the derived data will reflect the strike situation).

2. **Employee**

All persons drawing pay for services rendered or for paid absences and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form constitute employees.

gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics.

## Classement géographique

On attribue les unités déclarantes à une province, à une division de recensement, à une région économique (pour les provinces suivantes: Québec et Ontario) et, s'il y a lieu, à une région métropolitaine ou urbaine. Les régions métropolitaines et urbaines choisies pour l'enquête sont celles du recensement de la population de 1981; ces régions, qui se composent habituellement d'un centre urbain et du territoire environnant, comptaient lors du dernier recensement 25,000 habitants ou plus. Les unités déclarantes situées en dehors de toute région urbaine indiquée dans les tableaux, ou non attribuées à une division de recensement prise en compte, font partie des totaux provinciaux et nationaux.

La description des diverses régions géographiques se trouve dans la "Classification géographique type, 1981", numéro 12-567 au catalogue.

## Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. Dans la pratique, peu d'entreprises tiennent des registres de paye pour cette période précise; on demande donc aux répondants de faire porter leur déclaration sur la(les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une **grève,** d'un congé non payé ou d'autres circonstances semblables, les données déclarées ne sont pas représentatives des sept derniers jours du mois, on procède aux rajustements qui s'imposent afin de traduire la situation qui régnait pendant la période de référence (cela signifie que lorsqu'une grève touche les sept derniers jours du mois d'enquête, les données qui en découlent reflètent l'état de grève).

2. **Salarié**

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada, est un salarié.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment) and casual or temporary employees (those who are hired for discontinuous periods or on an irregular basis). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, persons working outside Canada, military personnel and persons providing services to an establishment on a contract basis. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmen's Compensation or other related fund, etc.); however, employees paid from the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

Le terme "salariés" désigne les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires (ceux qui sont embauchés de façon irrégulière ou temporaire). Il désigne aussi les propriétaires, les administrateurs, les associés et les autres dirigeants actifs des entreprises constituées en corporation.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporation et ceux des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres des corps élus ou nommés, les personnes travaillant à l'extérieur du Canada, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (i.e. les personnes en grève, en congé non payé, celles recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'une caisse analogue, etc.); cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie, sont quand même considérés comme salariés.

The employees are classified into the following categories:

a) **Employees paid by the hour**
Any employee whose basic wage is expressed as an hourly rate.

b) **Salaried Employees**
Any employee whose basic remuneration is a fixed amount for a period of at least one week.

c) **Other Employees**
Those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.

d) **Non-teaching Staff**
All employees other than teachers and academic staff, i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (e.g. janitor, caretaker, bus driver, etc.)

e) **Teaching Staff**
Those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.

f) **Supply or Substitute Teachers**
Teachers who are called in to teach whenever their services are needed either to augment

Les salariés sont classés dans les catégories suivantes:

a) **Salariés rémunérés à l'heure**
Tout salarié dont la rémunération de base est calculée selon un taux horaire.

b) **Employés**
Tout salarié dont la rémunération de base constitue une somme fixe versée pour une période d'au moins une semaine.

c) **Autres salariés**
Tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de trajet, etc.

d) **Personnel non enseignant**
Tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économe, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel, le concierge, les chauffeurs d'autobus, etc.

e) **Personnel enseignant**
Tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.

f) **Suppléants ou remplaçants**
Enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le

the existing staff or as a short-term replacement for a full-time or part-time teacher.

3. **Earnings**

Earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc.

The payroll concept does not include supplementary labour costs such as employer's contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or director's fees.

a) **Gross Pay**
Gross pay includes salaries, straight-time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings **and** payments to persons absent with pay in the survey reference week.

b) **Overtime Pay**
All pay received for the number of hours worked in excess of the standard workday or workweek.

4. **Hours**

a) **Total hours paid**
All hours worked, including overtime hours, **plus** hours of paid absence (e.g. holidays, vacation, sick leave, jury duty, etc.)

b) **Overtime Hours**
The total hours for which overtime was paid. These represent the hours worked.

5. **Paid Absence**

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

6. **Standard Workweek**

The hours in the standard workweek constitute the average number of hours of work normally scheduled in a workweek.

personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

3. **Gains**

Les gains représentent la rémunération brute avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc.

Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents, ni les jetons de présence des administrateurs.

a) **Rémunération brute**
Comprend les salaires, les traitements à taux ordinaires, la rémunération du travail à la pièce et les commissions régulières, ainsi que les primes, indemnités de vie chère et autres gratifications versées régulièrement, les payes de surtemps **et** la rémunération des absences payées dans la semaine de référence de l'enquête.

b) **Rémunération du temps supplémentaire**
Ensemble de la rémunération versée pour le nombre d'heures de travail effectuées en sus de la journée ou de la semaine normale de travail.

4. **Heures**

a) **Nombre total d'heures payées**
Ensemble des heures travaillées, y compris les heures supplémentaires, **plus** les heures de congé (par ex., les jours fériés, les vacances, les congés de maladie, les congés pour service judiciaire, etc.)

b) **Heures supplémentaires**
Total des heures payées à un taux majoré; il s'agit d'heures réellement travaillées.

5. **Absence payée**

Les absences payées comprennent toutes les heures rémunérées dans le cas des jours fériés payés, des vacances, des congés de maladie, ainsi que des congés d'accident du travail et des congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire.

6. **Semaine normale de travail**

Les heures d'une semaine normale de travail reflètent la moyenne des heures de travail normalement fixées pour une semaine.

7. **Take-all and Take-some Units**

Take-all units are reporting units of firms or organizations which are included in the survey sample with certainty every month. These include:

a) All firms or organizations with 200 or more employees;

b) All firms with more than one reporting unit;

c) Firms which report their survey data on computer listings rather than on the standard questionnaire;

d) Units of government departments and crown corporations;

e) Units belonging to elementary and secondary schools;

f) Certain other pre-specified units or firms.

Take-some units are all the other firms in the universe which have a known probability of selection.

## Methodology

The statistics contained in this publication are based on information obtained through a sample survey of reporting units. The data is collected by means of questionnaires mailed monthly to a sample of about 70,000 reporting units selected out of a universe of about 700,000. The sample covers all industries in scope for the survey, all provinces and territories and all sizes of units. Both the universe and the sample are updated monthly for births and deaths.

### Stratification

For the determination of the survey sample size and for the purpose of the sample selection, the universe of reporting units is stratified by 12 provinces and territories, 16 industry groups and 4 size groups. (An industry group is slightly more detailed than the 1-digit industry code). The size of a unit is defined to be the total number of paid employees in that unit. The four size groups are 0 to 19, 20 to 49, 50 to 199 and 200 or more employees.

The universe of reporting units is further stratified into **take-all** and **take-some** categories as defined earlier under Definitions.

7. **Unités à tirage complet et à tirage partiel**

Les unités à tirage complet sont les unités déclarantes d'entreprises ou d'organisations incluses en permanence dans l'échantillon de l'enquête. Elles comprennent:

a) toutes les entreprises de 200 salariés ou plus;

b) toutes les entreprises ayant plus d'une unité déclarante;

c) les entreprises qui déclarent leurs données au moyen d'un imprimé d'ordinateur plutôt qu'à l'aide du questionnaire;

d) unités des services gouvernementaux et des sociétés de la couronne;

e) unités propres aux écoles primaires et secondaires;

f) d'autres unités ou entreprises préalablement choisies.

Les unités à tirage partiel sont toutes les autres entreprises qui ont une probabilité connue d'être choisies dans l'échantillon de l'enquête.

## Méthodologie

Les statistiques présentées dans cette publication se fondent sur les résultats d'une enquête effectuée par sondage auprès d'unités déclarantes. Les données sont recueillies au moyen d'un questionnaire posté tous les mois à un échantillon de quelque 70,000 unités déclarantes provenant d'un univers d'environ 700,000 unités. L'échantillon couvre toutes les activités économiques que vise l'enquête, ainsi que les toutes les provinces et les territoires et toutes les tailles d'unité. Chaque mois, nous mettons à jour l'univers ainsi que l'échantillon, en tenant compte des créations et des disparitions d'unités ou d'entreprises.

### Stratification

Pour déterminer la taille et la composition de l'échantillon, nous répartissons l'univers des unités déclarantes en 12 provinces et territoires, 16 groupes industriels (activités économiques) et quatre groupes de taille. (Un groupe industriel est légèrement plus détaillé qu'une industrie dont le code n'a qu'un chiffre). La taille d'une unité se définit comme étant le nombre total de salariés rémunérés que compte cette unité. Les quatre groupes de taille sont 0 à 19, 20 à 49, 50 à 199 et 200 salariés et plus.

En outre, l'univers des unités déclarantes est stratifié en deux catégories: les unités à **tirage complet** et les unités à **tirage partiel,** au sens que nous avons précisé dans la section "Définitions".

**Sample allocation and selection**

The size of the take-some sample for the survey has been determined so as to provide estimates of total number of paid employees at the industry group and province level with a prespecified reliability. The determination has been done under the requirement that the sample at the industry group and province level is allocated to each size group in proportion to the total estimated take-some employment in that size group. If the sampling fraction resulting from this allocation is less than .01, then a minimum sampling fraction of .01 is adopted in order to avoid unusually large weights. The allocation makes the probability of inclusion of a unit in the sample in a size stratum approximately proportional to the average number of employees per unit in that size stratum. The sample design, therefore, provides for a small sample of small reporting units if the concentration of employment is mainly in the large reporting units. On the other hand, if the proportion of total employment from small reporting units is substantial, then the sample will include a large number of small reporting units.

The number of reporting units to be selected at the industry group, province and size levels is again allocated to each three-digit industry within that industry group, province and size in proportion to the total number of reporting units in that three-digit industry. In other words, the sampling fraction used at the three-digit industry level is the same as the one determined at the industry group, province and size. However, it should be noted that a minimum sample of three units is selected whenever the use of the sampling fraction results in less than 3 units. If the universe itself is less than three units, then all the units are taken into the sample. Note that beginning with the January 1986 reference month, the sampling fractions for size group three (50 to 199 employees) in all manufacturing industries were changed to one.

A systematic sample of the predetermined number of units is drawn from the take-some universe in every three-digit industry, province and size group. The total sample is the sum of the number of take-all and selected take-some units.

**Sample rotation**

The design provides for rotation of the take-some sample within a three-digit industry, province and size group. Each month, approximately one-twelfth of the take-some sample is replaced. This means that units generally remain in the sample for 12 months before rotating out. The units are not eligible for reselection for at least 12 months after they rotate out.

In some small three-digit industry, province and size group cells it may not be possible to rotate out units each month. Consequently, in some small cells, units may have to stay longer than 12 months. Note that beginning with the reference month of January 1986, there is no rotation of units with 50 to 199 employees in the manufacturing industries.

**Répartition et choix de l'échantillon**

La taille de la portion à tirage partiel de l'échantillon a été déterminée de façon à fournir, avec une fiabilité prédéterminée, des estimations du nombre total de salariés rémunérés, au niveau du groupe industriel et de la province. Ce calcul tient compte du fait que l'échantillon, au niveau du groupe industriel et de la province, doit être réparti dans chaque groupe de taille proportionellement à l'estimation de l'emploi total au sein de la portion à tirage partiel de chacun des groupes de taille. Si la fraction d'échantillon résultant de cette répartition est inférieure à 0.01, on la remplace alors par la fraction minimale 0.01 afin d'éviter toute pondération excessive. La répartition est telle que la probabilité qu'une unité entre dans une strate particulière de l'échantillon est à peu près proportionnelle au nombre moyen de salariés par unité comprise dans cette strate. Le plan d'échantillonnage prévoit donc un petit échantillon de petites unités déclarantes lorsque l'emploi se concentre principalement dans les grandes unités déclarantes. Par contre, si l'emploi total provenant des petites unités déclarantes est élevé, alors l'échantillon contiendra un grand nombre de petites unités déclarantes.

Le nombre d'unités qu'il faut choisir au niveau du groupe industriel, de la province et de la taille est, en outre, réparti entre chacune des industries ayant un code à trois chiffres, lesquelles font partie du groupe industriel, de la province et de la taille considérés; cette répartition se fait proportionnellement au nombre total d'unités déclarantes comprises dans l'industrie dont le code comporte trois chiffres. En d'autres termes, la fraction d'échantillon utilisée au niveau industriel à trois chiffres est la même que celle déterminée pour le groupe industriel, la province et la taille. Il faut cependant noter que l'échantillon minimal est de trois unités, peu importe le résultat obtenu en utilisant la fraction d'échantillon. S'il y a moins de trois unités dans l'univers, toutes les unités disponibles sont incluses dans l'échantillon. Notons qu'à partir du mois de référence de janvier 1986, la fraction d'échantillon associée aux unités du groupe de la taille trois (de 50 à 199 salariés) des industries manufacturières est un.

Au sein de la portion à tirage partiel, on choisit un échantillon systématique d'un nombre prédéterminé d'unités dans chaque industrie ayant un code à trois chiffres, et ce dans chaque province et chaque groupe de taille. L'échantillon total résulte de la somme du nombre d'unités à tirage complet et du nombre d'unités à tirage partiel sélectionnées.

**Rotation de l'échantillon**

Pour chaque industrie (code à trois chiffres), province et groupe de taille, le plan prévoit une rotation de la portion à tirage partiel de l'échantillon. Chaque mois, le douzième environ de la portion à tirage partiel de l'échantillon est remplacé. Cela signifie qu'en général les unités demeurent 12 mois dans l'échantillon avant d'en sortir par voie de rotation. Les unités ne peuvent pas être choisies de nouveau avant au moins 12 mois suivant leur mois de sortie.

Dans le cas de certaines petites cellules (une cellule regroupe les unités de même industrie au niveau du code à trois chiffres, même province et même groupe de taille), il est parfois impossible d'assurer la rotation des unités chaque mois. Ainsi, il peut arriver que des unités demeurent plus de douze mois dans certaines petites cellules. Notez qu'à partir du mois de référence de janvier 1986, dans les industries manufacturières il n'y a aucune rotation des unités ayant de 50 à 199 salariés.

**Data edit and correction**

All the questionnaires are initially screened for completeness by the interviewers of the Statistics Canada regional offices. Thereafter, extensive computer edit procedures for accuracy and consistency are performed at the Ottawa head office. As a result of any of the above-mentioned editing techniques, the respondent may be contacted to confirm or explain the data.

The edit procedures include the comparison of the values of key characteristics (e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit in order to detect large changes or errors in reporting. Whenever there is a large change or the data appears inconsistent, the record is signaled by the computer edit for review and is subject to correction or acceptance as appropriate.

**Follow-up**

Reporting units which are non-respondents to the initial mailing are followed up by telephone by the staff of the regional offices of Statistics Canada. Priority for this follow-up is given to (i) units which are in the sample for the first time and which have not responded, (ii) units which have not responded for two consecutive months, (iii) large nonrespondent units. Follow-up also takes into account response rates and employment in the various industry groups in determining priority.

If units continue to be non-respondents even after follow-up, then data will be imputed for these units. All the records with imputed values are subject to the edits mentioned above.

**Imputation**

Imputation for nonrespondent units which have been in the survey for more than one month is based on the ratio of the monthly changes. The ratio of the monthly change for each characteristic is calculated from units that responded both in the current and the previous month and is applied to the previous month's data of each nonrespondent.

For the nonresponding units that are new to the survey, imputation is based on other sources of information such as the employment intention of the unit, the characteristics of the responding units in the same industry group, province and size.

**Estimates**

The basic "building block" for producing the monthly estimates is the three-digit industry, province and size group. Estimates at higher levels are obtained by the aggregation of the above estimates. Estimates of averages are obtained by first estimating the totals for the numerator and the denominator at the desired level and then calculating the ratio. Estimates for certain sub-

**Vérification des données et correction**

Au départ, les interviewers des bureaux régionaux de Statistique Canada s'assurent que tous les questionnaires sont complets. Ultérieurement, le personnel du bureau d'Ottawa vérifie par ordinateur l'exactitude et la cohérence des chiffres déclarés. À chacune de ces deux étapes de vérification, un répondant peut donc être prié de confirmer ou d'expliquer ses chiffres.

Nos procédés de vérification nous permettent de comparer les valeurs de certaines caractéristiques (nombre de salariés, heures de travail, gains par salarié, etc.) déclarées par la même unité plusieurs mois de suite. Ainsi, il est possible de déceler les grandes variations ou les erreurs, s'il en est. Chaque fois qu'une forte variation apparaît ou que les données semblent incohérentes, l'ordinateur signale le cas, et l'enregistrement est aussitôt corrigé s'il comporte effectivement une erreur.

**Méthode de suivi**

Le personnel des bureaux régionaux de Statistique Canada relance par téléphone les unités déclarantes qui tardent à répondre au questionnaire. Cette méthode de suivi s'adresse en priorité (i) aux unités qui font partie de l'échantillon pour la première fois et qui n'ont pas encore répondu; (ii) aux unités qui accusent un retard de deux mois consécutifs; (iii) aux grandes unités non répondantes. Pour déterminer l'ordre de priorité des suivis, on tient compte des taux de réponse et du volume de l'emploi dans les différents groupes industriels.

Lorsque des unités persistent à ne pas répondre même après le suivi, des données leurs sont imputées. Tous les enregistrements dont les données découlent d'une imputation sont soumis aux vérifications mentionnées ci-dessus.

**Imputation**

L'imputation de données aux unités non répondantes comprises dans le champ de l'enquête depuis plus d'un mois est basée sur le ratio des variations mensuelles de ces unités. Le ratio de la variation mensuelle d'une caractéristique se calcule à partir des unités qui ont répondu pour le mois courant et le mois précédent, et s'applique aux données du mois précédent de chaque unité non répondante.

Dans le cas des unités non répondantes qui figurent dans l'enquête pour la première fois, l'imputation se fonde sur d'autres sources d'information telles que les prévisions d'emploi de l'unité et les caractéristiques des unités déclarantes du même groupe industriel, de la même province et de la même taille.

**Estimations**

L'élément de base qui sert à établir les estimations est l'industrie (code à trois chiffres), la province et la taille. Les estimations plus agrégatives sont obtenues par la sommation des estimations susdites. Pour calculer les moyennes, on estime d'abord les totaux du numérateur et ceux du dénominateur, au niveau désiré, puis on en fixe le ratio. Nous produisons aussi des estimations concernant certaines régions infraprovinciales, con-

provincial areas are also produced, treating the sub-province as a domain. Coefficients of variation for estimates of some key characteristics at all levels are also produced.

Provision has also been made in the estimation procedure to change the weights of "unusually large" observations occurring in size groups 1, 2 and 3. These observations are termed "outliers" and are judged not to be representative of other units in that size group. The weights of the remaining units are adjusted accordingly.

**Reliability of the estimates**

There are two types of errors possible in estimates based on a sample survey: sampling and non-sampling.

**Sampling errors** occur because observations are made only on a sample rather than on the entire universe. Estimates based on a sample differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. This difference with respect to a particular estimate is called the sampling error of the estimate.

**Non-sampling errors** are errors which are not related to sampling and may occur in a survey operation for many reasons. Non-response, coverage and classification errors, differences in the interpretation of the questions, incorrect information from respondents, mistakes in recording, coding and processing of data are examples of non-sampling errors. It should be noted that non-sampling errors also occur in complete censuses. In the Survey of Employment, Payrolls and Hours, efforts to reduce non-sampling errors include careful design of questionnaires, editing of data, follow-up of and imputation for non-respondents and thorough control of processing operations.

**Indicators of sampling error**

The sampling error, as described above, is not known. However, it can be estimated from the sample itself by using a statistical measure called the **standard error** of a survey estimate. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation.

Alphabetic symbols of the coefficient of variation are used in this publication (see Tables A to F at the end of this explanatory note) to give an indication of the reliability of the estimates and are based on a 12-month average of the coefficients of variation. The ranges of the coefficients of variation and their corresponding alphabetic indicator are given in the following table.

sidérant chacune de ces régions comme un domaine. Enfin, nous calculons des coefficients de variation pour les estimations de certaines caractéristiques clés, à tous les niveaux.

Le procédé d'estimation comporte en outre des mécanismes qui permettent de changer les poids lorsque des observations "exceptionnellement grandes" apparaissent chez les unités des groupes de taille 1, 2 ou 3. Ces observations, dites "aberrantes", ne sont pas représentatives des autres unités du même groupe de taille, de sorte que l'on rajuste les poids des autres unités en conséquence.

**Fiabilité des estimations**

En ce qui concerne les estimations basées sur un sondage, il existe deux types d'erreurs possibles, soit les erreurs d'échantillonnage et les erreurs non liées à l'échantillonnage.

Les **erreurs d'échantillonnage** proviennent de ce que les observations se font à partir d'un échantillon au lieu de l'univers complet. Les estimations basées sur un échantillon diffèrent des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes interviewers et des mêmes techniques de traitement. Cette différence, lorsqu'il s'agit d'une estimation particulière, s'appelle erreur d'échantillonnage de l'estimation.

Les **erreurs non dues à l'échantillonnage** ne se rattachent pas à l'échantillon et peuvent se produire tout au long d'une enquête pour plusieurs raisons. Les cas de non-réponse, les anomalies de couverture et de classification, les différences d'interprétation des questions, la communication de renseignements inexacts par les répondants et les fautes d'entrée, de codage et de traitement des données sont autant d'erreurs non attribuables à l'échantillonnage. Il faut noter que des erreurs de ce genre peuvent aussi se produire dans les recensements. Pour l'enquête sur l'emploi, la rémunération et les heures de travail, nous avons tenté d'en réduire le risque par une formulation soignée des questionnaires, par une vérification rigoureuse des chiffres déclarés, par le travail de suivi, par l'imputation de données aux unités non répondantes et par un contrôle attentif des techniques de traitement.

**Indicateurs des erreurs d'échantillonnage**

L'erreur d'échantillonnage que nous venons de décrire reste inconnue. On peut cependant l'estimer à partir de l'échantillon, en utilisant une mesure appelée **écart-type** d'une estimation de sondage. Lorsque l'écart-type est exprimé en pourcentage de l'estimation, on l'appelle écart-type relatif ou coefficient de variation.

Dans la présente publication, nous utilisons des symboles littéraux de coefficient de variation (voir tableaux A à F à la fin de cette note explicative), pour indiquer le degré de fiabilité des estimations; cette symbolisation repose sur la moyenne des coefficients de variation de 12 mois. Les intervalles de confiance des coefficients de variation et les symboles correspondants sont précisés dans le tableau suivant.

**ALPHABETIC INDICATORS OF COEFFICIENT OF VARIATION**

| Alphabetic Indicator | Range of Coefficient of Variation Percent |
|---|---|
| A | 0 - 1.0 |
| B | 1.1 - 2.5 |
| C | 2.6 - 5.0 |
| D | 5.1 - 10.0 |
| E | 10.1 - 15.0 |
| F | 15.1 - 25.0 |
| G | > 25.0 |

**INDICATEURS LITTÉRAUX DU COEFFICIENT DE VARIATION**

| Indicateur littéral | Intervalle de confiance du coefficient de variation en pourcentage |
|---|---|
| A | 0 - 1.0 |
| B | 1.1 - 2.5 |
| C | 2.6 - 5.0 |
| D | 5.1 - 10.0 |
| E | 10.1 - 15.0 |
| F | 15.1 - 25.0 |
| G | > 25.0 |

The sample estimate and its standard error (derived from the coefficient of variation) may be used to construct an interval within which the unknown census value is expected to be contained with a prescribed confidence. The particular sample used in this survey is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. If intervals from two standard errors below the estimate to two standard errors above the estimate are constructed using each of the above estimates, then approximately 19 out of 20 of the intervals would include the census value. Such an interval is called a 95 percent confidence interval. For example, let the estimate under consideration be the total number of paid employees at Canada level in Construction and say it is 450,000 employees. If the estimate has a reliability indicator A, then assuming that the coefficient of variation of the estimate is 1%, the standard error of the estimate would be 4,500 employees. Therefore, in this case, one can say with 95% confidence that the census value of total paid employees in Construction is included in the interval 441,000 to 459,000 employees.

In general, the estimates of monthly changes are expected to be more reliable than the estimates of levels due to the large overlap of reporting units in the monthly samples and the high correlation between the reported values for two consecutive months.

L'estimation de l'échantillon et son écart-type (établi d'après le coefficient de variation) peuvent servir à construire un intervalle à l'intérieur duquel s'inscrira, sous réserve d'une limite de confiance prédéterminée, la valeur inconnue que l'on obtiendrait par recensement. L'échantillon sur lequel s'appuie notre enquête n'est qu'un des multiples fragments de même taille que nous aurions pu choisir en utilisant le même plan. Les estimations tirées d'autres échantillons du même univers différeraient les unes des autres. Si l'on construisait des intervalles allant de deux écarts-types sous l'estimation à deux écarts-types au-dessus de l'estimation, en utilisant chacune des estimations possibles (selon l'échantillon choisi), environ 19 intervalles sur 20 contiendraient alors la valeur que donnerait un recensement. Ce genre d'intervalle se nomme intervalle de confiance à 95%. Prenons par exemple comme estimation le nombre total de salariés de la construction pour l'ensemble du Canada, et supposons que ce nombre soit 450,000. Si l'indicateur de fiabilité de cette estimation est A, et si son coefficient de variation s'établit à 1%, alors l'écart-type de l'estimation sera de 4,500 salariés. Dans ce cas, on peut donc dire avec 95% de confiance que le nombre total de salariés de la construction, obtenu par recensement, se situe dans l'intervalle 441,000 à 459,000 salariés.

En général, on s'attend à ce que les estimations des variations mensuelles soient plus fiables que les estimations de niveaux, par suite de l'ample chevauchement des unités déclarantes au sein des échantillons mensuels, et de la forte corrélation qui existe entre les valeurs déclarées pour deux mois consécutifs.

## Statistical Presentation

### 1. Data Revision

Each month, statistics for the two latest months are prepared from the survey of Employment, Payrolls and Hours. Data for the most current month are titled **preliminary** estimates and are based on a response rate of around 80%. Estimates are also prepared for the month immediately preceding the

## Présentation statistique

### 1. Révision des données

Chaque mois, nous préparons, à l'égard des deux derniers mois, des statistiques tirées de l'enquête sur l'emploi, la rémunération et les heures de travail. Les données du mois le plus récent sont appelées estimations **préliminaires** et se fondent sur un taux de réponse d'environ 80%. Nous établissons également des estimations pour le mois qui

most current month; these are known as **revised** estimates and are based on a higher rate of response (approximately 90%).

2. **Data Release**

As soon as the estimates become available, selected highly aggregated statistics are released in the Statistics Canada Daily, while detailed data are entered in the Canadian Socio-Economic Information Management System (i.e. CANSIM).

Detailed estimates appear in this report at a later date.

3. **Rounding**

Totals and averages for any level of geographical or industrial aggregation are calculated using unrounded figures and then rounded using the usual procedure adopted by Statistics Canada. Published employment figures are rounded to hundreds. The sum of individually rounded items may not always equal the total.

4. **Averages**

The average weekly earnings (including overtime) is obtained by dividing the total weekly payrolls by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the salaried employees, and for the other types of employees.

The average weekly overtime earnings is derived by dividing the overtime weekly payrolls by the number of employees. It is calculated for the total number of employees, the hourly-rated employees and the salaried employees.

The average hourly earnings (including overtime) is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours is reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). It is calculated for the hourly-rated employees and for the salaried employees.

The average hourly overtime earnings is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

The average weekly hours (including overtime) is obtained by dividing the total weekly number of hours by the number of employees. This statistic is calculated for the hourly-rated employees and the salaried employees.

précède le mois le plus récent; il s'agit d'estimations **révisées** qui prennent appui sur un taux de réponse plus élevé (environ 90%).

2. **Diffusion des données**

Dès que les estimations requises sont disponibles, des statistiques choisies à un niveau d'aggrégation élevé paraissent dans le Quotidien de Statistique Canada, tandis que les chiffres détaillés sont introduits dans le Système canadien d'information socio-économique (CANSIM).

Les estimations détaillées apparaissent dans ce bulletin plus tard.

3. **Arrondissement**

Les totaux et les moyennes des divers niveaux d'agrégation géographique ou industrielle sont calculés au moyen des chiffres bruts, ensuite arrondis conformément à la méthode d'arrondissement habituelle de Statistique Canada. Les nombres publiés concernant l'emploi sont arrondis à la centaine. Par conséquent, il peut arriver que la somme des chiffres arrondis individuellement ne corresponde pas au total.

4. **Moyennes**

On obtient les rémunérations hebdomadaires moyennes (y compris celles du temps supplémentaire) en divisant les rémunérations hebdomadaires totales par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure, d'employés et des autres catégories de salariés.

Pour obtenir les rémunérations hebdomadaires moyennes du temps supplémentaire, on divise les rémunérations hebdomadaires pour le temps supplémentaire par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure et d'employés.

On obtient les gains horaires moyens (y compris la rémunération pour le temps supplémentaire) en divisant les rémunérations hebdomadaires totales par le nombre total hebdomadaire d'heures travaillées (le nombre total d'heures hebdomadaires est celui déclaré pour les salariés rémunérés à l'heure, tandis que dans le cas des employés on l'établit en multipliant la moyenne des heures fournies pendant la semaine normale de travail par le nombre d'employés). Nous calculons cette statistique à l'égard des salariés rémunérés à l'heure et des employés.

Quant au temps supplémentaire, on calcule les gains horaires moyens des salariés rémunérés à l'heure en divisant les rémunérations hebdomadaires pour le temps supplémentaire par le nombre d'heures supplémentaires hebdomadaires déclarées pour ce groupe de salariés.

Pour déterminer les heures hebdomadaires moyennes (y compris les heures supplémentaires) on divise le total des heures hebdomadaires par le nombre de salariés. Cette statistique est établie à l'égard des salariés rémunérés à l'heure ainsi qu'à l'égard des employés.

The average weekly overtime hours is derived by dividing the weekly number of overtime hours by the number of employees. This average is calculated for the hourly-rated employees.

The average weekly earnings (excluding overtime) is obtained by dividing the weekly payrolls, which exclude the overtime weekly payrolls, by the number of employees. This estimate is calculated for hourly-rated employees and salaried employees.

5. **Unpublished Data**

A large number of non-confidential detailed industrial and geographic estimates are compiled but not included in this report. Although the reliability of these estimates is lower than the reliability of the published estimates, these data will be available on request on a cost recovery basis.

In addition to the total number of employees for the education industry, data are also available for the teaching and non-teaching staff separately.

6. **CANSIM**

Some of the data published in this report are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System).

Tables giving the CANSIM matrix numbers, the CANSIM series numbers and the types of survey estimates are presented at the end of this explanatory text (see Tables I to V) to provide the user with an easy and quick link to the CANSIM system.

Generally speaking, the CANSIM matrix number identifies a type of survey estimates for a particular geographic area, while the CANSIM series number represents an industrial level. Owing to the different types of data aggregations (all units, take-all units, take-some units) and to the large number of survey estimate types (number of employees, average hourly earnings of hourly-rated employees, etc.), the user will have to follow the steps given hereafter to select the proper CANSIM matrix and series numbers.

a) Determine the type of tabulated information needed (this will define the value of "x" for the CANSIM series number of Table II):

   i) Aggregation of all survey units has the value 1,

   ii) Aggregation of take-all units has the value 2 and

   iii) Aggregation of take-some units has the value 3.

Pour calculer les heures supplémentaires moyennes hebdomadaires on divise le nombre d'heures supplémentaires hebdomadaires par le nombre de salariés.

La moyenne des rémunérations hebdomadaires (temps supplémentaire exclu) s'obtient en divisant les rémunérations hebdomadaires, qui excluent les rémunérations hebdomadaires pour le temps supplémentaire, par le nombre de salariés. Cette estimation est calculée à l'égard des salariés rémunérés à l'heure, de même qu'à l'égard des employés.

5. **Données non publiées**

Nous établissons, aux niveaux industriel et géographique, un grand nombre d'estimations non confidentielles détaillées qui, toutefois, ne figurent pas dans le présent ouvrage. Bien que leur fiabilité soit plus faible que celle des estimations publiées, ces données peuvent être obtenues sur demande sur une base de recouvrement des coûts.

Outre le chiffre total des salariés du domaine de l'éducation, nous pouvons aussi fournir des données distinctes concernant le personnel enseignant et le personnel non enseignant.

6. **CANSIM**

Certaines données qui apparaissent dans la présente publication sont également disponibles sous une forme ordinolingue dans CANSIM (Système canadien d'information socio-économique).

Les intéressés trouveront à la fin de ces notes explicatives des tableaux indiquant les numéros des matrices CANSIM, les numéros des séries CANSIM et les types d'estimations de l'enquête (voir tableaux I à V). Ces tableaux fournissent à l'utilisateur un moyen d'accès facile et rapide au système CANSIM.

De façon générale, le numéro de matrice CANSIM désigne un type d'estimation de l'enquête pour une région géographique particulière, tandis qu'un numéro de série CANSIM désigne un niveau industriel. En raison de la multiplicité des types d'agrégation (ensemble des unités, unités à tirage complet, unités à tirage partiel) et des nombreux types d'estimations de l'enquête (nombre de salariés, salaires horaires moyens des salariés rémunérés à l'heure, etc.), l'utilisateur devra franchir les étapes suivantes pour choisir les bons numéros de matrice et de série CANSIM.

a) Déterminer le type désiré de totalisation parmi les cas suivants (cette opération définira la valeur de "x" pour le numéro de série CANSIM au tableau II):

   i) ensemble des unités de l'enquête: vaut 1,

   ii) unités à tirage complet: vaut 2 et

   iii) unités à tirage partiel: vaut 3.

b) Determine the type of survey estimates required; this will provide the value of "y" for the CANSIM series number. This value is obtained by consulting Table I which lists the 19 types of survey estimates; the number of salaried employees, for example, constitutes type 2.

c) Determine the industrial level needed and refer to the Industry Code column of the CANSIM series number Table II to find the rest of the series number (e.g. Industry Code 031 has series number **x.y.1.1.1.1).**

d) Determine the geographical level required and refer to the CANSIM matrix number tables (Tables III to V) to select the appropriate matrix number.

A specific example would be as follows. The "average weekly earnings (including overtime) of all employees" for "all survey units" is needed for the Ontario total manufacturing. The CANSIM series number will be 1.5.1.1.3 according to:

i) The "x" value of 1 for the "All survey units" aggregation,

ii) The "y" value of 5 for the type of survey estimates and

iii) The tail-end of the series number 1.1.3 for the manufacturing Industry Code 101-399.

The CANSIM matrix number will be 8367 because the type of estimates 5 is required for Ontario.

It should be noted that only two types of survey estimates are available for the Census Agglomerations and Census Metropolitan Areas (i.e. estimates 01: total number of employees, and 05: average weekly earnings (including overtime) of all employees), while nineteen types of estimates are available for Canada and the provinces.

For further information on CANSIM call (613) 991-1150 or write CANSIM Division, Statistics Canada, R.H. Coats BLDG., Ottawa, Ontario, K1A 0T6.

## 7. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

b) Déterminer le type requis d'estimations de l'enquête; cette opération fixera la valeur de "y" pour le numéro de série CANSIM. On obtient cette valeur en consultant le tableau I, qui contient la liste des 19 types d'estimations de l'enquête; le type "employés", par exemple, a la valeur 2.

c) Déterminer le niveau industriel désiré et utiliser la colonne "code des industries" du tableau II des numéros de série CANSIM pour trouver les autres chiffres du numéro de série (par ex. le code d'industrie 031 possède le numéro de série **x.y.1.1.1.1).**

d) Déterminer le niveau géographique requis et utiliser les tableaux de numéros de matrice CANSIM (Tableaux III à V) pour choisir le numéro de matrice approprié.

Voici un exemple. Supposons que l'on veuille connaître la "rémunération hebdomadaire moyenne (incluant le temps supplémentaire) de l'ensemble des salariés" de "l'ensemble des unités de l'enquête" pour les manufactures de l'Ontario. Le numéro de série CANSIM sera 1.5.1.1.3, puisque:

i) la valeur de "x" pour le groupe "ensemble des unités de l'enquête" est 1,

ii) la valeur de "y" pour le type d'estimation est 5, et

iii) la fin du numéro de série pour le "code d'industrie" des manufactures 101-399 est 1.1.3.

Le numéro de matrice CANSIM sera 8367, car le type d'estimation 5 s'applique à l'Ontario.

Notons qu'il n'existe que deux types d'estimations au niveau des agglomérations de recensement et des régions métropolitaines (i.e.) les estimations 01: nombre total des salariés, et 05: salaires hebdomadaires moyens (y compris le surtemps) pour l'ensemble des salariés), alors qu'il y a dix-neuf types d'estimations disponibles aux niveaux du Canada et des provinces.

Pour de plus amples informations concernant CANSIM, téléphoner à (613) 991-1150 ou écrire à Division CANSIM, Statistique Canada, immeuble R.H. Coats, Ottawa, Ontario, K1A 0T6.

## 7. Confidentialité

Les données du présent bulletin sont vérifiées afin de s'assurer qu'elles respectent le caractère confidentiel des réponses fournies par les entreprises.

# CANSIM Matrix and Series Reference Numbers

# Numéros de référence des matrices et séries CANSIM

**TABLE I. Type of Estimates**

**TABLEAU I. Type d'estimations**

| Estimates<br>Estimations | Description |
|---|---|
| 1 | All employees - Ensemble des salariés |
| 2 | Salaried employees - Employés |
| 3 | Employees paid by the hour - Salariés rémunérés à l'heure |
| 4 | Other employees - Autres salariés |
| 5 | Average weekly earnings (including overtime) of all employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) de l'ensemble des salariés |
| 6 | Average weekly earnings (including overtime) of salaried employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des employés |
| 7 | Average weekly earnings (including overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des salariés rémunérés à l'heure |
| 8 | Average weekly earnings (including overtime) of other employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des autres salariés |
| 9 | Average weekly earnings (excluding overtime) of all employees - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) de l'ensemble des salariés |
| 10 | Average weekly earnings (excluding overtime) of salaried employees - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) des employés |
| 11 | Average weekly earnings (excluding overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) des salariés rémunérés à l'heure |
| 12 | Average weekly overtime earnings of all employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, ensemble des salariés |
| 13 | Average weekly overtime earnings of salaried employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, des employés |
| 14 | Average weekly overtime earnings of employees paid by the hour - Rémunération hebdomadaire moyenne pour travail supplémentaire des salariés rémunérés à l'heure |
| 15 | Average weekly hours of salaried employees - Heures hebdomadaires moyennes des employés |
| 16 | Average weekly hours of employees paid by the hour - Heures hebdomadaires moyennes des salariés rémunérés à l'heure |
| 17 | Average weekly overtime hours of employees paid by the hour - Heures supplémentaires hebdomadaires moyennes des salariés rémunérés à l'heure |
| 19 | Average hourly earnings (including overtime) of employees paid by the hour - Rémunération horaire moyenne (incluant le temps supplémentaire) des salariés rémunérés à l'heure |
| 20 | Average hourly overtime earnings of employees paid by the hour - Rémunération horaire moyenne du travail supplémentaire, des salariés rémunérés à l'heure |

# Small Business in Canada

## Make it Your Business to Know the Facts!

If you own or manage a small business or provide services to such entreprises, this new report offers important statistical insights into the role small business plays in the Canadian economy.

**Small Business in Canada: A Statistical Profile 1981-1983** delivers financial and operating information for small business by major industry division. Included are:

- total assets, liabilities and equity,
- total revenues, profits and expenses, and
- total income generated (i.e., wages, salaries, pre-tax profits and depreciation).

Data on the number of small businesses and their revenues are broken down by company size (with annual revenues from $10,000 to $2 million dollars), by province and by industry.

Learn which industry is most affected by small business and find out how that impact affects Canadian industrial output.

**Small Business in Canada: A Statistical Profile 1981-1983**
Catalogue #61-521 Bilingual
$30.00 in Canada, $31.00 other countries

**Order From:**

Make cheque payable to the Receiver General for Canada/Publications and refer to catalogue #61-521.

Publications and additional information are also available from your nearest Statistics Canada Reference Centre.

# La petite entreprise au Canada

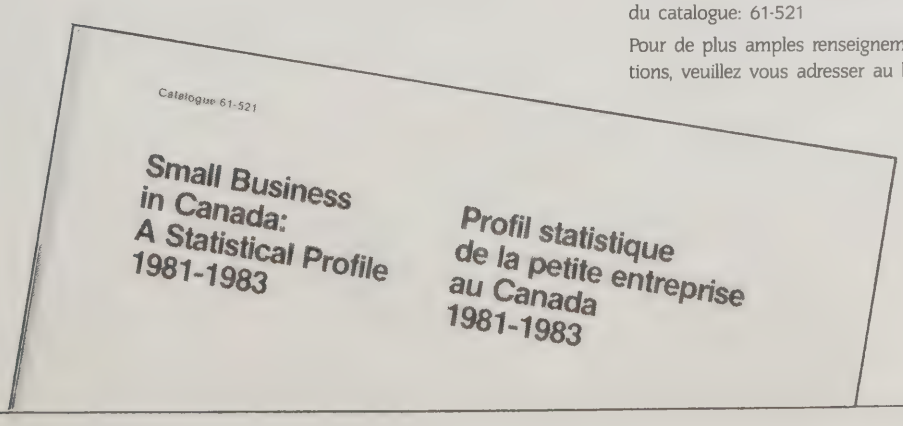
## Connaître les faits, c'est votre affaire!

Si vous êtes propriétaire ou dirigeant d'une petite entreprise, ou si vous offrez des services à de telles entreprises, cette nouvelle publication saura vous intéresser, car elle fournit des statistiques qui vous permettront de mieux comprendre le rôle des petites entreprises dans l'économie canadienne.

**Profil statistique de la petite entreprise au Canada 1981-1983** contient des données relatives aux finances et à la gestion des petites entrepriese, selon les principales branches d'activité. On y trouve donc des chiffres sur:

- l'actif, le passif et l'avoir;
- les recettes, les dépenses et les profits;
- les revenus générés (c'est-à-dire les salaires et traitements, les profits avant impôts et l'amortissement).

Les données relatives au nombre de petites entreprises et à leurs recettes sont réparties selon la tranche de recettes des entreprises (pour des recettes annuelles de $10,000 à 2 millions de dollars), selon la branche d'activité économique et selon la province.



Vous pourrez savoir quels sont les secteurs de l'industrie dans lesquels les petites entreprises ont le plus d'influence et quelles sont les conséquences de cette influence sur la production industrielle canadienne.

**Profil statistique de la petite entreprise au Canada, 1981-1983**

# Every week

## The numbers that make decisions

## The data that highlight national economic trends

*Infomat* is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

*Infomat,* Catalogue No. 11-002E (weekly), is available for $2.00 per copy/$100.00 annually (in Canada); $3.00 per copy/$150.00 annually (elsewhere), from:
Publication Sales and Services,
Statistics Canada,
Ottawa, Ontario
K1A 0T6

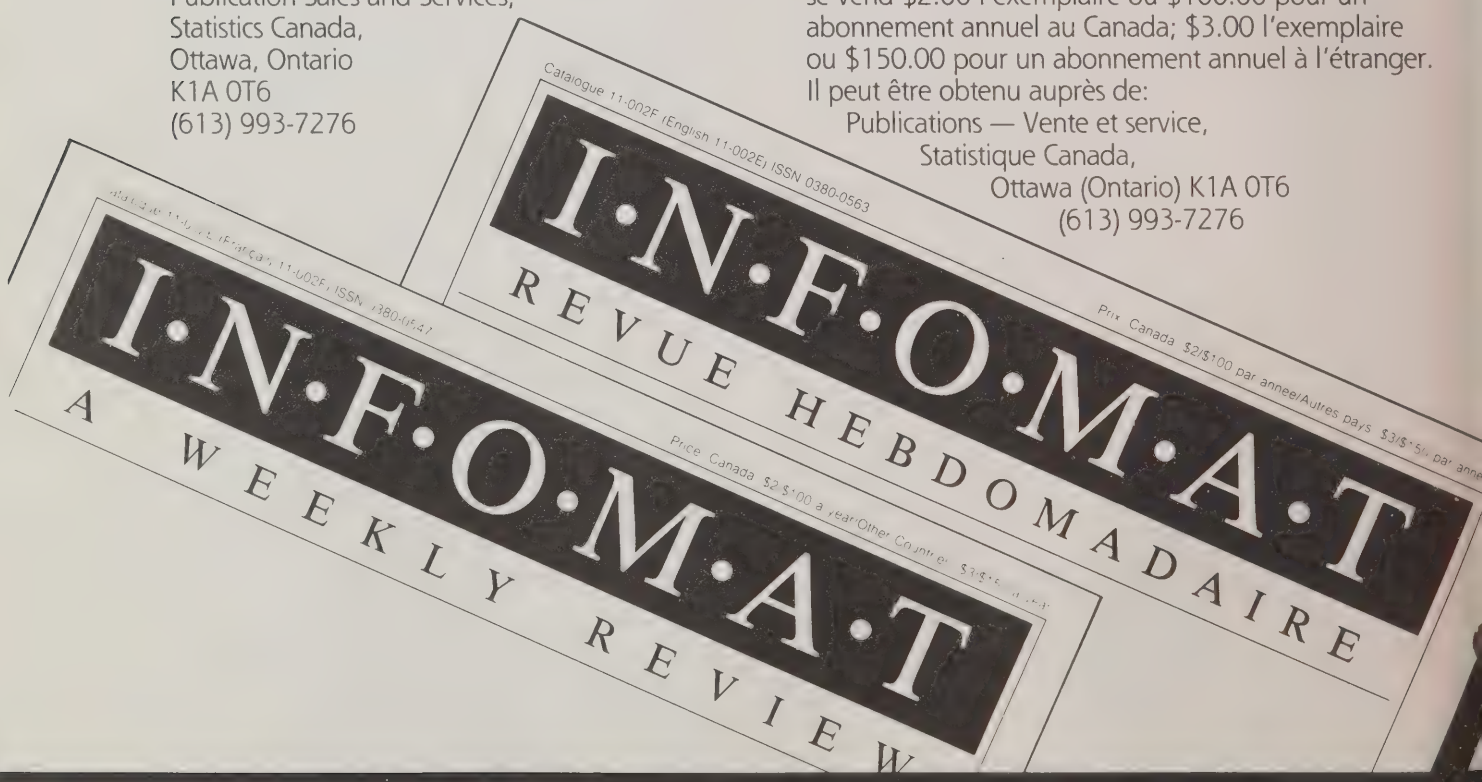
# Toutes les semaines



## Les chiffres qui font les décisions

## Les données illustrant les tendances de l'économie canadienne

*Infomat* est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

*Infomat,* n° 11-002F au catalogue (hebdomadaire), se vend $2.00 l'exemplaire ou $100.00 pour un abonnement annuel au Canada; $3.00 l'exemplaire ou $150.00 pour un abonnement annuel à l'étranger. Il peut être obtenu auprès de:

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Employment, earnings and hours,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 991-4090) or to the Statistics Canada reference centre in:

## Symbols

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

### Note on CANSIM

Some of the data published in Employment, Earnings and Hours (Catalogue 72-002) are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. Data for urban areas are also available on CANSIM. Users interested in accessing data via CANSIM should contact one of Statistics Canada's regional centres at the numbers listed on the inside front cover of this publication or contact CANSIM directly at (613)991-1150.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

- néant ou zéro.

-- nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### Note concernant CANSIM

Quelques données publiées dans l'Emploi, gains et durée du travail (n$^{o}$ 72-002 au catalogue) peuvent être obtenues sous forme lisible par machine de CANSIM (Système Canadien d'information socio-économique). Les séries historiques sont généralement plus longues sur CANSIM. Les données pour les régions urbaines sont aussi disponibles sur CANSIM. Les utilisateurs voulant obtenir des chiffres par l'intermédiaire de CANSIM doivent contacter un des centres de consultation de Statistique Canada dont les numéros de téléphone se trouvent à l'endos du couvert de cette publication ou en communiquant directement avec CANSIM au (613)991-1150.

## HIGHLIGHTS

### Preliminary Estimates[1]
(Data not seasonally adjusted) - June 1987

Preliminary data for June 1987 showed an estimated 10,161,000 employees at the Canada industrial aggregate level[2], an increase of 144,000 ( + 1.4%) from the previous month (not adjusted for seasonal variation). This represents an increase similar to that observed between May and June in previous years. Compared to June 1986, industrial aggregate employment increased by 2.6%.[3]

Average weekly earnings for all employees were estimated at $442.56 for June, little changed from May and 3.1% above the level of June 1986 (not adjusted for inflation).

### Employment

Estimated employment in June in the goods-producing industries was 3.4% higher than in May, an increase similar to that observed between these months in previous years. Employment estimates increased less than usual in construction, while there was a larger than usual increase in manufacturing. The number of employees in the service-producing industries rose by 0.8% between May and June, similar to the pattern observed in previous years. Employment increased more than usual for this time of year in finance, insurance and real estate and in community, business and personal services. The increase in transportation, communication and other utilities was smaller than usual.

The total number of employees at the Canada industrial aggregate level increased by an estimated 253,000 ( + 2.6%) from June 1986. The year-to-year growth rate in the goods-producing industries was 1.2%, the highest it has been in 1987. The yearly rate of change in the service-producing industries was 3.0%, similar to the two preceding months.

At the provincial level, estimated employment increased more than usual between May and June in Manitoba, Alberta and British Columbia, while smaller than usual increases were registered in Newfoundland, Prince Edward Island and Nova Scotia. In June, Alberta and British Columbia recorded their highest year-to-year growth rates of 1987 while Prince Edward Island and Nova Scotia recorded their lowest rates for the year.

### Earnings

Average weekly earnings for all employees in the goods-producing industries decreased by 0.4% between May and June 1987. Average weekly earnings decreased

## FAITS SAILLANTS

### Estimations préliminaires[1]
(Données non désaisonnalisées) - Juin 1987

Selon les données préliminaires non désaisonnalisées, le nombre de salariés pour l'ensemble des activités économiques[2] au Canada a atteint 10,161,000 en juin 1987, en hausse de 144,000 ( + 1.4%) par rapport au mois précédent. Ceci représente une augmentation semblable à celle habituellement observée pour cette période de l'année. Par rapport à juin 1986, le nombre de salariés pour l'ensemble des activités économiques a augmenté de 2.6%[3].

En juin 1987, la rémunération hebdomadaire moyenne pour l'ensemble des salariés était estimée à $442.56, soit peu changée par rapport à mai et 3.1% supérieure à celle du mois de juin 1986 (non ajustée pour l'inflation).

### Emploi

En juin 1987, l'estimation du nombre de salariés de la branche productrice de biens était 3.4% supérieure à celle de mai, montrant ainsi une augmentation similaire à celle ordinairement observée à ce moment de l'année. La construction a enregistré des augmentations plus faibles que d'habitude tandis que les manufactures enregistraient des hausses plus fortes qu'à l'ordinaire. Le nombre de salariés de la branche productrice de services a augmenté de 0.8% entre mai et juin, démontrant un comportement semblable à celui observé dans les années antérieures entre ces deux mois. Les finances, assurances et affaires immobilières et les services socio-culturels, communautaires et personnels ont rapporté des augmentations plus fortes que d'habitude pour ce temps de l'année. Les transports, communications et autres services publics montraient un gain plus faible que d'habitude.

En regard de juin 1986, l'estimation du nombre de salariés au niveau de l'ensemble des activités économiques au Canada montrait une hausse de 253,000 ( + 2.6%). Le taux de croissance annuel dans la branche productrice de biens était à 1.2%, sont plus haut niveau atteint jusqu'ici en 1987. Le taux de changement annuel dans la branche productrice de services était de 3.0%, pareil à ce qu'il était dans les deux derniers mois.

Au niveau provincial, des augmentations plus faibles qu'à l'ordinaire ont été observées dans l'emploi estimatif entre mai et juin à Terre-Neuve, à l'Île-du-Prince-Édouard et en Nouvelle-Écosse alors que le Manitoba, l'Alberta et la Colombie-Britannique enregistraient des hausses plus fortes qu'à l'ordinaire. L'Alberta et la Colombie-Britannique ont rapporté leur plus haut taux de croissance annuel depuis le début de 1987 alors que l'Île-du-Prince-Édouard et la Nouvelle-Écosse rapportaient leur plus bas taux annuel de l'année.

### Rémunération

La rémunération hebdomadaire moyenne pour l'ensemble des salariés dans la branche productrice de biens a diminué de 0.4% entre mai et juin. La rémunération hebdomadaire moyenne a

in construction at a time of year when an increase is usually observed. In the service-producing industries, average weekly earnings increased by 0.9% from May.

Compared to June 1986, total average weekly earnings increased by $13.26, bringing the yearly growth rate to 3.1%. Average weekly earnings in the goods-producing industries rose by 4.2% from a year earlier. The year-to-year growth rate was 2.7% in the service-producing industries. The yearly rate of change in transportation, communication and other utilities was the highest recorded since the beginning of 1987.

At the provincial level, average weekly earnings increased more than usual between May and June 1987 in Alberta and remained virtually unchanged in Prince Edward Island at a time when a decrease is usually observed. The yearly rate of change in average weekly earnings in June increased to its highest level of 1987 in Prince Edward Island, Nova Scotia, Alberta and British Columbia.

## Hours and Hourly Earnings

At the Canada industrial aggregate level, the average weekly hours for full-time and part-time employees paid by the hour (who account for approximately 48% of industrial aggregate employment) were estimated at 32.6 hours in June, a slight increase from May. Average weekly hours were estimated at 38.8 hours in the goods-s-producing industries and 29.2 hours in the service-producing industries.

Average hourly earnings of employees paid by the hour were estimated at $10.84 in June, a slight decrease from May. Average hourly earnings were estimated at $12.79 in the goods-producing industries and $9.42 in the service-producing industries.

[1] See note on "Statistical presentation" under "Concepts and Methods" at the back of this publication.

[2] The industrial aggregate is the sum of all industries with the exception of agriculture; fishing and trapping; religious organizations; private households and military personnel.

[3] Changes to the survey of Employment, Payrolls and Hours sampling frame were introduced in January 1987. Adjustment factors have been used to remove the estimated impact of these changes from all year-to-year comparisons referred to in the accompanying text. For more information on the changes see the note to users at the back of this publication.

reculé dans la construction à un temps de l'année où une augmentation est habituellement observée. Dans la branche productrice de services, la rémunération hebdomadaire moyenne s'est accrue de 0.9% entre mai et juin.

Par rapport à juin 1986, la rémunération hebdomadaire moyenne augmentait de $13.26, montrant un taux de croissance annuel de 3.1%. La rémunération hebdomadaire moyenne dans la branche productrice de biens augmentait de 4.2% par rapport à juin de l'an dernier. Le taux de variation annuel pour la branche productrice de services était de 2.7%. Le taux de variation annuel dans les transports, communications et autres services publics était à son plus haut niveau depuis le début de 1987.

Au niveau provincial, la rémunération hebdomadaire moyenne a augmenté plus que d'habitude en Alberta. Elle était pratiquement inchangée à l'Île-du-Prince-Édouard à un temps de l'année où une diminution est habituellement observée. Le taux de variation annuel de la rémunération hebdomadaire moyenne était à son niveau le plus élevé de l'année 1987 à l'Île-du-Prince-Édouard, en Nouvelle-Écosse, en Alberta et en Colombie-Britannique.

## Heures et rémunération horaire

Au niveau de l'ensemble des activités économiques au Canada, les heures hebdomadaires moyennes des salariés à temps plein et à temps partiel rémunérés à l'heure (ceux-ci représentent environ 48% des salariés de l'ensemble des activités économiques) étaient estimées à 32.6 heures en juin 1987, soit une légère augmentation par rapport au mois précédent. Selon les estimations, le nombre d'heures hebdomadaires moyennes atteignait 38.8 heures dans la branche productrice de biens et 29.2 heures dans la branche productrice de services.

En juin 1987, la rémunération horaire moyenne des salariés rémunérés à l'heure était estimée à $10.84, montrant une légère diminution par rapport à mai. Elle était estimée à $12.79 dans la branche productrice de biens et à $9.42 dans la branche productrice de services.

[1] Voir la partie "Présentation statistique" sous la rubrique "concepts et méthodes", à la fin de cette publication.

[2] L'ensemble des activités économiques est la somme de toutes les industries à l'exception de l'agriculture, la pêche et le piégeage, les organismes religieux, les ménages privés et les services de défense.

[3] Des modifications à la base de sondage de l'enquête sur l'emploi, la rémunération et les heures de travail ont été introduites en janvier 1987. Des facteurs d'ajustements ont été utilisés pour tenir compte de l'impact de ces changements sur les comparaisons annuelles mentionnées dans le texte. Pour plus d'information sur ces changements, veuillez consulter l'avis aux utilisateurs à la fin de cette publication.

## NOTES TO USERS

### 1. DATA REVISIONS - JANUARY TO APRIL 1987

Changes to the survey of Employment, Payrolls and Hours (SEPH) sampling frame were phased-in over a four-month period beginning with January 1987. Major changes included improvements to the coverage of firms in the survey sampling frame and a re-assignment of some establishments to more appropriate industry, geographic and/or employment size categories. Revised sampling fractions were also implemented in a number of areas to improve the efficiency of the sample. These changes were designed to improve the accuracy and reliability of the estimates. The phase-in over the four months, however, affected the month-to-month comparability of the published estimates over this period.

Data for the months of January, February and March 1987 were revised from the originally published information to remove the impact of the phase-in and to provide data for the first four months of 1987 on a consistent basis. The revised data were published in the May 1987 issue of this catalogue.

Adjustments to SEPH data for the previous years are required when making comparisons with the 1987 estimates. Adjustment factors needed to make such comparisons and explanations on their use were published in the May 1987 issue. The factors are also available on request from the Labour Division (613-991-4090).

### 2. SAMPLE SIZE INCREASE IN MANUFACTURING INDUSTRIES

The sample size of the Survey of Employment, Payrolls and Hours was increased by 2,000 establishments in the manufacturing industry in order to improve the quality of the estimates at the detailed industry level. Commencing with the data for January, 1986, all manufacturing firms with 50 to 199 employees were included in the sample with certainty. These firms had previously been surveyed on a sample basis. Estimates originally published for January and February, 1986, did not include these additional units so that the impact on the manufacturing data and the Industrial Aggregate could be assessed prior to publication. Data for January and February, revised to reflect this change, were first presented in the March 1986 issue of this publication.

### 3. INDUSTRIAL COMPOSITE

Note that the publication of the Estimates of Average Weekly Earnings for "Industrial Composite" was terminated with the December 1985 estimates.

### 4. URBAN AREAS

Effective with **June 1985,** data for urban areas have been removed from the publication and the remaining statistical tables have been re-numbered as a result of the changes. (See the June 1985 issue for the conversion from the old to the new table numbers).

## AVIS AUX UTILISATEURS

### 1. RÉVISIONS AUX DONNÉEES - JANVIER À AVRIL 1987

Les modifications apportées à la base de sondage de l'enquête sur l'emploi, la rémunération et les heures de travail (EERH) ont été incorporées au cours d'une période de quatre mois à compter du mois de référence de janvier 1987. Les principales modifications comprennent des améliorations au champ d'observation des entreprises dans la base de sondage de l'enquête, la réaffectation de certains établissements à des catégories plus appropriées au niveau de l'activité économique, du lieu géographique ou de la taille de l'emploi et des révisions aux fractions de sondage dans un certain nombre de domaines. Ces modifictions sont destinées à améliorer la précision et la fiabilité des estimations. La mise en oeuvre des modifications au cours de ces quatre mois a cependant affecté la comparabilité d'un mois à l'autre des estimations publiées pendant cette période.

Les données pour janvier, février et mars 1987 ont été révisées par rapport aux estimations déjà publiées afin d'éliminer les conséquences de la mise en oeuvre des modifications et de présenter des données pour les quatre premiers mois de 1987 sur une base cohérente. Ces données révisées ont été publiées dans le numéro de mai 1987.

Il faut corriger les données de l'EERH des années antérieures lorsque l'on procède à des comparaisons avec les estimations de 1987. Les facteurs d'ajustement nécessaires pour effectuer ces comparaisons et les explications pour leur emploi ont été publiés dans le numéro de mai 1987. Les facteurs sont aussi disponibles sur demande auprès de la Division du travail (613-991-4090).

### 2. AUGMENTATION DE LA TAILLE DE L'ÉCHANTILLON DANS LES INDUSTRIES MANUFACTURIÈRES

Dans le but d'améliorer la qualité des séries publiées par l'enquête sur l'emploi, la rémunération et les heures de travail sur les industries manufacturières, 2,000 entreprises ont été ajoutées à l'échantillon de ce secteur. À partir du mois de référence de janvier 1986, toutes les entreprises manufacturières ayant 50 à 199 salariés sont incluses dans l'échantillon. Auparavant, seul un échantillon de ces entreprises était enquêté. Les chiffres originalement publiés pour les mois de janvier et de février 1986 n'incluaient pas ces unités additionnelles. Le but de ce délai était de déterminer l'impact sur les estimations des industries manufacturières et de l'ensemble des activités économiques. Il est important de noter que les chiffres de janvier et février, révisés pour refléter le changement, ont été publiés dans le numéro de mars 1986 de ce catalogue.

### 3. ENSEMBLE DES INDUSTRIES

Veuillez noter que les Estimations de la rémunération hebdomadaire moyenne pour l'"ensemble des industries" ont cessé d'être publiées avec les estimations révisées de décembre, 1985.

### 4. RÉGIONS URBAINES

À partir de **juin 1985,** les données pour les régions urbaines ont été supprimées et les tableaux qui font encore partie de cette publication ont été rénumérotés. (Voir la publication de juin 1985, pour la conversion des anciens aux nouveaux numéros de tableaux).

Data for urban areas will continue to be made available to users on request.

## 5. REVISIONS TO HISTORICAL DATA

### 1984

There has been a revision to the data published monthly in the January to July 1984 issues of Catalogue 72-002 for the industries listed below. The revised series appear in the September 1984 issue. All data variables for the following series at the Canada, Provinces and Territories level may be affected:

1. Total Number of Employees - All Survey Units
2. Salaried Employees - All Survey Units
3. Total Number of Employees - Take-All Units
4. Salaried Employees - Take-All Units

| Industry | SIC 1970 CAÉ |
|---|---|
| Industrial aggregate | 031 - 951 |
| Goods producing industries | 031 - 421 |
| Construction | 404 - 421 |
| Engineering | 406, 409 |
| Other engineering | 409 |
| Service producing industries | 501 - 951 |
| Community, business and personal services | 801 - 899 |
| Education and related services | 801 - 809 |
| Education, excluding libraries and museums | 809T |
| Education, n.e.s. | 809 |
| Health and Welfare Services | 821 - 828 |
| Welfare organizations | 828 |
| Amusement and recreation | 841 - 849 |
| Theatrical and other Staged Entertainment | 845 |
| Misc. amusement and recreation | 849 |
| Services to business management | 851 - 869 |
| Engineering and scientific services | 864 |
| Misc. services | 891 - 899 |
| Misc. services, n.e.s. | 899 |

For additional information on any of the above issues, or on the use or application of data series, please contact Renée Arsenault of the Labour Division at (613) 991-4090.

Les données pour les régions urbaines sont toujours disponibles sur demande.

## 5. RÉVISIONS AUX DONNÉES HISTORIQUES

### 1984

Des révisions ont été apportées aux chiffres publiés dans le catalogue mensuel numéro 72-002 pour les mois de janvier à juillet 1984, pour les industries mentionnées ci-dessous. Les séries révisées figurent dans le catalogue du mois de septembre 1984. Toutes les variables pour les séries qui suivent aux niveaux du Canada, provinces et territoires peuvent être affectées:

1. Nombre total de salariés - Ensemble des unités
2. Employés - Ensemble des unités
3. Nombre total de salariés - Unités à tirage complet
4. Employés - Unités à tirage complet

| Industrie |
|---|
| Ensemble des activités |
| Branches productrices de biens |
| Construction |
| Génie civil |
| Autre génie civil |
| Branches productrices de services |
| Services socio-culturels, comm. et pers. |
| Enseignement et services annexes |
| Enseignement et services sauf bibliothèques, musées |
| Enseignement, n.c.a. |
| Services médicaux et sociaux |
| Organismes de bien-être |
| Divertissements et loisirs |
| Services de théâtre et autres spectacles |
| Services divers de divertissements et de loisirs |
| Services fournis aux entreprises |
| Bureaux d'études et services scientifiques |
| Services divers |
| Services divers, n.c.a. |

Pour de plus amples renseignements sur les sujets précités, ou sur l'utilisation et l'application de séries alternatives, communiquer avec Renée Arsenault de la Division du travail à (613) 991-4090.

## A REVIEW OF EMPLOYMENT AND EARNINGS DATA, 1983-1986

By Fred Wong*

### INTRODUCTION

The 1981-1982 recession, the worst in Canada's recent history, left its mark on the labour market. Developments in employment since the recession have been examined at the broad industry level using Labour Force Survey (LFS) data[1]. The present article is the first of a series drawing on data from the Survey of Employment, Payrolls and Hours (SEPH) to analyze employment changes at finer levels of industry detail. And since SEPH is also a source of data on earnings and hours worked -- two important indicators of labour market performance -- developments in these areas will also be examined.

### HIGHLIGHTS

- In 1983 -- the first full year of recovery from the worst recession in the post-war era -- average payroll employment in Canada declined by 0.9% (-77,600). In fact, the 1983 level (8,519,600) was the lowest since 1979 (8,415,500). As the economic recovery gathered momentum

## SURVOL DES DONNÉES SUR L'EMPLOI ET LA RÉMUNÉRATION, 1983-1986

Par Fred Wong*

### INTRODUCTION

La récession de 1981-1982, la pire dans l'histoire récente du Canada, a eu des retombées sur le marché du travail. Les données de l'enquête sur la population active (EPA) ont permis d'examiner l'évolution de l'emploi dans les grands secteurs d'activité économique depuis cette récession.[1] Le présent article lance une série ayant comme objet l'analyse des variations de l'emploi à un niveau plus détaillé des branches d'activité d'après les résultats de l'enquête sur l'emploi, la rémunération et les heures de travail (EERH). Comme cette enquête renseigne également sur deux mesures importantes de la santé du marché du travail, soit la rémunération et les heures de travail effectuées, celles-ci sont aussi visées dans l'analyse.

### FAITS SAILLANTS

- En 1983, première année complète de redressement à la suite de la pire récession dans l'époque d'après-guerre, le nombre moyen de salariés au Canada a diminué de 0.9% (-77,600). En fait, le niveau de 1983 (8,519,600) a été le plus faible depuis 1979 (8,415,500). La progression de la

* Fred Wong est économiste à la division de l'analyse des enquêtes sur le travail et les ménages, (613)991-4607.

in 1984, employment grew by 1.6% (132,500). The next year, the growth rate accelerated to 3.9% (341,600) then slowed to a more moderate 2.0% (182,600) in 1986.

- Employment between 1983 and 1986 was sensitive to short-term fluctuations in economic activity. For example, significant employment losses occurred between December 1983 and March 1984 (-174,500, seasonally adjusted). The major surge in employment during the post-recession period began in April 1984 and was generally maintained through 1986.

- Over the four years of economic recovery, employment growth was concentrated in the service sector. By 1984, the number of service sector jobs had surpassed the 1981 pre-recession peak. In contrast, employment growth in the goods-producing sector has been weak since the recession. The level in 1986 was still substantially below (-9.6%) the 1981 peak.

- Community, business and personal services accounted for 43.3% of total employment growth in the service-producing sector in 1984, 61.7% in 1985, and 59.9% in 1986.

- Most of the employment growth occurred in Quebec and Ontario. These two provinces accounted for 76.7% of the total job growth in the post-recession period. Yukon, however, had the highest growth rate (5.3%) in 1984, while in 1985, the highest rate occurred in Alberta (7.7%). In 1986, Yukon was again the leader (9.6%).

reprise économique en 1984 s'est accompagnée d'une hausse de l'emploi de 1.6% (132,500). L'année suivante, la croissance a touché 3.9% (341,600), puis elle a ralenti pour se fixer à un taux plus modéré de 2.0% (182,600) en 1986.

- L'emploi entre 1983 et 1986 a été affecté par les fluctuations à court terme de l'activité économique. Par exemple, des pertes importantes en matière d'emploi se sont produites entre décembre 1983 et mars 1984 (-174,500, chiffre désaisonnalisé). Le plus grand essor de l'emploi durant la période d'après-récession a commencé en avril 1984 et s'est effectivement maintenu jusqu'à la fin de 1986.

- Durant ces quatres années de reprise économique, la croissance de l'emploi s'est concentrée dans le secteur des services. En 1984, le nombre moyen d'emplois dans ce secteur a dépassé le sommet antérieur à la récession, enregistré en 1981. Par contre, dans le secteur producteur de biens, la croissance de l'emploi a été faible depuis la récession. Le niveau moyen en 1986 était sensiblement (-9.6%) inférieur au sommet de 1981.

- Les services socio-culturels, commerciaux et personnels figuraient pour 43.3% de la croissance de l'emploi total dans le secteur producteur de services en 1984, 61.7% en 1985, et 59.9% en 1986.

- La croissance de l'emploi s'est concentrée au Québec et en Ontario. Ces deux provinces justifiaient de 76.7% de la croissance de l'emploi total durant la période postérieure à la récession. Le taux le plus élevé de croissance a toutefois été observé au Yukon en 1984 (5.3%), et en Alberta en 1985 (7.7%). En 1986, le Yukon avait repris la première place (9.6%).

- Average weekly earnings in current dollars continued to grow during the post-recession period. Average weekly earnings in 1981 constant dollars (that is, adjusted for inflation by the Consumer Price Index), however, showed a downward trend: after posting no gain in 1984, losses were recorded in 1985 (-0.5%) and 1986 (-1.3%).

- Average weekly hours for salaried workers and hourly paid workers have shown little change since 1983. Only hourly paid workers in forestry, mining and manufacturing had significant fluctuations in average weekly hours during this period.

- Les gains hebdomadaires moyens en dollars courants ont continué d'augmenter durant la période qui a suivi la récession. Les gains hebdomadaires moyens en dollars constants de 1981 (c'est-à-dire corrigés en fonction de l'indice des prix à la consommation pour tenir compte de l'inflation) ont toutefois affiché une tendance à la baisse: ils n'ont pas progressé en 1984, et ont accusé des baisses de 0.5% en 1985 et 1.3% en 1986.

- Les heures hebdomadaires moyennes de travail pour les employés et pour les ouvriers n'ont guère varié depuis 1983. Seuls les ouvriers de l'exploitation forestière, les mines et les industries manufacturières ont connu des fluctuations importantes des heures hebdomadaires moyennes durant cette période.

## THE DATA SOURCE

Prior to 1983, establishment-based estimates of employment, earnings and hours were derived from payroll records using three different approaches: a census of "larger firms" with 20 or more employees (ES-1); a sample survey of "smaller firms" with fewer than 20 employees (ES-2); and supplementary surveys covering non-commercial sectors such as education, health and welfare services, religious organizations and public administration. The three surveys covered the target population, but the estimates had two major shortcomings. First, data on weekly earnings and hours were collected only from the larger firms (ES-1), and not from smaller employers (ES-2) or the supplementary survey respondents. Hence there were no comprehensive estimates of earnings and hours for all employees. Second, total employment was obtained by summing estimates from all three sources even though they had different collection, editing and estimation procedures. The attempt to

## LA SOURCE DES DONNÉES

Avant 1983, les estimations de l'emploi, de la rémunération et des heures provenant des établissements étaient recueillies de trois façons distinctes: un recensement des "grandes entreprises" ayant vingt salariés ou plus (ES-1); une enquête-échantillon auprès des "petites entreprises" ayant moins de vingt salariés (ES-2); et des enquêtes supplémentaires couvrant des secteurs non commerciaux tels que l'éducation, les services de santé et de bien-être, les organisations religieuses et l'administration publique. Les trois enquêtes couvraient la population visée, mais les estimations présentaient deux grandes faiblesses. Premièrement, les données sur la rémunération hebdomadaire et sur les heures étaient recueillies seulement auprès des grandes entreprises (ES-1) et non auprès des autres répondants. Par conséquent, il n'existait pas d'estimations complètes des gains et des heures pour l'ensemble des salariés. Deuxièmement, l'emploi total représentait la somme des estimations provenant des trois sources, en dépit du fait que les méthodes de collecte, de

eliminate these and other problems culminated in SEPH, which produces estimates that are largely free of the earlier problems.

vérification et d'estimation étaient différentes. La tentative d'éliminer ces problèmes ainsi que d'autres inconvénients a abouti à l'EERH, qui produit des estimations essentiellement dépourvues des problèmes antérieurs.

SEPH measures levels and trends of paid employment, earnings and hours. It covers all industries with the exceptions of agriculture, fishing and trapping, private households, religious organizations and military services. It produces estimates by detailed industry (three-digit Standard Industrial Classification) for the provinces and territories, and somewhat less detailed (two-digit) estimates for small geographical areas such as economic regions in Quebec and Ontario, and selected metropolitan or urban areas. These estimates can be used in evaluating the contribution of labour to the economy. For example, the value of labour services can be obtained from the earnings data, and the quantity of labour input can be calculated from estimates of hours worked and the number of employees.

L'EERH mesure les niveaux et les tendances de l'emploi salarié, de la rémunération et des heures de travail. Elle couvre toutes les branches d'activité économique à l'exception de l'agriculture, la pêche et le piégeage, les ménages privés, les organisations religieuses et les services militaires. Elle produit des estimations détaillées (catégories à trois chiffres de la Classification type des industries) pour les provinces et territoires et des estimations un peu moins détaillées (catégories à deux chiffres) portant sur de petites zones géographiques telles que les régions économiques du Québec et de l'Ontario, et certaines régions métropolitaines ou urbaines. Ces estimations peuvent servir à mesurer la contribution de la main-d'oeuvre à l'économie. Par exemple, la valeur des services de main-d'oeuvre peut être dérivée des chiffres de rémunération, et l'apport de la main-d'oeuvre peut être calculé à partir des estimations des heures travaillées et du nombre de salariés.

This article focuses on employment changes since the onset of the recovery in 1983. The table and charts include data for earlier years in order to put recent changes in perspective. The data are primarily at the industry division (one-digit) level. Linked data series[2] were also used to examine changes over a longer time span. Unfortunately, linked data can be created for only a limited number of series at the industry division level and for none below the division level or at the provincial level. Thus, from 1979 to

Cet article traite des variations de l'emploi depuis le début de la reprise en 1983. Le tableau et les graphiques comprennent des données pour les années précédentes, afin de mettre les variations en perspective. Les données sont présentées surtout au niveau de la branche d'activité économique (catégorie à un chiffre). On a également utilisé des séries de données raccordées[2] pour examiner les changements sur une plus longue période. Malheureusement, des données raccordées peuvent être créées seulement pour un nombre limité de séries au niveau de la branche

1984 linked annual estimates were used to analyze industry division aggregates.

d'activité, et elles ne peuvent pas être produites au-dessous du niveau de la branche ou au niveau provincial. Ainsi, les estimations annuelles raccordées de 1979 à 1984 ont été utilisées pour analyser les aggrégats par branche d'activité.

This article begins with a review of general employment developments in major industrial sectors and various subgroups since the recession. This is followed by a look at provincial aspects of employment and average weekly earnings and hours.

Cet article commence par une revue de l'évaluation générale de l'emploi dans les principaux secteurs d'activité économique et dans différents sous-groupes depuis la récession. Les sections subséquentes portent sur les aspects provinciaux de l'emploi ainsi que sur la rémunération hebdomadaire moyenne et la durée de la semaine de travail.

Since the completion of this study, many improvements have been made to the sample frame. Between January and April 1987, sampling fractions were revised and information about the establishments in the sample frame was brought up-to-date. As a result, estimates in general are slightly higher compared to those from previous years. Estimates prior to the sample frame improvements can be adjusted using factors published in the May issue of **Employment, Earnings and Hours.** Unadjusted estimates were used in this review, but the trends and relative movements of the estimates would remain unchanged even after adjustment.

Suite à l'achèvement de cette étude, plusieurs améliorations ont été apportées au cadre d'échantillonnage. De janvier à avril 1987, des fractions d'échantillonnage ont fait l'objet de révisions, et des renseignements ont été mis à jour sur les établissements visés. Ainsi, comparativement aux années précédentes, les estimations sont généralement un peu plus élevées. Les estimations antérieures aux améliorations apportées au cadre d'échantillonnage peuvent être ajustées à l'aide des facteurs publiés dans le numéro de mai d'**Emploi, gains et durée du travail.** Dans cette analyse, les estimations utilisées ne sont pas ajustées, mais les tendances et mouvements relatifs ne seraient pas affectés même après ajustement.

## EMPLOYMENT LEVELS

In December 1982, three months before the introduction of SEPH, the Canadian economy began to emerge from the recession that had begun in July 1981. This recession was the most

## NIVEAUX D'EMPLOI

En décembre 1982, trois mois avant l'adoption de l'EERH, l'économie canadienne a commencé à sortir de la récession qui avait débuté en juillet 1981. Cette récession a été le plus

severe of all post-war downturns in both duration and magnitude as measured by changes in real gross domestic product (GDP).[3] As the economy began to recover in 1983, real GDP grew by 3.2%, but the level remained below the pre-recession peak reached in 1981. Indeed, the recovery was modest in view of the enormous output losses (-8.6%) over the course of the recession.[4]

grave repli enregistré durant la période d'après-guerre tant du point de vue de la durée que de l'ampleur, selon ce que révèlent les variations du produit intérieur brut réel (PIB)[3]. Avec l'amorce de la reprise économique en 1983, le PIB réel a augmenté de 3.2%, mais le niveau est demeuré inférieur au sommet antérieur à la récession atteint en 1981. Ce redressement a été modeste, compte tenu des pertes énormes à la production (-8.6%) durant la période de récession[4].

* Linked data. - Données raccordées.

Because excess labour capacity, not to mention inventories, accumulate during a recession, employment is not expected to grow significantly during the initial phase of an economic recovery. Although employment did grow throughout most of 1983, the 1983 annual average payroll employment (8,519,600) was still marginally below the 1982 level (-0.9%, -77,600). The 1983 level was the lowest since 1979 (8,415,500), illustrating the impact of the recession and the

Étant donné qu'une capacité de travail excédentaire, ainsi que les inventaires, s'accumulent durant une récession, on ne s'attend pas que l'emploi augmente sensiblement durant la phase initiale d'une reprise économique. Bien que l'emploi ait effectivement augmenté durant la majeure partie de 1983, l'effectif salarié moyen pour l'année (8,519,600) est demeuré légèrement inférieur au niveau de 1982 (-0.9%, -77,600). Le niveau de 1983 a été le plus faible depuis 1979 (8,415,500), reflétant l'impact de la

weakness of the initial economic recovery. The recovery gained momentum in 1984 as the real GDP growth rate accelerated to 6.3%. Employment growth also resumed during this period with a modest increase of 1.6% (132,500). Although real GDP grew at a reduced rate of 4.3% in 1985, the employment growth rate surged to 3.9% (341,600) and the employment level surpassed the 1981 pre-recession peak. In 1986, the real GDP growth rate was further reduced to 3.3%. Employment growth continued, but also at the much slower pace of 2.0% (182,600).

Much of the growth since the recession was concentrated in the service-producing industries, where employment recovery came relatively quickly. The total job gain in the service sector over this period was 590,100. Although employment declined marginally (-0.5%) in 1983, the 1984 growth rate of 2.8% brought the level to 6,435,100, exceeding the 1981 pre-recession high of 6,310,000. The growth rate then accelerated to 4.0% (259,600) in 1985, before declining to 2.3% (151,600) in 1986.

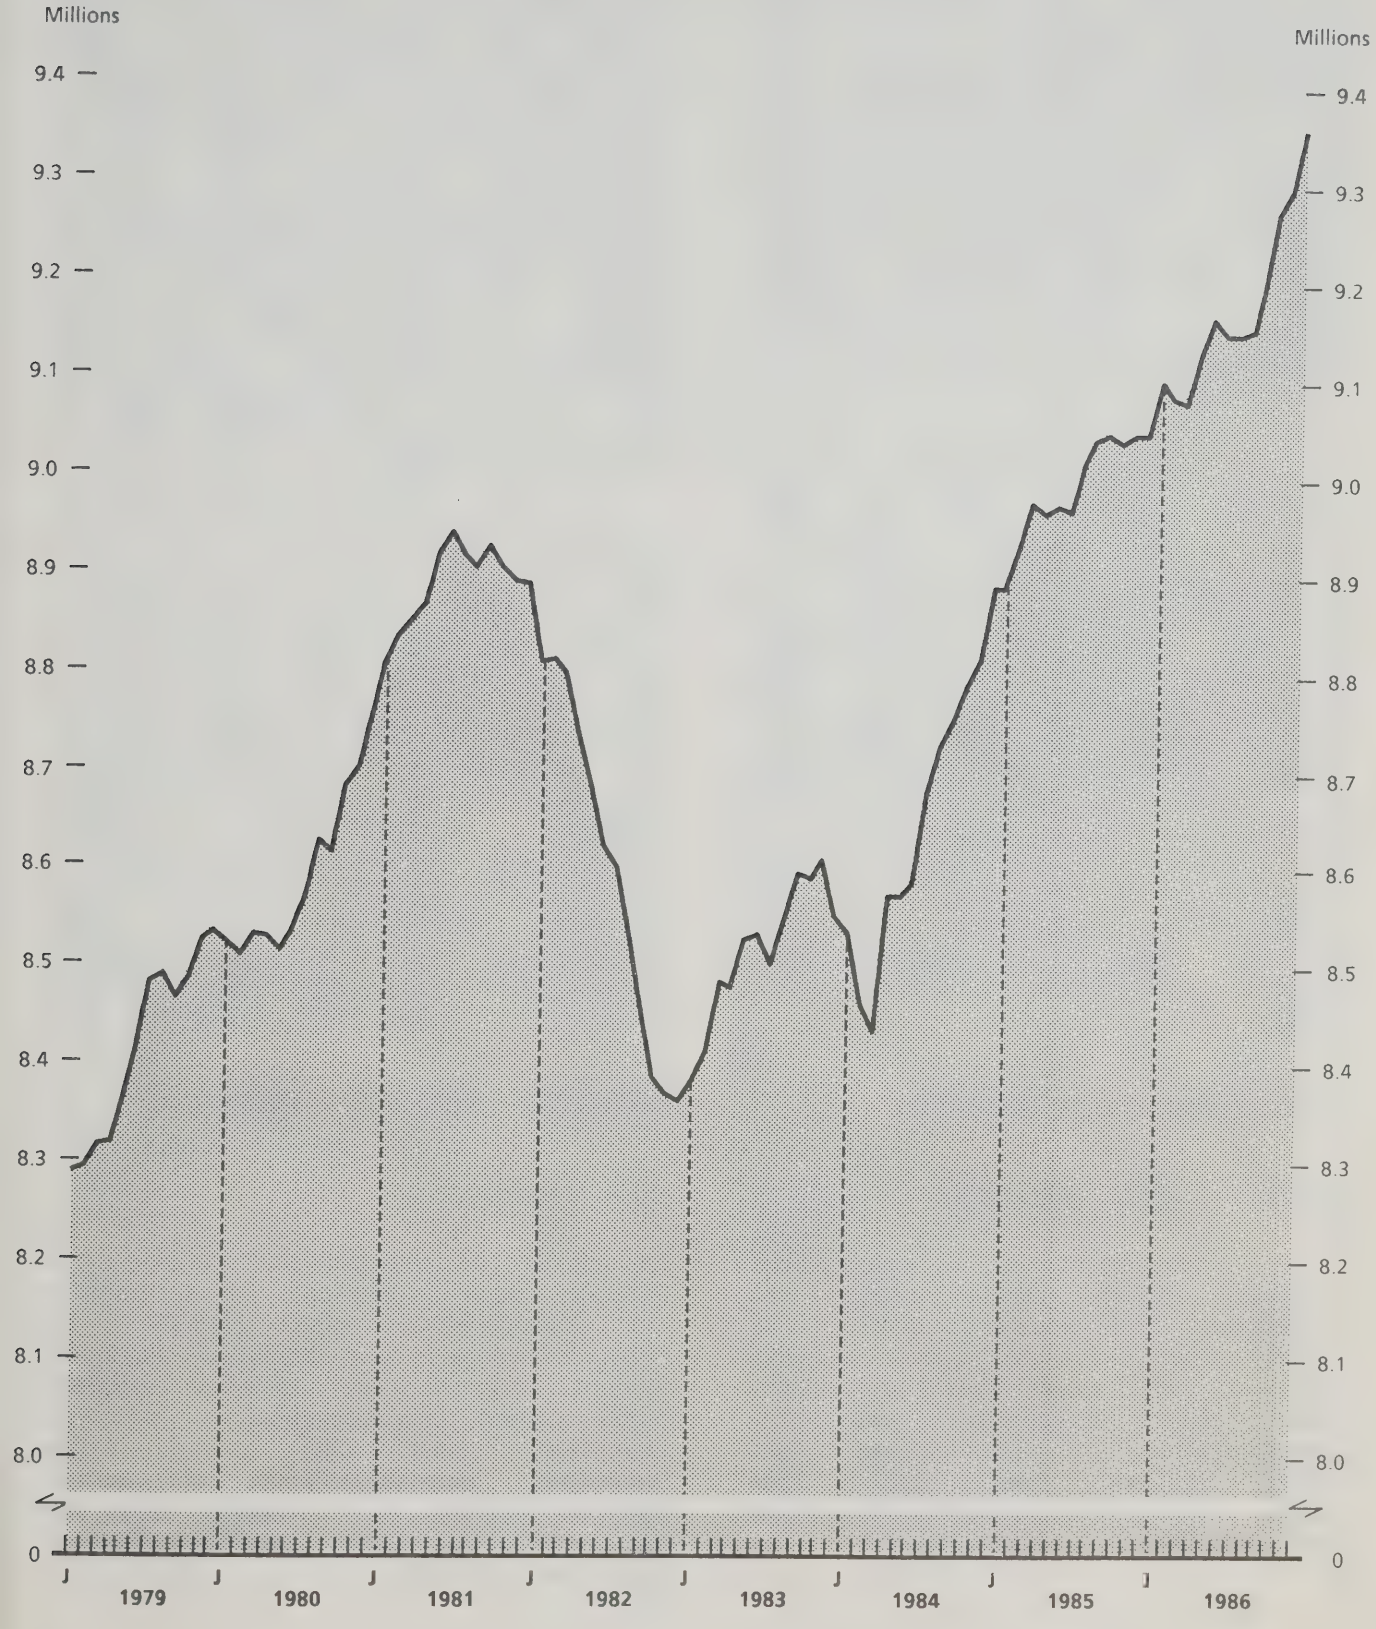
Employment growth in the goods-producing industries, on the other hand, was weak. In the first two years of the economic recovery, job losses were posted. The magnitude of the losses was similar in both years, 2.1% (-47,800) in 1983 and 2.0% (-45,700) in 1984. Employment growth was finally restored in 1985 with a gain of 3.7% (82,000), followed by another rise (1.3% or 31,000) in 1986. Despite these gains, the 1986 level remained 9.6% (-247,000) below the 1981 pre-recession high.

Payroll employment growth was also influenced by short-term fluctuations in economic activity during the

récession et la faiblesse du redressement économique initial. La reprise s'est accélérée en 1984, le taux de croissance du PIB réel atteignait 6.3%. L'emploi a également repris sa croissance durant cette période avec un gain modeste de 1.6% (132,500). Bien que le PIB réel ait augmenté à un taux réduit de 4.3% en 1985, le taux de croissance de l'emploi a grimpé à 3.9% (341,600), et le niveau d'emploi a dépassé le sommet antérieur à la récession observé en 1981. En 1986, le taux de croissance du PIB réel a encore diminué pour s'établir à 3.3%. La croissance de l'emploi s'est poursuivie, mais elle aussi au rythme beaucoup plus lent de 2.0% (182,600).

La croissance depuis la récession a été concentrée pour une large part dans le secteur des services, où l'emploi a remonté relativement vite. Le gain total à ce titre dans le secteur des services durant cette période a été de 590,100. Bien que l'emploi ait légèrement diminué (-0.5%) en 1983, le taux de croissance de 2.8% enregistré en 1984 a porté le niveau à 6,435,100, chiffre supérieur au sommet de 6,310,000 atteint en 1981, avant la récession. Le taux de croissance a ensuite monté à 4.0% (259,600) en 1985, puis est retombé à 2.3% (151,600) en 1986.

La croissance de l'emploi dans le secteur des biens, par contre, a été faible. Durant les deux premières années de la reprise économique, on a enregistré des pertes d'emploi. L'ampleur des pertes a été analogue pour les deux années, soit 2.1% (-47,800) en 1983 et 2.0% (-45,700) en 1984. La croissance de l'emploi a finalement été rétablie en 1985 avec un gain de 3.7% (82,000), suivi d'une autre hausse de 1.3% (31,000) en 1986. En dépit des augmentations, le niveau de 1986 demeurait de 9.6% (-247,000) inférieur au sommet antérieur à la récession atteint en 1981.



La croissance de l'emploi salarié a été également influencée par les fluctuations à court terme de l'activité

**Chart – 3**

**Employment, Canada, Seasonally Adjusted Monthly Data, 1979-1986**

**Graphique – 3**

**Emploi, Canada, données mensuelles désaisonnalisées, 1979-1986**

recovery period. During the last quarter of 1983 and first quarter of 1984, seasonally adjusted GDP grew at somewhat slower rates, 0.8% and 1.4% respectively, compared with rates ranging from 1.6% to 2.3% in the first three quarters of 1983. As shown in Chart 3, employment (linked seasonally adjusted data) began declining in December 1983 and continued into March 1984. The job losses over the four-month period were substantial (-174,500), underscoring the sensitivity of payroll employment to brief downturns in economic growth.

économique durant la période de reprise. Au cours du dernier trimestre de 1983 et du premier trimestre de 1984, le PIB désaisonnalisé s'est accru à un rythme un peu plus lent, soit 0.8% et 1.4% respectivement, par rapport aux premiers trois trimestres de 1983 où le niveau se situait entre 1.6% et 2.3%. Comme l'indique le graphique 3, l'emploi (désaisonnalisé, après raccordement) a commencé à diminuer en décembre 1983, et la baisse s'est poursuivie jusqu'en mars 1984. Les pertes d'emploi sur la période de quatre mois ont été considérables (-174,500), accentuant ainsi la sensibilité de l'emploi salarié aux replis de courte durée dans la croissance de l'emploi.

The chart also shows that the major surge of post-recession employment growth began in April 1984 and maintained its momentum through most of 1985, except for a three-month interruption (April to June 1985) following another slump in the GDP growth rate. In March 1985, 25 months after the recession's trough in December 1982, the linked seasonally adjusted employment level (8,975,700) finally exceeded the pre-recession peak set in June 1981 (8,939,300). Throughout 1986, the economy grew at a reduced pace (3.3%); employment also grew more slowly.

Le graphique montre également que la croissance la plus prononcée de l'emploi après la récession a commencé en avril 1984 et s'est maintenue durant la majeure partie de 1985, sauf pour une interruption de trois mois (avril à juin 1985) suivant une autre baisse du taux de croissance du PIB. En mars 1985, 25 mois après le creux de décembre 1982 provoqué par la récession, le niveau d'emploi désaisonnalisé après raccordement (8,975,700) a finalement dépassé le sommet antérieur à la récession atteint en juin 1981 (8,939,300). Pendant toute l'année 1986, l'économie a progressé lentement (3.3%); l'emploi a aussi augmenté plus lentement.

## DEVELOPMENTS BY INDUSTRY

### Service-Producing Industries

The post-recession employment recovery in the service sector was widespread and relatively quick. By 1984, most of the industries had regained all their recession losses. The only exception was the transportation, communications and other utilities group: their 1986 level remained 3.8% (-31,900) below the 1981 high.

## ÉVOLUTION SELON LA BRANCHE D'ACTIVITÉ

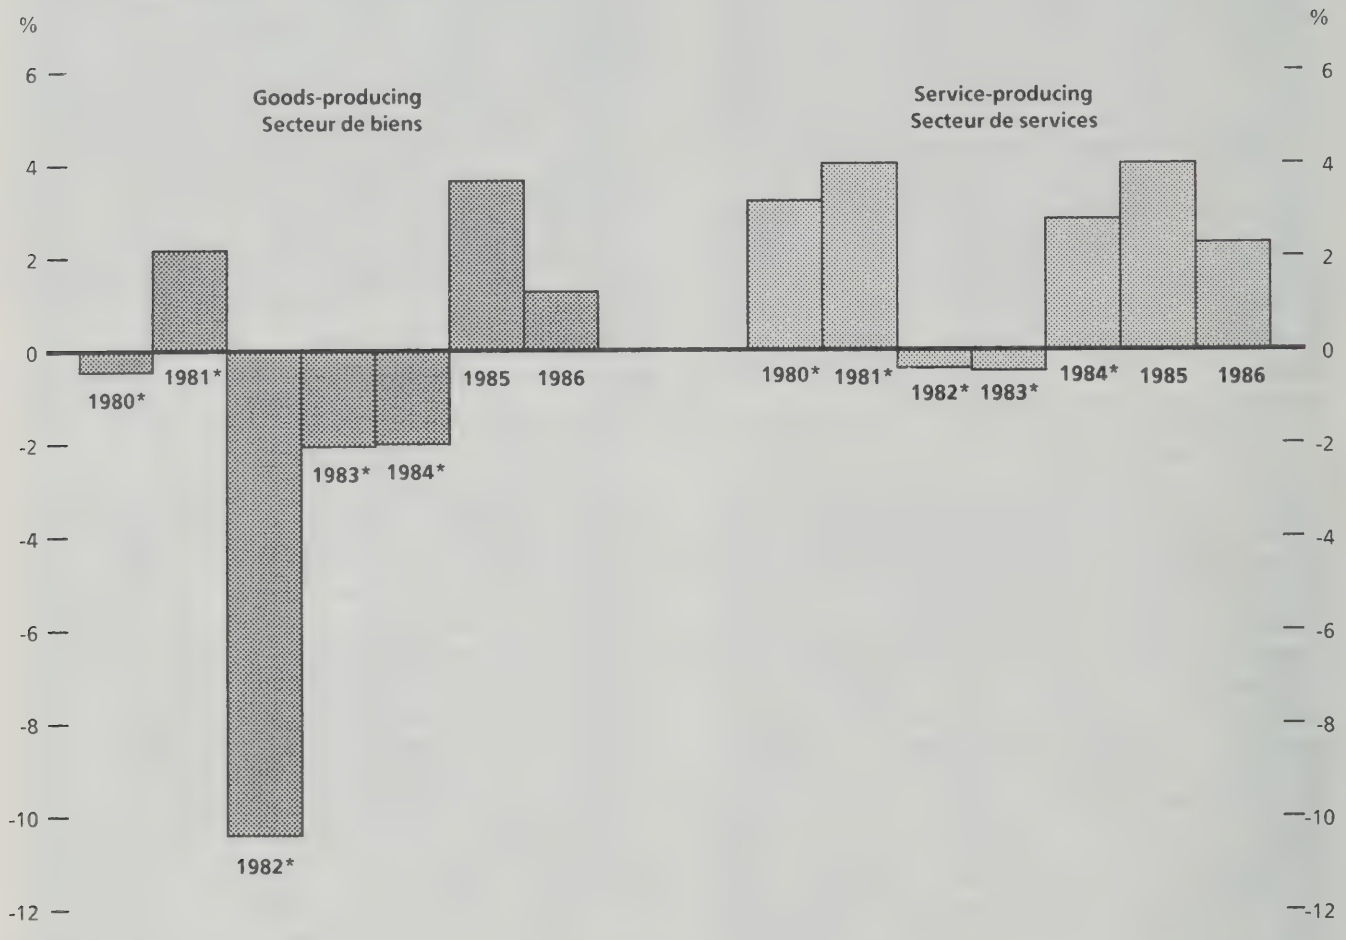
### Secteur des services

La reprise de l'emploi postérieure à la récession dans le secteur des services a été généralisée et assez rapide. En 1984, la plupart des branches d'activité avaient regagné ce qu'elles avaient perdu durant la récession. La seule exception était le groupe des transports, communications et autres services publics, où le niveau de 1986 est demeuré de 3.8% (-31,900) inférieur au sommet de 1981.

Growth in the service sector was dominated by community, business, and personal services. This group of industries accounted for 43.3% of total employment growth in the sector during 1984, 61.7% during 1985, and 59.9% during 1986. Employment grew at an increasing rate from 1983 to 1985: 1.3% (35,200) in 1983, 2.7% (77,200) in 1984, and 5.5% (160,100) in 1985. The 1986 growth rate, however, declined slightly to 3.0% (90,700). Between 1983 and 1986, growth was concentrated in services to business management (53,700, 14.1%), accommodation and food services (100,000, 20.9%), health and welfare services (74,100, 9.0%), and personal services (14,000, 17.7%).

After a decline of 3.2% (-48,400) in 1983, trade employment increased by 4.7% (70,100) in 1984, 4.3% (66,700) in 1985, and 2.5% (40,800) in 1986. Retail trade also reflected this trend: from 1983 to 1986, substantial increases occurred for retailers of automotive products (41,800, 19.1%), motor vehicle dealers (20,200, 27.5%), furniture and appliance stores (20,700, 28.4%) and drug stores (21,400, 48.5%). At the wholesale level, the major gains were in electrical machinery, equipment and supplies (7,800, 26.3%); wholesalers of machinery and equipment not elsewhere specified (12,100, 15.7%); and motor vehicles and accessories (5,300, 12.7%).

La croissance dans le secteur des services a été la plus élevée dans les services socio-culturels, commerciaux et personnels. Ce groupe figurait pour 43.3% de l'augmentation de l'emploi total dans le secteur en 1984, 61.7% en 1985, et 59.9% en 1986. L'emploi a progressé à un rythme croissant entre 1983 et 1985: 1.3% (35,200) en 1983, 2.7% (77,200) en 1984 et 5.5% (160,100) en 1985. En 1986, toutefois, le taux de croissance a légèrement diminué pour s'établir à 3.0% (90,700). Entre 1983 et 1986, la croissance a été concentrée dans les services aux entreprises (53,700, 14.1%), l'hébergement et la restauration (100,000, 20.9%), les services médicaux et sociaux (74,100, 9.0%) et les services personnels (14,000, 17.7%).



Après une baisse de 3.2% (-48,400) en 1983, l'emploi dans le commerce a augmenté de 4.7% (70,100) en 1984, 4.3% (66,700) en 1985, et 2.5% (40,800) en 1986. Le commerce de détail a également reflété cette tendance: entre 1983 et 1986, des augmentations considérables ont été enregistrées pour les détaillants d'accessoires d'automobiles (41,800, 19.1%), les détaillants de véhicules automobiles (20,200, 27.5%), les magasins de meubles et d'appareils ménagers (20,700, 28.4%) et les pharmacies (21,400, 48.5%). Au niveau du commerce en gros, les principaux gains d'emploi ont eu lieu dans les machines, matériels et fournitures électriques (7,800, 26.3%), les machines et matériels non classés ailleurs (12,100, 15.7%), et les véhicules automobiles et accessoires (5,300, 12.7%).

* Données raccordées

Employment in finance, insurance and real estate grew 3.5% (18,000) in 1984, 3.9% (20,600) in 1985 and 3.8% (21,300) in 1986, after virtually no change in 1983. The growth from 1983 to 1986 occurred mainly in the insurance agencies and real estate industry (27,200, 18.8%), and banks and other deposit-accepting establishments (28,000, 12.8%). Together, they accounted for 93.5% of the growth in finance, insurance and real estate.

L'emploi dans les finances, assurances et affaires immobilières s'est accru de 3.5% (18,000) en 1984, 3.9% (20,600) en 1985 et 3.8% (21,300) en 1986, après n'avoir subi à peu près aucun changement en 1983. La croissance entre 1983 et 1986 s'est produite surtout chez les agences d'assurances et d'affaires immobilières (27,200, 18.8%), et chez les banques et autres établissements de dépôts (28,000, 12.8%). Ensemble, ces groupes figuraient pour 93.5% de la croissance dans cette branche d'activité.

Public administration employment was relatively stable over the four-year period. After a gain of 1.3% (8,400) in 1983, employment levels increased by only 0.5% (3,100) in 1984, 0.6% (4,000) in 1985, and 0.6% (4,200) in 1986.

L'emploi dans l'administration publique a été relativement stable durant la période de quatre ans. Après un gain de 1.3% (8,400) en 1983, le niveau d'emploi n'a augmenté que de 0.5% (3,100) en 1984, 0.6% (4,000) en 1985, et 0.6% (4,200) en 1986.

And finally, employment in transportation, communications and other utilities declined substantially in 1983, dropping by 2.7% (-21,600). A slight recovery followed in 1984 and 1985, however, with increases of 1.2% (9,800) and 1.0% (8,000) respectively. In 1986, employment again declined marginally, 0.7% (-5,500).

L'emploi dans les transports, communications et autres services publics a accusé une baisse de 2.7% (-21,600) en 1983. Il s'est toutefois relevé légèrement en 1984 et 1985, de 1.2% (9,800) et de 1.0% (8,000) respectivement. En 1986, il a encore baissé un peu, de 0.7% (-5,500).

**Goods-Producing Industries**

**Secteur des biens**

All goods-producing industries suffered a weak post-recession employment recovery. The 1986 employment levels were still significantly below those of 1981. In 1986, there were 152,100 fewer workers in manufacturing; 37,000 fewer workers in mining; 33,200 fewer workers in construction; and 24,700 fewer workers in forestry. In relative terms, losses over the five years were considerably larger in forestry (-33.0%) and mining (-20.2%) than in construction (-7.7%) and manufacturing (-8.0%).

Les industries du secteur des biens n'ont connu qu'une faible reprise de l'emploi après la récession. Les niveaux d'emploi de 1986 sont demeurés sensiblement inférieurs à ceux de 1981. En 1986, il y avait 152,100 emplois de moins dans l'industrie manufacturière, 37,000 de moins dans l'industrie minière, 33,200 de moins dans la construction et 24,700 de moins dans l'exploitation forestière. En proportion, les pertes sur la période de cinq ans ont été considérablement plus importantes dans l'exploitation forestière (-33.0%) et l'industrie minière (-20.2%) que dans la construction (-7.7%) et l'industrie manufacturière (-8.0%).

Manufacturing as a whole showed no employment growth during the first year of the economic recovery, followed by a decline of 2.6% (-43,800) in 1984. Employment then began to recover, by 2.0% (34,200) in 1985 and 2.1% (35,300) in 1986. Although manufacturing as a whole was characterized by sluggish growth, a few industries within the manufacturing group experienced strong growth over the three years. Transportation equipment industries gained 23,800 jobs (14.6%), with most of these concentrated in automotive

L'industrie manufacturière dans l'ensemble n'a enregistré aucune progression de l'emploi durant la première année de la reprise économique, suivie d'une régression de l'emploi de 2.6% (-43,800) en 1984. Il a ensuite commencé à remonter, de 2.0% (34,200) en 1985 et de 2.1% (35,300) en 1986. Même si, dans l'ensemble, l'industrie manufacturière a été caractérisée par une croissance difficile, quelques branches ont toutefois connu une forte croissance durant ces trois années. La fabrication d'équipement de transport a gagné 23,800 emplois (14.6%), dont la plupart étaient

industries such as motor vehicle manufacturers (5,200, 11.6%), motor vehicle parts and accessories manufacturers (6,500, 11.4%) and truck body and trailer manufacturers (2,400, 20.4%). Employment also grew in the electrical product industries (9,200, 8.9%) during this period.

concentrés dans l'industrie automobile, notamment les fabricants de véhicules automobiles (5,200, 11.6%), les fabricants de pièces et accessoires de véhicules automobiles (6,500, 11.4%) et les fabricants de camions et remorques (2,400, 20.4%). L'emploi a augmenté également chez les fabricants de produits électriques (9,200, 8.9%) durant cette période.

Employment in the construction industry experienced a substantial loss of 7.1% (-26,400) during 1983. But after showing little change in 1984, it had a strong recovery of 12.2% (41,800) in 1985, followed by a more modest gain of 3.0% (11,400) in 1986.

L'emploi dans la construction a subi une perte énorme de 7.1% (-26,400) durant 1983. Après avoir peu varié en 1984, il a cependant réalisé une forte reprise de 12.2% (41,800) en 1985, suivie d'un gain plus modeste de 3.0% (11,400) en 1986.

In mining, employment growth has been virtually non-existent during the recovery period. The level showed a marginal decline (-1,200, -0.8%) between 1983 and 1986. The employment picture in the forestry industry was even bleaker over the post-recession period. The 1986 level was 11.2% (-6,300) below that of 1983. Job losses were recorded in three out of the four years -- 9.3% (-5,800) in 1983, 3.5% (-2,000) in 1985 and 9.1% (-5,000) in 1986 -- with only a marginal gain of 1.5% (900) in 1984.

Dans l'industrie minière, la croissance de l'emploi a été à peu près inexistante durant la période de reprise. Le niveau a légèrement baissé (-1,200, -0.8%) entre 1983 et 1986. Dans l'industrie forestière la situation de l'emploi a même été plus sombre durant la période qui a suivi la récession. Le niveau de 1986 était de 11.2% (-6,300) inférieur à celui de 1983. Des pertes d'emplois ont été enregistrées pour trois des quatre années, soit 9.3% (-5,800) en 1983, 3.5% (-2,000) en 1985 et 9.1% (-5,000) en 1986; il ne s'est produit qu'une légère augmentation de 1.5% (900) en 1984.

## EMPLOYMENT BY PROVINCE

Employment growth varied considerably among the provinces over the post-recession period, reflecting differences in the industrial mix of the provincial economies, as well as the character and timing of this recovery.

During 1984, employment growth occurred in Nova Scotia, Quebec, Ontario, Saskatchewan, Yukon and the Northwest Territories. In Newfoundland and Alberta, employment levels registered declines. The remaining provinces experienced little

## EMPLOI PAR PROVINCE

La croissance de l'emploi a varié considérablement selon la province durant la reprise, reflétant les différences provinciales au chapitre de la structure économique ainsi que le caractère et le moment de cette reprise.

Durant 1984, l'emploi s'est accru en Nouvelle-Écosse, au Québec, en Ontario, en Saskatchewan, au Yukon et dans les Territoires du Nord-Ouest. À Terre-Neuve et en Alberta les niveaux d'emploi ont diminué, et dans le reste des provinces ils n'ont guère varié. En

or no change. In absolute terms, Ontario had the largest share of employment growth (50,200), followed by Quebec (21,400) and Nova Scotia (7,600). In relative terms, however, the highest growth rate occurred in Yukon (5.3%), followed by the Northwest Territories (4.6%) and Nova Scotia (3.2%).

Employment growth was strong and widespread in 1985. Increases were posted everywhere except Prince Edward Island, where the employment level remained unchanged, and Yukon, where it declined. In absolute terms, Ontario ranked first (135,600), followed by Quebec (87,100) and Alberta (62,200). But, Alberta had the highest growth rate (7.7%), followed by Quebec (4.1%) and New Brunswick (3.8%).

Compared to 1985, most 1986 provincial growth rates were down, in line with the national trend. Job losses were even recorded in Alberta (-13,900, -1.6%), while the Northwest Territories (-100, -0.4%) and Newfoundland (500, 0.4%) showed little change. Still, some provinces showed strong growth: between 1985 and 1986, the growth rate increased from 0.6% to 4.3% in Prince Edward Island; from 1.9% to 3.4% in Manitoba; and from -4.7% to 9.6% in Yukon. In absolute terms, Ontario again had the largest share of the employment growth (124,600), followed by Quebec (37,900).

Over the full post-recession period -- from 1983 to 1986 -- the highest growth rates were recorded in Ontario (8.9%), Nova Scotia (7.2%) and Quebec (6.9%). Of course, provinces and territories with a small employment base will show a substantial rate of change in employment with only a slight fluctuation in the

chiffres absolus, l'Ontario affiche la plus grande part de la croissance de l'emploi (50,200), suivie du Québec (21,400) et de la Nouvelle-Écosse (7,600). En chiffres relatifs, cependant, c'est le Yukon qui a enregistré le taux de croissance le plus élevé (5.3%), suivi des Territoires du Nord-Ouest (4.6%) et de la Nouvelle-Écosse (3.2%).

La croissance de l'emploi a été forte et généralisée en 1985. Des hausses ont été enregistrées partout à l'exception de l'Île-du-Prince-Édouard, où le niveau d'emploi est demeuré inchangé, et du Yukon, où il a diminué. En chiffres absolus, l'Ontario se situait au premier rang (135,600), suivie du Québec (87,100) et de l'Alberta (62,200). Cependant, l'Alberta a enregistré le taux de croissance le plus élevé (7.7%), suivi du Québec (4.1%) et du Nouveau Brunswick (3.8%).

Comparativement à 1985, la plupart des taux de croissance provinciaux ont diminué en 1986, suivant ainsi la tendance nationale. Des pertes d'emploi ont été enregistrées en Alberta (-13,900, -1.6%), tandis que le niveau est resté assez stable dans les Territoires du Nord-Ouest (baisse de 100 ou 0.4%) et à Terre-Neuve (augmentation de 500 ou 0.4%). Dans certaines provinces on a observé toutefois une forte tendance à la hausse du taux de croissance de l'emploi. Entre 1985 et 1986, celui-ci est passé de 0.6% à 4.3% à l'Île-du-Prince-Édouard, de 1.9% à 3.4% au Manitoba et de -4.7% à 9.6% au Yukon. En chiffres absolus, c'est encore l'Ontario qui affiche la plus grande part de la croissance de l'emploi (124,600), suivie du Québec (37,900).

Durant la période qui a suivi la récession, c'est-à-dire de 1983 à 1986, l'Ontario a connu le taux de croissance le plus élevé (8.9%), suivie de la Nouvelle-Écosse (7.2%) et du Québec (6.9%). Fait à remarquer, les provinces et territoires où la base d'emploi est faible affichent un taux de croissance considérable à la suite d'une légère

number of workers. For example, an increase of 700 jobs in the Northwest Territories between 1984 and 1985 represented a growth rate of 3.7%. Similarly, an addition of 800 jobs in Yukon from 1985 to 1986 meant an increase of 9.6%. Prince Edward Island's larger employment base meant that a 4.3% increase from 1985 to 1986 added 1,300 jobs. And a 1.4% increase in the same period in New Brunswick represented a boost of 2,800 jobs.

fluctuation seulement du nombre de travailleurs. Par exemple, une augmentation de 700 emplois dans les Territoires du Nord-Ouest entre 1984 et 1985 représentait un taux de croissance de 3.7%. Pareillement, un ajout de 800 emplois au Yukon entre 1985 et 1986 s'est traduit par une augmentation de 9.6%. À l'Île-du-Prince-Édouard, où la base d'emploi est plus importante, une augmentation de 4.3% entre 1985 et 1986 a signifié 1,300 emplois de plus, et une progression de 1.4% au Nouveau Brunswick durant la même période a représenté une augmentation de 2,800 emplois.

From 1983 to 1986 employment growth in absolute terms occurred mainly in Ontario (310,300) and Quebec (146,500). Together, the two provinces accounted for 76.7% of total employment growth, even though they represented 65.5% of the total number of employed in 1983. In both provinces, growth over this period was not widespread but rather limited to a small group of industries.

Entre 1983 et 1986, la croissance de l'emploi en chiffres absolus s'est produite surtout en Ontario (310,300) et au Québec (146,500). Ensemble, les deux provinces intervenaient pour 76.7% de la croissance de l'emploi total, même si elles représentaient 65.5% du nombre total des personnes occupées en 1983. La croissance dans ces deux provinces durant cette période s'est limitée essentiellement à un petit groupe d'activités économiques.

In Ontario, high-growth industries were services to business management (38,000), accommodation and food services (40,300), furniture and appliance stores (10,100), insurance and real estate industries (20,600), banks and other deposit accepting establishments (17,200), and motor vehicle and motor vehicle parts and accessories manufacturers (11,100). During the same period, a substantial loss was recorded in retail apparel and shoe stores (-6,400).

En Ontario, les branches d'activité à forte croissance ont été les services aux entreprises (38,000), l'hébergement et la restauration (40,300), les magasins de meubles et d'appareils ménagers (10,100), les assurances et affaires immobilières (20,600), les banques et autres établissements de dépôts (17,200), et les fabricants de véhicules automobiles et de pièces et accessoires d'automobiles (11,100). Durant la même période, une perte considérable a été enregistrée par les commerces de chaussures et de vêtements (-6,400).

In Quebec, much of the employment growth came from retailers of automotive products (15,200), services to business management (15,000), accommodation and food services (25,200) and transportation equipment manufacturers (4,900).

Au Québec, une grande partie de la croissance de l'emploi provient des détaillants de produits automobiles (15,200), des services aux entreprises (15,000), de l'hébergement et la restauration (25,200), et des fabricants d'équipement de transport (4,900).

## AVERAGE WEEKLY EARNINGS

Average weekly earnings are derived by dividing the total weekly payroll, including overtime, by the number of employees on the payroll during the reference week, regardless of the hours worked. Employees on paid absences in the reference week are also included in the calculation.

During the post-recession period, average weekly earnings in current dollars for all payroll employees continued to grow, albeit at a diminishing rate: 7.0% in 1983, 4.3% in 1984, 3.5% in 1985 and 2.8% in 1986. Only forestry, construction and mining were strikingly different. The growth rate for earnings in forestry fell from 13.1% in 1983 to 4.9% in 1984, and then to 0.6% in 1985. However, the rate rose to 3.9% in 1986. In construction, the growth rate fell from 6.8% in 1983 to only 1.1% in 1984; in 1985, this downward trend was reversed as the rate increased to 2.8%, although it dropped again to 1.1% in 1986. The rate for mining increased from 5.4% in 1983 to 6.7% in 1984, but then fell to 5.0% in 1985 and 1.9% in 1986.

Average weekly earnings in constant 1981 dollars,[5] on the other hand, showed a downward trend for all employees. After posting a 1.1% gain in 1983, earnings in constant dollars experienced no growth in 1984 and actually declined by 0.5% in 1985, and by 1.3% in 1986.

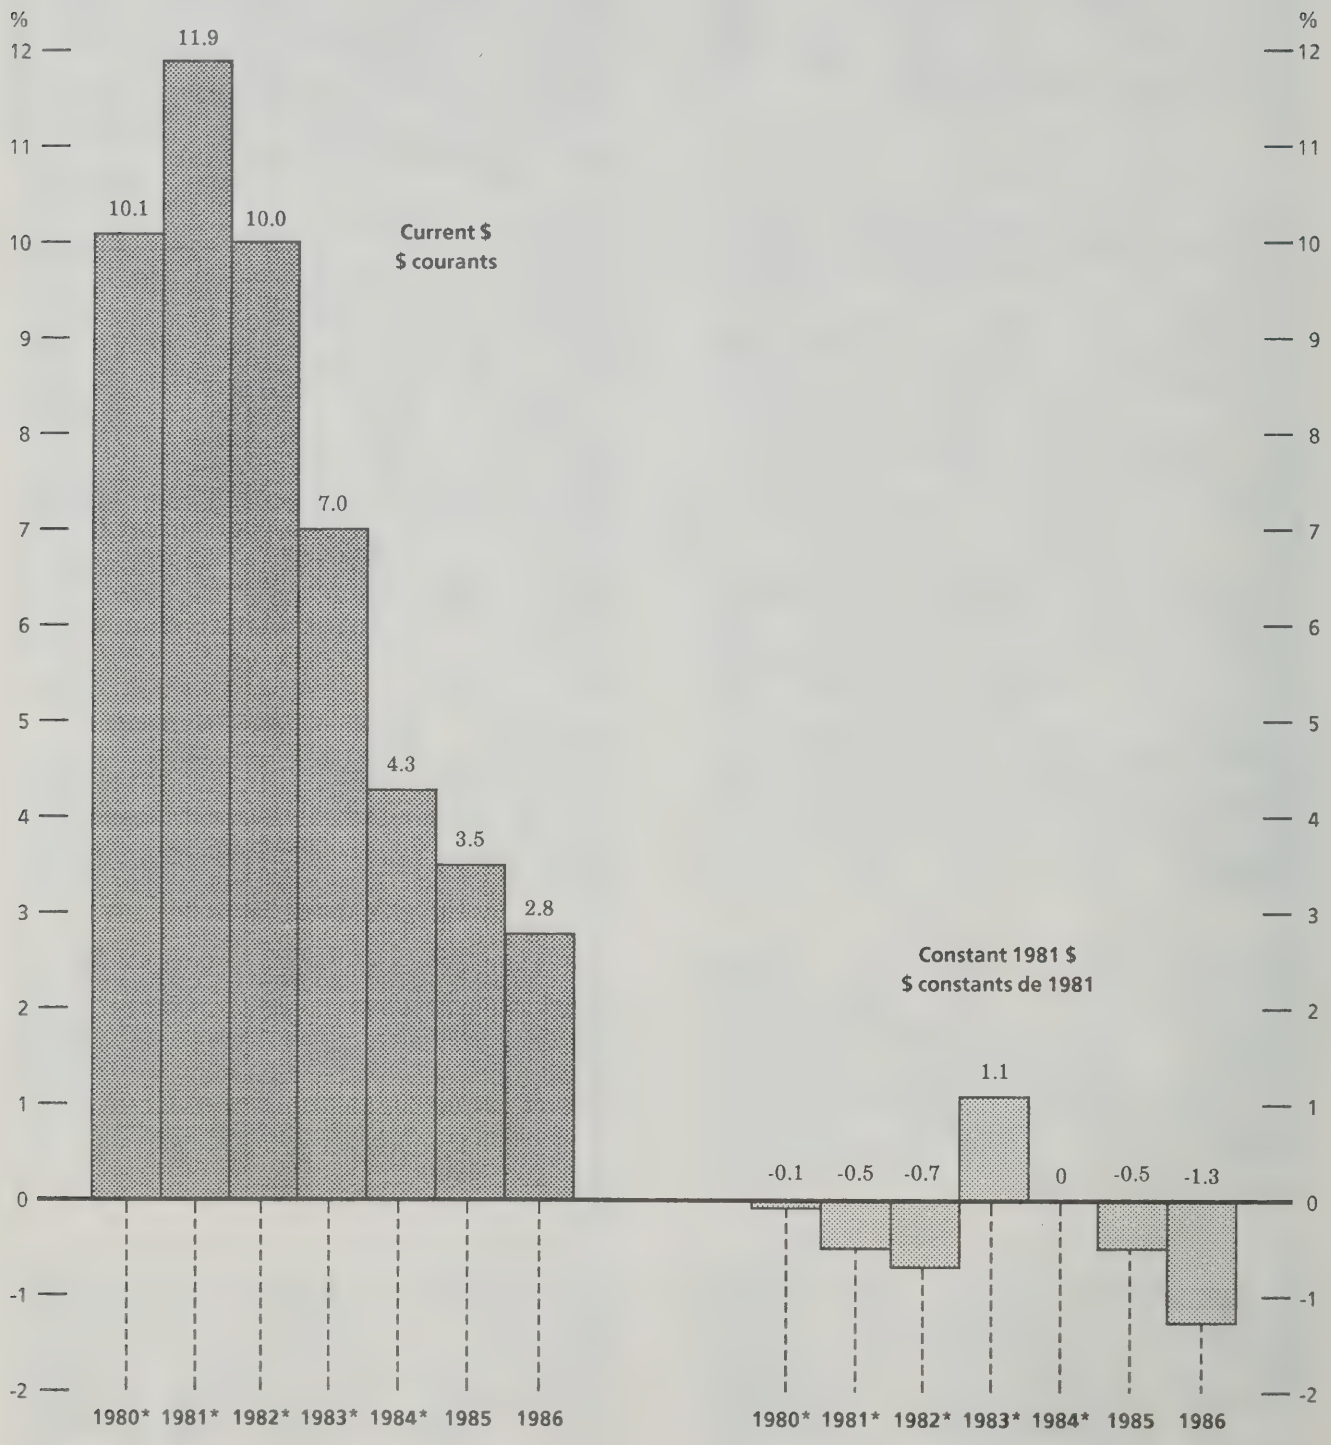
In the service sector, real earnings during the post-recession period showed gains for finance, insurance and real estate (3.5%), and transportation, communications and other utilities (2.3%). On the other hand, earnings for community, business and

## GAINS HEBDOMADAIRES MOYENS

Les gains hebdomadaires moyens sont obtenus en divisant le total des salaires hebdomadaires, y compris la rémunération des heures supplémentaires, par le nombre de salariés durant la semaine de référence, quel que soit le nombre d'heures travaillées. Les personnes en congé rémunéré durant la semaine de référence sont également prises en compte dans le calcul.

Durant la période qui a suivi la récession, les gains hebdomadaires moyens en dollars courants pour l'ensemble des salariés ont continué d'augmenter, mais à un taux décroissant: 7.0% en 1983, 4.3% en 1984, 3.5% en 1985 et 2.8% en 1986. Seules l'exploitation forestière, la construction et l'industrie minière affichaient des taux remarquablement différents. Le taux de croissance des gains dans l'exploitation forestière est tombé de 13.1% en 1983 à 4.9% en 1984, puis à 0.6% en 1985. Il a cependant remonté à 3.9% en 1986. Dans la construction, le taux de croissance a chuté de 6.8% en 1983 à 1.1% seulement en 1984; en 1985, cette tendance à la baisse s'est renversée et le taux est monté à 2.8%, pour retomber toutefois à 1.1% en 1986. Le taux est monté pour l'extraction minière, passant de 5.4% en 1983 à 6.7% en 1984, pour ensuite tomber à 5.0% en 1985 et à 1.9% en 1986.

Les gains hebdomadaires moyens en dollars constants de 1981[5], par ailleurs, affichent une tendance à la baisse pour l'ensemble des employés. Après une progression de 1.1% en 1983, les gains en dollars constants n'ont pas augmenté en 1984, et ils ont en fait diminué de 0.5% en 1985, et de 1.3% en 1986.



Dans le secteur des services, les gains réels après la récession, ont connu une hausse dans les finances, assurances et affaires immobilières (3.5%), et dans les transports, communications et autres services publics (2.3%). D'autre part, les gains pour les services

Graphique – 5

* Linked data
* Données raccordées

personal services declined during this period (-3.8%). For trade and public administration, the data from 1983 to 1986 show marginal declines (-0.6% and -1.5% respectively).

In the goods-producing sector, real earnings increased slightly for manufacturing (1.6%) and mining (1.0%) in the post-recession period. In fact, manufacturing showed gains in real earnings except in 1986, when a marginal decline was recorded (-0.8%). Substantial earnings losses, however, occurred in construction (-7.0%) and forestry (-3.3%) during the recovery period.

Average weekly earnings vary from industry to industry and between salaried employees and hourly paid workers. This reflects various combinations of hours worked and pay rates. In some industries, for example, much of the employment consists of part-time and low-wage jobs. In others, however, because of the nature and location of the jobs, both pay rates and hours worked are well above the national average. In current dollars, mining industry workers consistently had the highest earnings: $622.98 per week in 1983, $664.56 in 1984, $697.90 in 1985 and $711.05 in 1986. During the same four-year period, workers in the trade industry had the lowest earnings: $282.77, $293.64, $304.28, and $317.50, respectively. Differences in average earnings were also substantial within some industries. For example, within trade in 1986, earnings of workers in motor vehicles and accessories wholesale trade were $428.43, compared to $256.99 for those employed in retail drug stores. In the service-producing sector, salaried employees on the whole earned more than hourly paid workers. In the goods-producing sector,

communautaires, commerciaux et personnels ont connu une baisse au cours de cette période (-3.8%). Les données de 1983 à 1986 pour le commerce et l'administration publique ont connu une légère baisse (-0.6% et -1.5% respectivement).

Dans le secteur des biens, les gains réels ont connu une légère augmentation dans l'industrie manufacturière (1.6%) et minière (1.0%) après la récession. En fait, l'industrie manufacturière a connu une hausse des gains réels, sauf en 1986, alors qu'une baisse légère était enregistrée (-0.8%). Cependant, d'importantes pertes de revenu ont été enregistrées dans la construction (-7.0%) et l'industrie forestière (-3.3%) au cours de la reprise.

Les gains hebdomadaires moyens varient d'une branche d'activité à l'autre et entre les employés et les ouvriers. Ce fait est attribuable à diverses combinaisons d'heures travaillées et de taux de salaire. Dans certaines branches d'activité, par exemple, une grande partie des effectifs travaillent à temps partiel et sont peu rémunérés. Dans d'autres, par contre, en raison de la nature et de la localisation des emplois, les taux de salaire et les heures travaillées sont nettement supérieurs à la moyenne nationale. En dollars courants, les travailleurs de l'industrie minière ont constamment affiché les gains les plus élevés: $622.98 par semaine en 1983, $664.56 en 1984, $697.90 en 1985 et $711.05 en 1986. Durant la même période de quatre ans, les travailleurs du commerce ont réalisé les gains les plus faibles: $282.77, $293.64, $304.28 et $317.50 respectivement. Les différences dans les gains moyens étaient aussi très marquées à l'intérieur de certaines branches d'activité. Par exemple, dans le commerce en 1986, les gains étaient de $428.43 pour les travailleurs chez les grossistes en véhicules automobiles et accessoires comparativement à $256.99 pour ceux employés chez les détaillants

however, salaried employees earned less than hourly paid workers, except in manufacturing.

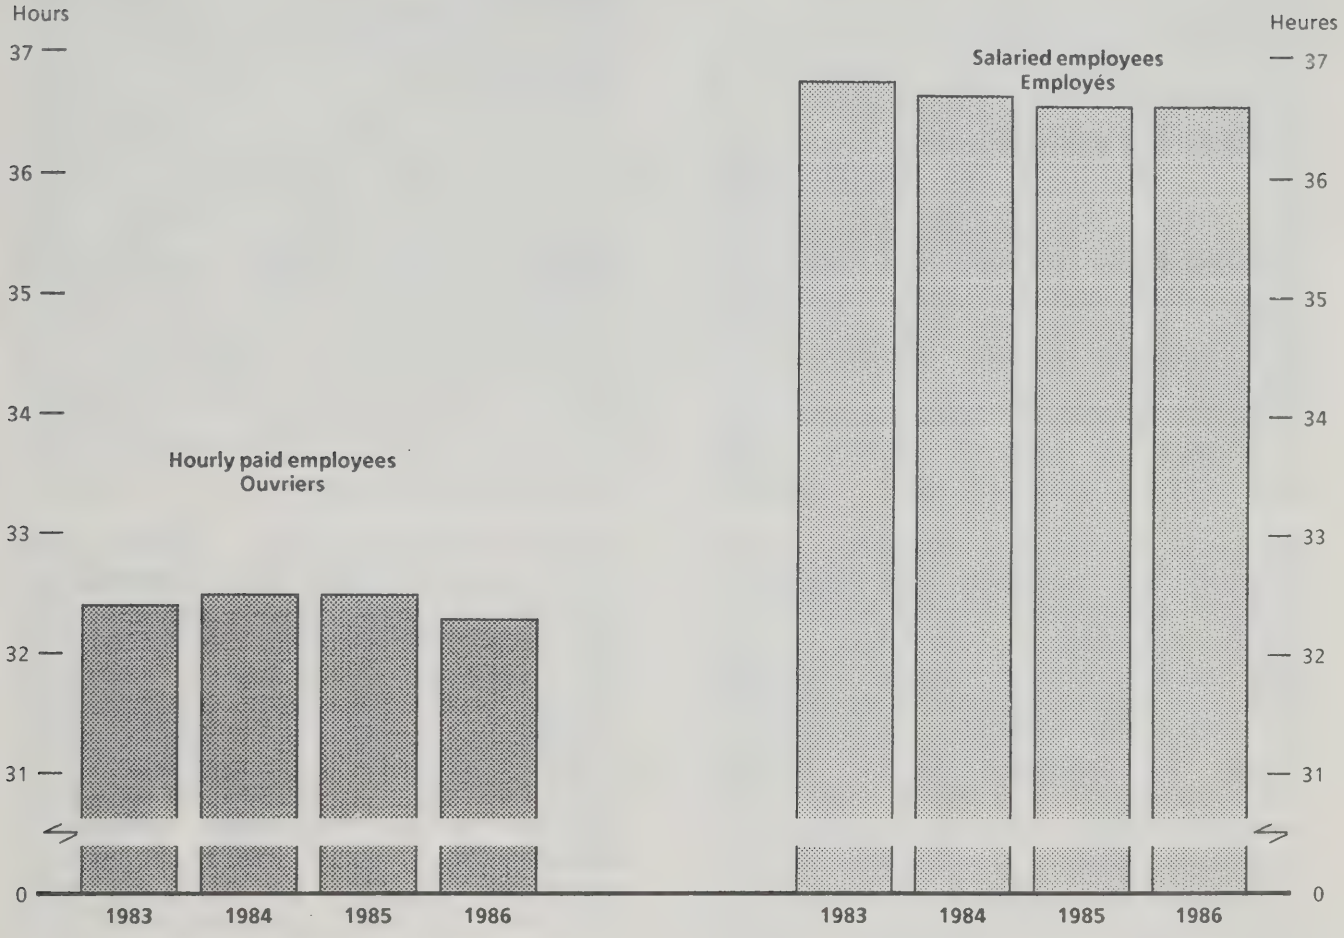
de produits pharmaceutiques. Dans le secteur des services, les employés étaient dans l'ensemble mieux rémunérés que les ouvriers. Dans le secteur des biens, cependant, les employés gagnaient moins que les ouvriers, sauf dans l'industrie manufacturière.

By region, the data show that in current dollars the earnings of workers in the Northwest Territories were the highest in Canada during the period 1983 to 1986: $533.56, $564.89, $572.07 and $581.65, respectively. Prince Edward Island workers had the lowest earnings during the same period: $314.92, $324.41, $338.97, and $348.30, respectively. Ontario workers had the largest earnings gain over the four year-period (13.9%), followed closely by workers in Nova Scotia (13.8%) and New Brunswick (13.2%). The smallest growth occurred among workers in British Colombia (4.4%) and Alberta (4.6%).

Par région, les données montrent qu'en dollars courants les gains des travailleurs des Territoires du Nord-Ouest étaient les plus élevés au Canada durant la période de 1983 à 1986: $533.56, $564.89, $572.07 et $581.65 respectivement. Les travailleurs de l'île-du-Prince-Édouard ont réalisé les gains les plus faibles durant la même période: $314.92, $324.41, $338.97 et $348.30 respectivement. Les travailleurs de l'Ontario ont affiché la plus forte croissance sur la période de quatre ans (13.9%), suivis de près par ceux de la Nouvelle-Écosse (13.8%) et du Nouveau-Brunswick (13.2%). La plus faible croissance s'est produite chez les travailleurs de la Colombie-Britannique (4.4%) et de l'Alberta (4.6%).

## AVERAGE WEEKLY HOURS

Average weekly hours[6] are obtained by dividing the total hours worked during the reference week by the number of employees on the payroll. Employees on paid absences are also included in the calculation if they are on the payroll during the reference week. Small changes in average hours may represent significant changes in quantity of labour input. For example, assume that 60,000 employees in a plant work an average of 32 hours per week. If every employee worked an extra hour in a given week, it would result in a three percent increase in labour input -- the equivalent of an additional 60,000 hours or 1,900 workers. Changes in labour input do not necessarily imply immediate changes in employment levels. But as the hours worked by individual workers approach economic or institutional



## HEURES HEBDOMADAIRES MOYENNES

Les heures hebdomadaires moyennes[6] sont obtenues en divisant le nombre total d'heures durant la semaine de référence par le nombre de salariés. Les personnes en congé rémunéré sont également prises en compte dans le calcul si elles figuraient sur la liste du personnel durant la semaine de référence. De faibles variations dans les heures moyennes peuvent représenter des variations importantes dans l'apport en main-d'oeuvre. Par exemple, supposons que 60,000 personnes dans une usine travaillent en moyenne 32 heures par semaine. Si chaque personne travaillait une heure supplémentaire dans une semaine donnée, il en résulterait une hausse de 3% de l'apport en main-d'oeuvre -- soit l'équivalent de 60,000 heures additionnelles ou 1,900 travailleurs. Des variations des apports en main-d'oeuvre ne se traduisent pas immédiatement par des variations des

## Heures hebdomadaires moyennes des ouvriers et des employés, Canada, 1983-1986

constraints, additional workers will be hired and the employment level will rise accordingly.

niveaux d'emploi. Mais dans la mesure où les heures travaillées par les travailleurs individuels s'approchent des contraintes économiques ou institutionnelles, des travailleurs supplémentaires seront embauchés et le niveau d'emploi sera relevé en conséquence.

Average weekly hours for both salaried employees and workers paid an hourly wage showed little change during the post-recession period. For workers paid by the hour, average hours were 32.4 in 1983, increasing slightly to 32.5 in 1984 and 1985, then declining to 32.3 in 1986. For salaried employees the hours also declined marginally over the period, from 36.8 in 1983 to 36.7 in 1984 then to 36.6 in 1985 and 1986.

Les heures hebdomadaires moyennes tant pour les employés que pour les ouvriers n'ont guère varié durant la période qui a suivi la récession. Chez les ouvriers, le nombre moyen d'heures était de 32.4 en 1983 et a légèrement augmenté à 32.5 en 1984 et 1985 pour ensuite tomber à 32.3 en 1986. Chez les employés, le nombre d'heures a aussi diminué un peu durant la période, passant de 36.8 en 1983 à 36.7 en 1984 puis à 36.6 en 1985 et 1986.

At the industry division level, average hours showed no significant changes except for workers paid an hourly wage in mining and manufacturing. In mining, average weekly hours showed a large decline of 1.0 hour in 1983, but increased by 0.7 of an hour in 1984 and showed little change in 1985 and 1986. Average weekly hours in manufacturing rose substantially in 1983, by 0.8 of an hour, but showed little change thereafter.

Au niveau des branches d'activité, les heures moyennes n'ont pas sensiblement varié sauf pour les ouvriers de l'extraction minière et de l'industrie manufacturière. Dans l'extraction minière, les heures hebdomadaires moyennes ont connu une baisse importante de 1.0 en 1983, et ont augmenté de 0.7 heure en 1984, et n'ont peu varié en 1985 et 1986. Dans l'industrie manufacturière, elles ont connu une importante hausse de 0.8 heure en 1983, mais n'ont guère varié par la suite.

Data at a more detailed industry level show significant changes in average hours as various industries adjusted to economic conditions in the post-recession period. For example, between 1984 and 1985, hourly paid workers in motor vehicle manufacturing had an average of 2.2 hours added to their work week, then lost 1.4 hours in 1986. During the same period, the average hours of hourly paid workers in furniture and appliance retail stores dropped by 1.5 hours per week between 1984 and 1985 then by 0.9 of an hour in 1986.

À un niveau d'activité économique plus détaillé, les données révèlent des variations importantes des heures moyennes à mesure que les diverses branches d'activité s'adaptaient à la conjoncture économique de la période postérieure à la récession. Par exemple, entre 1984 et 1985, les ouvriers chez les fabricants de véhicules automobiles ont vu leur semaine de travail s'allonger en moyenne de 2.2 heures, puis se rétrécir de 1.4 heure en 1986. Durant la même période, les heures moyennes des ouvriers chez les détaillants de meubles et d'appareils ménagers ont chuté de 1.5 par semaine entre 1984 et 1985 et de 0.9 heure en 1986.

Salaried employees in Quebec consistently worked fewer hours per week than those in other regions. The Quebec weekly average ranged from 35.6 to 35.9 hours. Salaried employees in New Brunswick, Yukon and the Northwest Territories, working between 38.2 and 38.6 hours per week, had the highest average hours during this period.

For hourly paid workers, those in Saskatchewan had the lowest average hours throughout the period (between 29.3 and 29.7), while the highest averages were in Newfoundland and the Northwest Territories (between 33.6 and 35.5).

## SUMMARY

This article has presented a few highlights of the data available from the Survey of Employment, Payrolls and Hours. Since SEPH provides estimates by detailed industry, users can monitor and analyze such labour components as the number of salaried and hourly-paid employees, hours worked and the value of labour in a particular industry. In future studies, detailed data by industry and geographic region will be explored more fully.

Les employés au Québec travaillaient constamment un nombre d'heures par semaine moins élevé que ceux des autres régions. La moyenne hebdomadaire dans cette province se situait entre 35.6 et 35.9 heures. Les employés du Nouveau-Brunswick, du Yukon et des Territoires du Nord-Ouest, qui travaillaient entre 38.2 et 38.6 heures par semaine, avaient les heures moyennes les plus élevées durant cette période.

Pour ce qui concerne les ouvriers, ceux de la Saskatchewan ont eu les heures moyennes les plus faibles durant toute la période (entre 29.3 et 29.7), et ceux de Terre-Neuve et des Territoires du Nord-Ouest les moyennes les plus élevées (entre 33.6 et 35.5).

## RÉSUMÉ

Le présent article a fait ressortir certaines des données qu'offre l'enquête sur l'emploi, la rémunération et les heures. Comme l'EERH fournit des estimations selon des ventilations détaillées par branche d'activité, les utilisateurs peuvent observer et analyser des composantes du travail telles que le nombre de salariés et d'ouvriers, les heures travaillées, et la valeur du travail dans une branche particulière. Dans des études ultérieures, les données détaillées par branche d'activité et par région géographique seront explorées plus à fond.

A large number of tables were used in this study and have not been included here because of limited space. Additional data, however, are available upon request from the author.

Un nombre important de tableaux a servi à cette étude mais n'apparaissent pas ici en raison de l'espace restreint. D'autres données sont disponibles et peuvent être obtenues en communiquant avec l'auteur.

6. Aggregate average weekly hours include overtime. For salaried employees, the hours reported are the standard scheduled hours.

NOTES

1. Voir Moloney, "Tendances récentes de l'emploi selon la branche d'activité, Canada et les provinces" dans le numéro de novembre 1986 de **La population active** (n° 71-001 au catalogue de Statistique Canada), novembre 1986.

2. Les données raccordées sont tirées de l'**Aperçu économique trimestriel: supplément statistique** (n° 13-007F au catalogue de Statistique Canada). Une description du raccordement des séries se trouve à l'annexe de cet article.

3. Le produit intérieur réel brut est la valeur de l'ensemble des biens et services produits au Canada en prix constants. Pour plus de renseignements sur la périodicité des cycles d'affaire, voir l'article de Philip Cross "Les cycles d'affaires au Canada, 1950-1981" dans **La conjoncture économique,** (n° 13-004 au catalogue de Statistique Canada), mars 1982.

4. Voir **Produit intérieur brut par industrie** (n° 61-005 au catalogue de Statistique Canada), mars 1983.

5. Les gains hebdomadaires moyens en dollars constants de 1981 représentent les gains hebdomadaires en dollars courants, ajustés par l'indice des prix à la consommation, où 1981=100.

6. Les heures hebdomadaires moyennes agrégées comprennent les heures supplémentaires. Les heures déclarées pour les employés sont les heures de l'horaire régulier.

## APPENDIX

## LINKED DATA SERIES

At the moment, the SEPH time series is rather short because the survey began only in March 1983. Seasonally adjusted data are not available since, in general, at least five years of data are required to establish a reliable series. Many users, however, need longer time series for historical analysis and analysis that require seasonally adjusted data. To meet these needs, a limited number of major series have been linked to those from former surveys, and the data seasonally adjusted.

"Linking" connects data series from two different time periods to produce one continuous series. The data series may be from two different surveys or from a continuing survey which has undergone substantial revision. The process may be complex or just a simple constant correction factor.

Prior to its introduction, SEPH had a six-month trial period (October 1982 to March 1983), overlapping its predecessor surveys. Linkage factors for each series were obtained by calculating monthly ratios of SEPH to predecessor survey data for the six months. After removing highly irregular ratios, an average ratio for each series was derived from the remaining months. Because less than a year of overlap was available, it was not possible to investigate differences in seasonal patterns between these surveys.

## ANNEXE

## SÉRIES DE DONNÉES RACCORDÉES

À l'heure actuelle, la série chronologique de l'EERH est très courte étant donné que l'enquête n'a débuté qu'en mars 1983. Il n'existe pas de données désaisonnalisées parce qu'il faut généralement disposer de données sur cinq ans pour établir une série fiable. Bon nombre d'utilisateurs ont cependant besoin de séries chronologiques plus longues pour faire des analyses historiques et des analyses nécessitant des données désaisonnalisées. Pour répondre à ces besoins, un nombre limité de séries importantes ont été raccordées à celles des enquêtes précédentes, et les données ont été désaisonnalisées.

Le "raccordement" permet de lier des séries de données provenant de deux périodes différentes pour produire une série continue. Les séries de données peuvent provenir de deux enquêtes différentes ou d'une enquête continue qui a fait l'objet d'une révision en profondeur. Le processus peut être complexe ou consister en un simple facteur de correction constant.

Avant sa mise en marche, l'EERH était menée à l'essai pendant six mois (octobre 1982 à mars 1983) causant ainsi un chevauchement entre l'EERH et les enquêtes précédentes. Ce chevauchement a permi le raccordement de chaque série obtenu en calculant les ratios mensuels des données de l'EERH par rapport aux données des enquêtes qui l'ont précédée pour les six mois. Après avoir éliminé les ratios très irréguliers, on a établi un ratio moyen pour chaque série en fonction des mois restants. Comme la période de chevauchement était inférieure à un an, il n'a pas été possible d'étudier les différences dans les modalités saisonnières entre ces enquêtes.

TABLE 1. Estimated Number of Employees, Weekly Earnings and Weekly Hours, by Industry Division, Canada, 1979-1986, Annual Averages and Percentage Changes

| Industry (1970 SIC) | | Annual averages - Moyennes annuelles | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | 1979* | 1980* | 1981* | 1982* | 1983* | 1984* | 1983[1] | 1984 | 1985 | 1986 |

## CONCEPTS AND METHODS

### Objectives

The Survey of Employment, Payrolls and Hours is designed to measure, on a monthly basis, the levels and month-to-month trends of employment, paid hours and earnings. These measures are compiled at detailed industrial and geographic levels.

All industries are covered by the survey with the exception of agriculture, fishing and trapping, private household services, religious organizations, and military services.

### Source of Data

The statistics contained in this report are based on information obtained through a mail survey of firms, institutions and organizations of all sizes.

The **firm** is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but, in some cases, the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

### Industrial Classification

All **firms** are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The **establishment** (typically a factory, mine, store or a similar unit) is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into **reporting units** which, although not capable of reporting all basic industrial statistics, can report employment, payrolls and hours data for particular locations.

The industrial classification of the statistics contained in this report is based on the 1970 version of the Standard Industrial Classification. A description of the various industries and groups of industries is contained

## CONCEPTS ET MÉTHODES

### Objectifs

L'enquête sur l'emploi, la rémunération et les heures de travail a pour objet de mesurer mensuellement les niveaux et les tendances de l'emploi, des heures rémunérées et des gains. Ces mesures sont rassemblées à des niveaux détaillés selon l'activité économique et le lieu géographique.

L'enquête vise tous les secteurs de l'activité économique sauf l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

### Source des données

Les statistiques présentées dans ce bulletin se fondent sur des renseignements recueillis au moyen d'une enquête postale menée auprès des entreprises et autres organismes ou établissements de toutes tailles.

Le terme **entreprise** désigne toute entité commerciale ou industrielle constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme quelconque d'organisation, telle une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité.

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu par la Division des profils et du registre des entreprises de Statistique Canada.

### Classement par activité économique

Toutes les **entreprises** appartiennent à une branche d'activité économique déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un **établissement.** À des fins statistiques, on définit l'établissement (en général une usine, une mine, un magasin ou une unité semblable) comme la plus petite unité constituant un ensemble fonctionnel distinct capable de déclarer, à l'égard de l'activité économique, tous les éléments statistiques de base qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour obtenir des statistiques géographiques détaillées, souvent on subdivise l'établissement en **unités déclarantes** qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi, la rémunération et les heures de travail relativement à certains endroits.

Le classement des statistiques que nous présentons dans ce volume s'inspire de la Classification des activités économiques, de 1970. Vous trouverez une description de ces diverses activités et de leurs groupements dans le bulletin de la Classification

in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. Code" columns on the tables correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual":

a) Industrial aggregate (031-951) represents the sum of all the industries included in the survey (see Objectives).

b) Goods-producing industries (031-421) comprise forestry, mining, manufacturing and construction.

c) Service-producing industries (501 to 951) consist of transportation, communication and other utilities, trade, finance, insurance and real estate, services (except for religious organizations and private households), and public administration (with the exception of military personnel, and other government services).

d) Durable goods manufacturing (durable) includes wood industries (251-259), furniture and fixture industries (261-268), primary metal industries (291-298), metal fabricating industries except machinery and transportation equipment (301-309), machinery industries except electrical machinery (311-318), transportation equipment industries (321-329), electrical products industries (331-339), and non-metallic mineral products industries (351-359).

e) Non-durable goods manufacturing (non-dur) is the sum of food and beverage industries (101-109), tobacco products industries (151-153), rubber and plastic products industries (162-165), leather industries (172-179), textile industries (181-189), knitting mills (231-239), clothing industries (243-249), paper and allied industries (271-274), printing, publishing and allied industries (286-289), petroleum and coal products industries (365-369), chemical and chemical products industries (372-379), and miscellaneous manufacturing industries (391-399).

f) Building construction (404, 421) comprises building construction (404) and special-trade contractors (421).

g) Industrial and Heavy (Engineering) construction (406, 409) includes highway, bridge and street construction (406) and other construction (409).

h) Education services (809T) consist of kindergartens and nursery schools (801), elementary and secondary schools (802), schools of arts and performing arts (803), vocational centers, trade schools and business colleges (804), post-secondary non-university educational institutions (805), universities and colleges (806), and education and related services (809).

i) Public administration (909-951) contains only the establishments engaged in activities that are gov-

des activités économiques, n$^{o}$ 12-501 au catalogue. Les codes C.A.É. qui apparaissent dans les colonnes de certains tableaux de notre publication correspondent au codes de ce bulletin. Les tableaux en question renferment aussi les groupes suivants, qui ne figurent pas dans la Classification des activités économiques:

a) Ensemble des activités économiques (031-951) — Il s'agit de la somme des diverses activités économiques visées par l'enquête (voir objectifs).

b) Branche productrice de biens (031-421) — Ce groupe englobe les forêts, les mines, les manufactures et la construction.

c) Branche des services (501-951) — Englobe les transports, les communications et autres services publics, le commerce, les finances, assurances et affaires immobilières, les services (sauf les organismes religieux et les ménages privés), et l'administration publique (à l'exception du personnel militaire et des autres services gouvernementaux).

d) Fabrication des biens durables (durables) — Englobe les industries du bois (251-259), l'industrie du meuble et des accessoires d'ameublement (261-268), l'industrie de première transformation des métaux (291-298), l'industrie des produits métalliques (sauf les machines et le matériel de transport) (301-309), la fabrication des machines (sauf le matériel électrique) (311-318), l'industrie du matériel de transport (321-329), l'industrie des appareils et du matériel électriques (331-339) et l'industrie des produits minéraux non métalliques (351-359).

e) Fabrication des biens non durables (non dur.) — Englobe l'industrie des aliments et boissons (101-109), l'industrie du tabac (151-153), l'industrie du caoutchouc et des produits en matière plastique (162-165), l'industrie du cuir (172-179), l'industrie textile (181-189), la bonneterie (231-239), l'industrie de l'habillement (243-249), l'industrie du papier et des produits connexes (271-274), l'imprimerie, l'édition et industries connexes (286-289), l'industrie du pétrole, du charbon et de leurs dérivés (360-369), l'industrie chimique et des produits connexes (372-379), et les industries manufacturières diverses (391-399).

f) Bâtiment (404, 421) — Englobe la construction de bâtiments (404) et l'activité des entrepreneurs spécialisés (421).

g) Construction industrielle et lourde (travaux de génie) (406, 409) — Englobe la construction de routes, ponts et rues (406) et autres constructions (409).

h) Enseignement et services connexes (809T) — Englobe les jardins d'enfants et écoles maternelles (801), les écoles primaires et secondaires (802), les écoles de beaux-arts (803), les centres de formation professionnelle, écoles de métiers et collèges commerciaux (804), les établissements d'enseignement postsecondaire non universitaire (805), les universités et collèges (806), et l'enseignement et services connexes (809).

i) Administration publique (909-951) — Comprend les établissements dont les activités ont un caractère essentiellement

ernmental in character and those serving as internal service agencies of the public service. Government owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level.

gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics.

## Geographic Classification

Reporting units are assigned to a province, a census division, an economic region (for the province of Quebec and Ontario) and, where applicable, to a metropolitan or urban area. The survey selected metropolitan and urban areas as delineated for the 1981 Census of Population; these areas usually consist of the urban centre as well as the surrounding territory and had a population of 25,000 inhabitants or more. The reporting units not located in a tabulated urban area or not allocated to a compiled census division are included in the provincial and national totals.

A description of the various geographical areas is contained in the "Standard Geographical Classification Manual, 1981", Catalogue No. 12-567.

## Classement géographique

On attribue les unités déclarantes à une province, à une division de recensement, à une région économique (pour les provinces suivantes: Québec et Ontario) et, s'il y a lieu, à une région métropolitaine ou urbaine. Les régions métropolitaines et urbaines choisies pour l'enquête sont celles du recensement de la population de 1981; ces régions, qui se composent habituellement d'un centre urbain et du territoire environnant, comptaient lors du dernier recensement 25,000 habitants ou plus. Les unités déclarantes situées en dehors de toute région urbaine indiquée dans les tableaux, ou non attribuées à une division de recensement prise en compte, font partie des totaux provinciaux et nationaux.

La description des diverses régions géographiques se trouve dans la "Classification géographique type, 1981", numéro 12-567 au catalogue.

## Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are asked to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to **strikes,** unpaid holidays or other similar unpaid circumstances, the data reported are not representative of the last seven days of the month, adjustments are made to reflect the economic situation of the reference period (i.e. when a strike effects the last seven days of the survey month, the derived data will reflect the strike situation).

2. **Employee**

All persons drawing pay for services rendered or for paid absences and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form constitute employees.

## Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. Dans la pratique, peu d'entreprises tiennent des registres de paye pour cette période précise; on demande donc aux répondants de faire porter leur déclaration sur la(les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une **grève,** d'un congé non payé ou d'autres circonstances semblables, les données déclarées ne sont pas représentatives des sept derniers jours du mois, on procède aux rajustements qui s'imposent afin de traduire la situation qui régnait pendant la période de référence (cela signifie que lorsqu'une grève touche les sept derniers jours du mois d'enquête, les données qui en découlent reflètent l'état de grève).

2. **Salarié**

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada, est un salarié.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment) and casual or temporary employees (those who are hired for discontinuous periods or on an irregular basis). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, persons working outside Canada, military personnel and persons providing services to an establishment on a contract basis. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmen's Compensation or other related fund, etc.); however, employees paid from the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

Le terme "salariés" désigne les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires (ceux qui sont embauchés de façon irrégulière ou temporaire). Il désigne aussi les propriétaires, les administrateurs, les associés et les autres dirigeants actifs des entreprises constituées en corporation.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporation et ceux des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres des corps élus ou nommés, les personnes travaillant à l'extérieur du Canada, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (i.e. les personnes en grève, en congé non payé, celles recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'une caisse analogue, etc.); cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie, sont quand même considérés comme salariés.

The employees are classified into the following categories:

a) **Employees paid by the hour**
Any employee whose basic wage is expressed as an hourly rate.

b) **Salaried Employees**
Any employee whose basic remuneration is a fixed amount for a period of at least one week.

c) **Other Employees**
Those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.

d) **Non-teaching Staff**
All employees other than teachers and academic staff, i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (e.g. janitor, caretaker, bus driver, etc.)

e) **Teaching Staff**
Those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.

f) **Supply or Substitute Teachers**
Teachers who are called in to teach whenever their services are needed either to augment

Les salariés sont classés dans les catégories suivantes:

a) **Salariés rémunérés à l'heure**
Tout salarié dont la rémunération de base est calculée selon un taux horaire.

b) **Employés**
Tout salarié dont la rémunération de base constitue une somme fixe versée pour une période d'au moins une semaine.

c) **Autres salariés**
Tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de trajet, etc.

d) **Personnel non enseignant**
Tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économe, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel, le concierge, les chauffeurs d'autobus, etc.

e) **Personnel enseignant**
Tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.

f) **Suppléants ou remplaçants**
Enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le

the existing staff or as a short-term replacement for a full-time or part-time teacher.

3. **Earnings**

Earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc.

The payroll concept does not include supplementary labour costs such as employer's contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or director's fees.

a) **Gross Pay**
Gross pay includes salaries, straight-time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings **and** payments to persons absent with pay in the survey reference week.

b) **Overtime Pay**
All pay received for the number of hours worked in excess of the standard workday or workweek.

4. **Hours**

a) **Total hours paid**
All hours worked, including overtime hours, **plus** hours of paid absence (e.g. holidays, vacation, sick leave, jury duty, etc.)

b) **Overtime Hours**
The total hours for which overtime was paid. These represent the hours worked.

5. **Paid Absence**

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

6. **Standard Workweek**

The hours in the standard workweek constitute the average number of hours of work normally scheduled in a workweek.

personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

3. **Gains**

Les gains représentent la rémunération brute avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc.

Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents, ni les jetons de présence des administrateurs.

a) **Rémunération brute**
Comprend les salaires, les traitements à taux ordinaires, la rémunération du travail à la pièce et les commissions régulières, ainsi que les primes, indemnités de vie chère et autres gratifications versées régulièrement, les payes de surtemps **et** la rémunération des absences payées dans la semaine de référence de l'enquête.

b) **Rémunération du temps supplémentaire**
Ensemble de la rémunération versée pour le nombre d'heures de travail effectuées en sus de la journée ou de la semaine normale de travail.

4. **Heures**

a) **Nombre total d'heures payées**
Ensemble des heures travaillées, y compris les heures supplémentaires, **plus** les heures de congé (par ex., les jours fériés, les vacances, les congés de maladie, les congés pour service judiciaire, etc.)

b) **Heures supplémentaires**
Total des heures payées à un taux majoré; il s'agit d'heures réellement travaillées.

5. **Absence payée**

Les absences payées comprennent toutes les heures rémunérées dans le cas des jours fériés payés, des vacances, des congés de maladie, ainsi que des congés d'accident du travail et des congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire.

6. **Semaine normale de travail**

Les heures d'une semaine normale de travail reflètent la moyenne des heures de travail normalement fixées pour une semaine.

7. **Take-all and Take-some Units**

Take-all units are reporting units of firms or organizations which are included in the survey sample with certainty every month. These include:

a) All firms or organizations with 200 or more employees;

b) All firms with more than one reporting unit;

c) Firms which report their survey data on computer listings rather than on the standard questionnaire;

d) Units of government departments and crown corporations;

e) Units belonging to elementary and secondary schools;

f) Certain other pre-specified units or firms.

Take-some units are all the other firms in the universe which have a known probability of selection.

## Methodology

The statistics contained in this publication are based on information obtained through a sample survey of reporting units. The data is collected by means of questionnaires mailed monthly to a sample of about 70,000 reporting units selected out of a universe of about 700,000. The sample covers all industries in scope for the survey, all provinces and territories and all sizes of units. Both the universe and the sample are updated monthly for births and deaths.

### Stratification

For the determination of the survey sample size and for the purpose of the sample selection, the universe of reporting units is stratified by 12 provinces and territories, 16 industry groups and 4 size groups. (An industry group is slightly more detailed than the 1-digit industry code). The size of a unit is defined to be the total number of paid employees in that unit. The four size groups are 0 to 19, 20 to 49, 50 to 199 and 200 or more employees.

The universe of reporting units is further stratified into **take-all** and **take-some** categories as defined earlier under Definitions.

7. **Unités à tirage complet et à tirage partiel**

Les unités à tirage complet sont les unités déclarantes d'entreprises ou d'organisations incluses en permanence dans l'échantillon de l'enquête. Elles comprennent:

a) toutes les entreprises de 200 salariés ou plus;

b) toutes les entreprises ayant plus d'une unité déclarante;

c) les entreprises qui déclarent leurs données au moyen d'un imprimé d'ordinateur plutôt qu'à l'aide du questionnaire;

d) unités des services gouvernementaux et des sociétés de la couronne;

e) unités propres aux écoles primaires et secondaires;

f) d'autres unités ou entreprises préalablement choisies.

Les unités à tirage partiel sont toutes les autres entreprises qui ont une probabilité connue d'être choisies dans l'échantillon de l'enquête.

## Méthodologie

Les statistiques présentées dans cette publication se fondent sur les résultats d'une enquête effectuée par sondage auprès d'unités déclarantes. Les données sont recueillies au moyen d'un questionnaire posté tous les mois à un échantillon de quelque 70,000 unités déclarantes provenant d'un univers d'environ 700,000 unités. L'échantillon couvre toutes les activités économiques que vise l'enquête, ainsi que les toutes les provinces et les territoires et toutes les tailles d'unité. Chaque mois, nous mettons à jour l'univers ainsi que l'échantillon, en tenant compte des créations et des disparitions d'unités ou d'entreprises.

### Stratification

Pour déterminer la taille et la composition de l'échantillon, nous répartissons l'univers des unités déclarantes en 12 provinces et territoires, 16 groupes industriels (activités économiques) et quatre groupes de taille. (Un groupe industriel est légèrement plus détaillé qu'une industrie dont le code n'a qu'un chiffre). La taille d'une unité se définit comme étant le nombre total de salariés rémunérés que compte cette unité. Les quatre groupes de taille sont 0 à 19, 20 à 49, 50 à 199 et 200 salariés et plus.

En outre, l'univers des unités déclarantes est stratifié en deux catégories: les unités à **tirage complet** et les unités à **tirage partiel,** au sens que nous avons précisé dans la section "Définitions".

**Sample allocation and selection**

The size of the take-some sample for the survey has been determined so as to provide estimates of total number of paid employees at the industry group and province level with a prespecified reliability. The determination has been done under the requirement that the sample at the industry group and province level is allocated to each size group in proportion to the total estimated take-some employment in that size group. If the sampling fraction resulting from this allocation is less than .01, then a minimum sampling fraction of .01 is adopted in order to avoid unusually large weights. The allocation makes the probability of inclusion of a unit in the sample in a size stratum approximately proportional to the average number of employees per unit in that size stratum. The sample design, therefore, provides for a small sample of small reporting units if the concentration of employment is mainly in the large reporting units. On the other hand, if the proportion of total employment from small reporting units is substantial, then the sample will include a large number of small reporting units.

The number of reporting units to be selected at the industry group, province and size levels is again allocated to each three-digit industry within that industry group, province and size in proportion to the total number of reporting units in that three-digit industry. In other words, the sampling fraction used at the three-digit industry level is the same as the one determined at the industry group, province and size. However, it should be noted that a minimum sample of three units is selected whenever the use of the sampling fraction results in less than 3 units. If the universe itself is less than three units, then all the units are taken into the sample. Note that beginning with the January 1986 reference month, the sampling fractions for size group three (50 to 199 employees) in all manufacturing industries were changed to one.

A systematic sample of the predetermined number of units is drawn from the take-some universe in every three-digit industry, province and size group. The total sample is the sum of the number of take-all and selected take-some units.

**Sample rotation**

The design provides for rotation of the take-some sample within a three-digit industry, province and size group. Each month, approximately one-twelfth of the take-some sample is replaced. This means that units generally remain in the sample for 12 months before rotating out. The units are not eligible for reselection for at least 12 months after they rotate out.

In some small three-digit industry, province and size group cells it may not be possible to rotate out units each month. Consequently, in some small cells, units may have to stay longer than 12 months. Note that beginning with the reference month of January 1986, there is no rotation of units with 50 to 199 employees in the manufacturing industries.

**Répartition et choix de l'échantillon**

La taille de la portion à tirage partiel de l'échantillon a été déterminée de façon à fournir, avec une fiabilité prédéterminée, des estimations du nombre total de salariés rémunérés, au niveau du groupe industriel et de la province. Ce calcul tient compte du fait que l'échantillon, au niveau du groupe industriel et de la province, doit être réparti dans chaque groupe de taille proportionellement à l'estimation de l'emploi total au sein de la portion à tirage partiel de chacun des groupes de taille. Si la fraction d'échantillon résultant de cette répartition est inférieure à 0.01, on la remplace alors par la fraction minimale 0.01 afin d'éviter toute pondération excessive. La répartition est telle que la probabilité qu'une unité entre dans une strate particulière de l'échantillon est à peu près proportionnelle au nombre moyen de salariés par unité comprise dans cette strate. Le plan d'échantillonnage prévoit donc un petit échantillon de petites unités déclarantes lorsque l'emploi se concentre principalement dans les grandes unités déclarantes. Par contre, si l'emploi total provenant des petites unités déclarantes est élevé, alors l'échantillon contiendra un grand nombre de petites unités déclarantes.

Le nombre d'unités qu'il faut choisir au niveau du groupe industriel, de la province et de la taille est, en outre, réparti entre chacune des industries ayant un code à trois chiffres, lesquelles font partie du groupe industriel, de la province et de la taille considérés; cette répartition se fait proportionnellement au nombre total d'unités déclarantes comprises dans l'industrie dont le code comporte trois chiffres. En d'autres termes, la fraction d'échantillon utilisée au niveau industriel à trois chiffres est la même que celle déterminée pour le groupe industriel, la province et la taille. Il faut cependant noter que l'échantillon minimal est de trois unités, peu importe le résultat obtenu en utilisant la fraction d'échantillon. S'il y a moins de trois unités dans l'univers, toutes les unités disponibles sont incluses dans l'échantillon. Notons qu'à partir du mois de référence de janvier 1986, la fraction d'échantillon associée aux unités du groupe de la taille trois (de 50 à 199 salariés) des industries manufacturières est un.

Au sein de la portion à tirage partiel, on choisit un échantillon systématique d'un nombre prédéterminé d'unités dans chaque industrie ayant un code à trois chiffres, et ce dans chaque province et chaque groupe de taille. L'échantillon total résulte de la somme du nombre d'unités à tirage complet et du nombre d'unités à tirage partiel sélectionnées.

**Rotation de l'échantillon**

Pour chaque industrie (code à trois chiffres), province et groupe de taille, le plan prévoit une rotation de la portion à tirage partiel de l'échantillon. Chaque mois, le douzième environ de la portion à tirage partiel de l'échantillon est remplacé. Cela signifie qu'en général les unités demeurent 12 mois dans l'échantillon avant d'en sortir par voie de rotation. Les unités ne peuvent pas être choisies de nouveau avant au moins 12 mois suivant leur mois de sortie.

Dans le cas de certaines petites cellules (une cellule regroupe les unités de même industrie au niveau du code à trois chiffres, même province et même groupe de taille), il est parfois impossible d'assurer la rotation des unités chaque mois. Ainsi, il peut arriver que des unités demeurent plus de douze mois dans certaines petites cellules. Notez qu'à partir du mois de référence de janvier 1986, dans les industries manufacturières il n'y a aucune rotation des unités ayant de 50 à 199 salariés.

**Data edit and correction**

All the questionnaires are initially screened for completeness by the interviewers of the Statistics Canada regional offices. Thereafter, extensive computer edit procedures for accuracy and consistency are performed at the Ottawa head office. As a result of any of the above-mentioned editing techniques, the respondent may be contacted to confirm or explain the data.

The edit procedures include the comparison of the values of key characteristics (e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit in order to detect large changes or errors in reporting. Whenever there is a large change or the data appears inconsistent, the record is signaled by the computer edit for review and is subject to correction or acceptance as appropriate.

**Follow-up**

Reporting units which are non-respondents to the initial mailing are followed up by telephone by the staff of the regional offices of Statistics Canada. Priority for this follow-up is given to (i) units which are in the sample for the first time and which have not responded, (ii) units which have not responded for two consecutive months, (iii) large nonrespondent units. Follow-up also takes into account response rates and employment in the various industry groups in determining priority.

If units continue to be non-respondents even after follow-up, then data will be imputed for these units. All the records with imputed values are subject to the edits mentioned above.

**Imputation**

Imputation for nonrespondent units which have been in the survey for more than one month is based on the ratio of the monthly changes. The ratio of the monthly change for each characteristic is calculated from units that responded both in the current and the previous month and is applied to the previous month's data of each nonrespondent.

For the nonresponding units that are new to the survey, imputation is based on other sources of information such as the employment intention of the unit, the characteristics of the responding units in the same industry group, province and size.

**Estimates**

The basic "building block" for producing the monthly estimates is the three-digit industry, province and size group. Estimates at higher levels are obtained by the aggregation of the above estimates. Estimates of averages are obtained by first estimating the totals for the numerator and the denominator at the desired level and then calculating the ratio. Estimates for certain sub-

**Vérification des données et correction**

Au départ, les interviewers des bureaux régionaux de Statistique Canada s'assurent que tous les questionnaires sont complets. Ultérieurement, le personnel du bureau d'Ottawa vérifie par ordinateur l'exactitude et la cohérence des chiffres déclarés. À chacune de ces deux étapes de vérification, un répondant peut donc être prié de confirmer ou d'expliquer ses chiffres.

Nos procédés de vérification nous permettent de comparer les valeurs de certaines caractéristiques (nombre de salariés, heures de travail, gains par salarié, etc.) déclarées par la même unité plusieurs mois de suite. Ainsi, il est possible de déceler les grandes variations ou les erreurs, s'il en est. Chaque fois qu'une forte variation apparaît ou que les données semblent incohérentes, l'ordinateur signale le cas, et l'enregistrement est aussitôt corrigé s'il comporte effectivement une erreur.

**Méthode de suivi**

Le personnel des bureaux régionaux de Statistique Canada relance par téléphone les unités déclarantes qui tardent à répondre au questionnaire. Cette méthode de suivi s'adresse en priorité (i) aux unités qui font partie de l'échantillon pour la première fois et qui n'ont pas encore répondu; (ii) aux unités qui accusent un retard de deux mois consécutifs; (iii) aux grandes unités non répondantes. Pour déterminer l'ordre de priorité des suivis, on tient compte des taux de réponse et du volume de l'emploi dans les différents groupes industriels.

Lorsque des unités persistent à ne pas répondre même après le suivi, des données leurs sont imputées. Tous les enregistrements dont les données découlent d'une imputation sont soumis aux vérifications mentionnées ci-dessus.

**Imputation**

L'imputation de données aux unités non répondantes comprises dans le champ de l'enquête depuis plus d'un mois est basée sur le ratio des variations mensuelles de ces unités. Le ratio de la variation mensuelle d'une caractéristique se calcule à partir des unités qui ont répondu pour le mois courant et le mois précédent, et s'applique aux données du mois précédent de chaque unité non répondante.

Dans le cas des unités non répondantes qui figurent dans l'enquête pour la première fois, l'imputation se fonde sur d'autres sources d'information telles que les prévisions d'emploi de l'unité et les caractéristiques des unités déclarantes du même groupe industriel, de la même province et de la même taille.

**Estimations**

L'élément de base qui sert à établir les estimations est l'industrie (code à trois chiffres), la province et la taille. Les estimations plus agrégatives sont obtenues par la sommation des estimations susdites. Pour calculer les moyennes, on estime d'abord les totaux du numérateur et ceux du dénominateur, au niveau désiré, puis on en fixe le ratio. Nous produisons aussi des estimations concernant certaines régions infraprovinciales, con-

provincial areas are also produced, treating the sub-province as a domain. Coefficients of variation for estimates of some key characteristics at all levels are also produced.

Provision has also been made in the estimation procedure to change the weights of "unusually large" observations occurring in size groups 1, 2 and 3. These observations are termed "outliers" and are judged not to be representative of other units in that size group. The weights of the remaining units are adjusted accordingly.

### Reliability of the estimates

There are two types of errors possible in estimates based on a sample survey: sampling and non-sampling.

**Sampling errors** occur because observations are made only on a sample rather than on the entire universe. Estimates based on a sample differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. This difference with respect to a particular estimate is called the sampling error of the estimate.

**Non-sampling errors** are errors which are not related to sampling and may occur in a survey operation for many reasons. Non-response, coverage and classification errors, differences in the interpretation of the questions, incorrect information from respondents, mistakes in recording, coding and processing of data are examples of non-sampling errors. It should be noted that non-sampling errors also occur in complete censuses. In the Survey of Employment, Payrolls and Hours, efforts to reduce non-sampling errors include careful design of questionnaires, editing of data, follow-up of and imputation for non-respondents and thorough control of processing operations.

### Indicators of sampling error

The sampling error, as described above, is not known. However, it can be estimated from the sample itself by using a statistical measure called the **standard error** of a survey estimate. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation.

Alphabetic symbols of the coefficient of variation are used in this publication (see Tables A to F at the end of this explanatory note) to give an indication of the reliability of the estimates and are based on a 12-month average of the coefficients of variation. The ranges of the coefficients of variation and their corresponding alphabetic indicator are given in the following table.

sidérant chacune de ces régions comme un domaine. Enfin, nous calculons des coefficients de variation pour les estimations de certaines caractéristiques clés, à tous les niveaux.

Le procédé d'estimation comporte en outre des mécanismes qui permettent de changer les poids lorsque des observations "exceptionnellement grandes" apparaissent chez les unités des groupes de taille 1, 2 ou 3. Ces observations, dites "aberrantes", ne sont pas représentatives des autres unités du même groupe de taille, de sorte que l'on rajuste les poids des autres unités en conséquence.

### Fiabilité des estimations

En ce qui concerne les estimations basées sur un sondage, il existe deux types d'erreurs possibles, soit les erreurs d'échantillonnage et les erreurs non liées à l'échantillonnage.

Les **erreurs d'échantillonnage** proviennent de ce que les observations se font à partir d'un échantillon au lieu de l'univers complet. Les estimations basées sur un échantillon diffèrent des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes interviewers et des mêmes techniques de traitement. Cette différence, lorsqu'il s'agit d'une estimation particulière, s'appelle erreur d'échantillonnage de l'estimation.

Les **erreurs non dues à l'échantillonnage** ne se rattachent pas à l'échantillon et peuvent se produire tout au long d'une enquête pour plusieurs raisons. Les cas de non-réponse, les anomalies de couverture et de classification, les différences d'interprétation des questions, la communication de renseignements inexacts par les répondants et les fautes d'entrée, de codage et de traitement des données sont autant d'erreurs non attribuables à l'échantillonnage. Il faut noter que des erreurs de ce genre peuvent aussi se produire dans les recensements. Pour l'enquête sur l'emploi, la rémunération et les heures de travail, nous avons tenté d'en réduire le risque par une formulation soignée des questionnaires, par une vérification rigoureuse des chiffres déclarés, par le travail de suivi, par l'imputation de données aux unités non répondantes et par un contrôle attentif des techniques de traitement.

### Indicateurs des erreurs d'échantillonnage

L'erreur d'échantillonnage que nous venons de décrire reste inconnue. On peut cependant l'estimer à partir de l'échantillon, en utilisant une mesure appelée **écart-type** d'une estimation de sondage. Lorsque l'écart-type est exprimé en pourcentage de l'estimation, on l'appelle écart-type relatif ou coefficient de variation.

Dans la présente publication, nous utilisons des symboles littéraux de coefficient de variation (voir tableaux A à F à la fin de cette note explicative), pour indiquer le degré de fiabilité des estimations; cette symbolisation repose sur la moyenne des coefficients de variation de 12 mois. Les intervalles de confiance des coefficients de variation et les symboles correspondants sont précisés dans le tableau suivant.

**ALPHABETIC INDICATORS OF COEFFICIENT OF VARIATION**

| Alphabetic Indicator | Range of Coefficient of Variation Percent |
|---|---|
| A | 0 - 1.0 |
| B | 1.1 - 2.5 |
| C | 2.6 - 5.0 |
| D | 5.1 - 10.0 |
| E | 10.1 - 15.0 |
| F | 15.1 - 25.0 |
| G | > 25.0 |

**INDICATEURS LITTÉRAUX DU COEFFICIENT DE VARIATION**

| Indicateur littéral | Intervalle de confiance du coefficient de variation en pourcentage |
|---|---|
| A | 0 - 1.0 |
| B | 1.1 - 2.5 |
| C | 2.6 - 5.0 |
| D | 5.1 - 10.0 |
| E | 10.1 - 15.0 |
| F | 15.1 - 25.0 |
| G | > 25.0 |

The sample estimate and its standard error (derived from the coefficient of variation) may be used to construct an interval within which the unknown census value is expected to be contained with a prescribed confidence. The particular sample used in this survey is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. If intervals from two standard errors below the estimate to two standard errors above the estimate are constructed using each of the above estimates, then approximately 19 out of 20 of the intervals would include the census value. Such an interval is called a 95 percent confidence interval. For example, let the estimate under consideration be the total number of paid employees at Canada level in Construction and say it is 450,000 employees. If the estimate has a reliability indicator A, then assuming that the coefficient of variation of the estimate is 1%, the standard error of the estimate would be 4,500 employees. Therefore, in this case, one can say with 95% confidence that the census value of total paid employees in Construction is included in the interval 441,000 to 459,000 employees.

In general, the estimates of monthly changes are expected to be more reliable than the estimates of levels due to the large overlap of reporting units in the monthly samples and the high correlation between the reported values for two consecutive months.

L'estimation de l'échantillon et son écart-type (établi d'après le coefficient de variation) peuvent servir à construire un intervalle à l'intérieur duquel s'inscrira, sous réserve d'une limite de confiance prédéterminée, la valeur inconnue que l'on obtiendrait par recensement. L'échantillon sur lequel s'appuie notre enquête n'est qu'un des multiples fragments de même taille que nous aurions pu choisir en utilisant le même plan. Les estimations tirées d'autres échantillons du même univers différeraient les unes des autres. Si l'on construisait des intervalles allant de deux écarts-types sous l'estimation à deux écarts-types au-dessus de l'estimation, en utilisant chacune des estimations possibles (selon l'échantillon choisi), environ 19 intervalles sur 20 contiendraient alors la valeur que donnerait un recensement. Ce genre d'intervalle se nomme intervalle de confiance à 95%. Prenons par exemple comme estimation le nombre total de salariés de la construction pour l'ensemble du Canada, et supposons que ce nombre soit 450,000. Si l'indicateur de fiabilité de cette estimation est A, et si son coefficient de variation s'établit à 1%, alors l'écart-type de l'estimation sera de 4,500 salariés. Dans ce cas, on peut donc dire avec 95% de confiance que le nombre total de salariés de la construction, obtenu par recensement, se situe dans l'intervalle 441,000 à 459,000 salariés.

En général, on s'attend à ce que les estimations des variations mensuelles soient plus fiables que les estimations de niveaux, par suite de l'ample chevauchement des unités déclarantes au sein des échantillons mensuels, et de la forte corrélation qui existe entre les valeurs déclarées pour deux mois consécutifs.

## Statistical Presentation

### 1. Data Revision

Each month, statistics for the two latest months are prepared from the survey of Employment, Payrolls and Hours. Data for the most current month are titled **preliminary** estimates and are based on a response rate of around 80%. Estimates are also prepared for the month immediately preceding the

## Présentation statistique

### 1. Révision des données

Chaque mois, nous préparons, à l'égard des deux derniers mois, des statistiques tirées de l'enquête sur l'emploi, la rémunération et les heures de travail. Les données du mois le plus récent sont appelées estimations **préliminaires** et se fondent sur un taux de réponse d'environ 80%. Nous établissons également des estimations pour le mois qui

most current month; these are known as **revised** estimates and are based on a higher rate of response (approximately 90%).

2. **Data Release**

As soon as the estimates become available, selected highly aggregated statistics are released in the Statistics Canada Daily, while detailed data are entered in the Canadian Socio-Economic Information Management System (i.e. CANSIM).

Detailed estimates appear in this report at a later date.

3. **Rounding**

Totals and averages for any level of geographical or industrial aggregation are calculated using unrounded figures and then rounded using the usual procedure adopted by Statistics Canada. Published employment figures are rounded to hundreds. The sum of individually rounded items may not always equal the total.

4. **Averages**

The average weekly earnings (including overtime) is obtained by dividing the total weekly payrolls by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the salaried employees, and for the other types of employees.

The average weekly overtime earnings is derived by dividing the overtime weekly payrolls by the number of employees. It is calculated for the total number of employees, the hourly-rated employees and the salaried employees.

The average hourly earnings (including overtime) is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours is reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). It is calculated for the hourly-rated employees and for the salaried employees.

The average hourly overtime earnings is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

The average weekly hours (including overtime) is obtained by dividing the total weekly number of hours by the number of employees. This statistic is calculated for the hourly-rated employees and the salaried employees.

précède le mois le plus récent; il s'agit d'estimations **révisées** qui prennent appui sur un taux de réponse plus élevé (environ 90%).

2. **Diffusion des données**

Dès que les estimations requises sont disponibles, des statistiques choisies à un niveau d'aggrégation élevé paraissent dans le Quotidien de Statistique Canada, tandis que les chiffres détaillés sont introduits dans le Système canadien d'information socio-économique (CANSIM).

Les estimations détaillées apparaissent dans ce bulletin plus tard.

3. **Arrondissement**

Les totaux et les moyennes des divers niveaux d'agrégation géographique ou industrielle sont calculés au moyen des chiffres bruts, ensuite arrondis conformément à la méthode d'arrondissement habituelle de Statistique Canada. Les nombres publiés concernant l'emploi sont arrondis à la centaine. Par conséquent, il peut arriver que la somme des chiffres arrondis individuellement ne corresponde pas au total.

4. **Moyennes**

On obtient les rémunérations hebdomadaires moyennes (y compris celles du temps supplémentaire) en divisant les rémunérations hebdomadaires totales par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure, d'employés et des autres catégories de salariés.

Pour obtenir les rémunérations hebdomadaires moyennes du temps supplémentaire, on divise les rémunérations hebdomadaires pour le temps supplémentaire par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure et d'employés.

On obtient les gains horaires moyens (y compris la rémunération pour le temps supplémentaire) en divisant les rémunérations hebdomadaires totales par le nombre total hebdomadaire d'heures travaillées (le nombre total d'heures hebdomadaires est celui déclaré pour les salariés rémunérés à l'heure, tandis que dans le cas des employés on l'établit en multipliant la moyenne des heures fournies pendant la semaine normale de travail par le nombre d'employés). Nous calculons cette statistique à l'égard des salariés rémunérés à l'heure et des employés.

Quant au temps supplémentaire, on calcule les gains horaires moyens des salariés rémunérés à l'heure en divisant les rémunérations hebdomadaires pour le temps supplémentaire par le nombre d'heures supplémentaires hebdomadaires déclarées pour ce groupe de salariés.

Pour déterminer les heures hebdomadaires moyennes (y compris les heures supplémentaires) on divise le total des heures hebdomadaires par le nombre de salariés. Cette statistique est établie à l'égard des salariés rémunérés à l'heure ainsi qu'à l'égard des employés.

The average weekly overtime hours is derived by dividing the weekly number of overtime hours by the number of employees. This average is calculated for the hourly-rated employees.

The average weekly earnings (excluding overtime) is obtained by dividing the weekly payrolls, which exclude the overtime weekly payrolls, by the number of employees. This estimate is calculated for hourly-rated employees and salaried employees.

5. **Unpublished Data**

A large number of non-confidential detailed industrial and geographic estimates are compiled but not included in this report. Although the reliability of these estimates is lower than the reliability of the published estimates, these data will be available on request on a cost recovery basis.

In addition to the total number of employees for the education industry, data are also available for the teaching and non-teaching staff separately.

6. **CANSIM**

Some of the data published in this report are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System).

Tables giving the CANSIM matrix numbers, the CANSIM series numbers and the types of survey estimates are presented at the end of this explanatory text (see Tables I to V) to provide the user with an easy and quick link to the CANSIM system.

Generally speaking, the CANSIM matrix number identifies a type of survey estimates for a particular geographic area, while the CANSIM series number represents an industrial level. Owing to the different types of data aggregations (all units, take-all units, take-some units) and to the large number of survey estimate types (number of employees, average hourly earnings of hourly-rated employees, etc.), the user will have to follow the steps given hereafter to select the proper CANSIM matrix and series numbers.

a) Determine the type of tabulated information needed (this will define the value of "x" for the CANSIM series number of Table II):

   i) Aggregation of all survey units has the value 1,

   ii) Aggregation of take-all units has the value 2 and

   iii) Aggregation of take-some units has the value 3.

Pour calculer les heures supplémentaires moyennes hebdomadaires on divise le nombre d'heures supplémentaires hebdomadaires par le nombre de salariés.

La moyenne des rémunérations hebdomadaires (temps supplémentaire exclu) s'obtient en divisant les rémunérations hebdomadaires, qui excluent les rémunérations hebdomadaires pour le temps supplémentaire, par le nombre de salariés. Cette estimation est calculée à l'égard des salariés rémunérés à l'heure, de même qu'à l'égard des employés.

5. **Données non publiées**

Nous établissons, aux niveaux industriel et géographique, un grand nombre d'estimations non confidentielles détaillées qui, toutefois, ne figurent pas dans le présent ouvrage. Bien que leur fiabilité soit plus faible que celle des estimations publiées, ces données peuvent être obtenues sur demande sur une base de recouvrement des coûts.

Outre le chiffre total des salariés du domaine de l'éducation, nous pouvons aussi fournir des données distinctes concernant le personnel enseignant et le personnel non enseignant.

6. **CANSIM**

Certaines données qui apparaissent dans la présente publication sont également disponibles sous une forme ordinolingue dans CANSIM (Système canadien d'information socio-économique).

Les intéressés trouveront à la fin de ces notes explicatives des tableaux indiquant les numéros des matrices CANSIM, les numéros des séries CANSIM et les types d'estimations de l'enquête (voir tableaux I à V). Ces tableaux fournissent à l'utilisateur un moyen d'accès facile et rapide au système CANSIM.

De façon générale, le numéro de matrice CANSIM désigne un type d'estimation de l'enquête pour une région géographique particulière, tandis qu'un numéro de série CANSIM désigne un niveau industriel. En raison de la multiplicité des types d'agrégation (ensemble des unités, unités à tirage complet, unités à tirage partiel) et des nombreux types d'estimations de l'enquête (nombre de salariés, salaires horaires moyens des salariés rémunérés à l'heure, etc.), l'utilisateur devra franchir les étapes suivantes pour choisir les bons numéros de matrice et de série CANSIM.

a) Déterminer le type désiré de totalisation parmi les cas suivants (cette opération définira la valeur de "x" pour le numéro de série CANSIM au tableau II):

   i) ensemble des unités de l'enquête: vaut 1,

   ii) unités à tirage complet: vaut 2 et

   iii) unités à tirage partiel: vaut 3.

b) Determine the type of survey estimates required; this will provide the value of "y" for the CANSIM series number. This value is obtained by consulting Table I which lists the 19 types of survey estimates; the number of salaried employees, for example, constitutes type 2.

c) Determine the industrial level needed and refer to the Industry Code column of the CANSIM series number Table II to find the rest of the series number (e.g. Industry Code 031 has series number **x.y.1.1.1.1).**

d) Determine the geographical level required and refer to the CANSIM matrix number tables (Tables III to V) to select the appropriate matrix number.

A specific example would be as follows. The "average weekly earnings (including overtime) of all employees" for "all survey units" is needed for the Ontario total manufacturing. The CANSIM series number will be 1.5.1.1.3 according to:

i) The "x" value of 1 for the "All survey units" aggregation,

ii) The "y" value of 5 for the type of survey estimates and

iii) The tail-end of the series number 1.1.3 for the manufacturing Industry Code 101-399.

The CANSIM matrix number will be 8367 because the type of estimates 5 is required for Ontario.

It should be noted that only two types of survey estimates are available for the Census Agglomerations and Census Metropolitan Areas (i.e. estimates 01: total number of employees, and 05: average weekly earnings (including overtime) of all employees), while nineteen types of estimates are available for Canada and the provinces.

For further information on CANSIM call (613) 991-1150 or write CANSIM Division, Statistics Canada, R.H. Coats BLDG., Ottawa, Ontario, K1A 0T6.

## 7. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

b) Déterminer le type requis d'estimations de l'enquête; cette opération fixera la valeur de "y" pour le numéro de série CANSIM. On obtient cette valeur en consultant le tableau I, qui contient la liste des 19 types d'estimations de l'enquête; le type "employés", par exemple, a la valeur 2.

c) Déterminer le niveau industriel désiré et utiliser la colonne "code des industries" du tableau II des numéros de série CANSIM pour trouver les autres chiffres du numéro de série (par ex. le code d'industrie 031 possède le numéro de série **x.y.1.1.1.1).**

d) Déterminer le niveau géographique requis et utiliser les tableaux de numéros de matrice CANSIM (Tableaux III à V) pour choisir le numéro de matrice approprié.

Voici un exemple. Supposons que l'on veuille connaître la "rémunération hebdomadaire moyenne (incluant le temps supplémentaire) de l'ensemble des salariés" de "l'ensemble des unités de l'enquête" pour les manufactures de l'Ontario. Le numéro de série CANSIM sera 1.5.1.1.3, puisque:

i) la valeur de "x" pour le groupe "ensemble des unités de l'enquête" est 1,

ii) la valeur de "y" pour le type d'estimation est 5, et

iii) la fin du numéro de série pour le "code d'industrie" des manufactures 101-399 est 1.1.3.

Le numéro de matrice CANSIM sera 8367, car le type d'estimation 5 s'applique à l'Ontario.

Notons qu'il n'existe que deux types d'estimations au niveau des agglomérations de recensement et des régions métropolitaines (i.e.) les estimations 01: nombre total des salariés, et 05: salaires hebdomadaires moyens (y compris le surtemps) pour l'ensemble des salariés), alors qu'il y a dix-neuf types d'estimations disponibles aux niveaux du Canada et des provinces.

Pour de plus amples informations concernant CANSIM, téléphoner à (613) 991-1150 ou écrire à Division CANSIM, Statistique Canada, immeuble R.H. Coats, Ottawa, Ontario, K1A 0T6.

## 7. Confidentialité

Les données du présent bulletin sont vérifiées afin de s'assurer qu'elles respectent le caractère confidentiel des réponses fournies par les entreprises.

CANSIM Matrix and Series Reference Numbers

Numéros de référence des matrices et séries CANSIM

**TABLE I. Type of Estimates**

**TABLEAU I. Type d'estimations**

| Estimates<br>Estimations | Description |
|---|---|
| 1 | All employees - Ensemble des salariés |
| 2 | Salaried employees - Employés |
| 3 | Employees paid by the hour - Salariés rémunérés à l'heure |
| 4 | Other employees - Autres salariés |
| 5 | Average weekly earnings (including overtime) of all employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) de l'ensemble des salariés |
| 6 | Average weekly earnings (including overtime) of salaried employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des employés |
| 7 | Average weekly earnings (including overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des salariés rémunérés à l'heure |
| 8 | Average weekly earnings (including overtime) of other employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des autres salariés |
| 9 | Average weekly earnings (excluding overtime) of all employees - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) de l'ensemble des salariés |
| 10 | Average weekly earnings (excluding overtime) of salaried employees - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) des employés |
| 11 | Average weekly earnings (excluding overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) des salariés rémunérés à l'heure |
| 12 | Average weekly overtime earnings of all employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, ensemble des salariés |
| 13 | Average weekly overtime earnings of salaried employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, des employés |
| 14 | Average weekly overtime earnings of employees paid by the hour - Rémunération hebdomadaire moyenne pour travail supplémentaire des salariés rémunérés à l'heure |
| 15 | Average weekly hours of salaried employees - Heures hebdomadaires moyennes des employés |
| 16 | Average weekly hours of employees paid by the hour - Heures hebdomadaires moyennes des salariés rémunérés à l'heure |
| 17 | Average weekly overtime hours of employees paid by the hour - Heures supplémentaires hebdomadaires moyennes des salariés rémunérés à l'heure |
| 19 | Average hourly earnings (including overtime) of employees paid by the hour - Rémunération horaire moyenne (incluant le temps supplémentaire) des salariés rémunérés à l'heure |
| 20 | Average hourly overtime earnings of employees paid by the hour - Rémunération horaire moyenne du travail supplémentaire, des salariés rémunérés à l'heure |

# Pension Plans in Canada 1984

# Régimes de pensions au Canada 1984

## Rapid Change and Growth!

## Changements et croissance rapides!

**TO ORDER Pension Plans in Canada, 1984,** Catalogue No. 74-401, $50 in Canada, $51 other countries.

Available through Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6. Telephone (613) 993-7276.

**ON PEUT SE PROCURER Régimes de pensions au Canada, 1984,** nº 74-401 au catalogue, $50 au Canada, $51 autres pays, en s'adressant à: Publication - Vente et service, Statistique Canada, Ottawa, K1A 0T6. Téléphone (613) 993-7276.

With the aging of Canada's population, the adequacy of the present system of income maintenance is an ever-present concern. **Pension Plans in Canada, 1984** is the seventh in a series of studies on the private pension system. It contains all the relevant details on continuing changes to the 17,700 employer-sponsored pension plans in Canada.

Key characteristics from earlier editions are updated. Within its 96 pages, terms, conditions, trends and developments are explored and highlighted with six charts and 90 tables and text.

Data are included for all occupational pension plans sponsored by employers in both public and private sectors. Such areas as vesting, contribution rates, benefit formulae, eligibility conditions, integration with Canada and Quebec pension plans, retirement ages, pension indexing, contributions paid by employers and employees, number of pensioners and amounts of benefits paid under these plans are studied in historical context. Also included are data on contributors to RRSP's.

Avec le vieillissement de population canadienne, l'adéquation du système actuel de sécurité du revenu est une préoccupation constante. **Régimes de pensions au Canada, 1984** est la septième d'une série d'études sur les régimes privés de retraite. Elle contient tous les détails pertinents sur l'évolution permanente des 17,700 régimes de retraite offerts par les employeurs au Canada.

Les renseignements principaux des éditions sont mis à jour. Les conditions, les tendances et les faits nouveaux survenus sont analysés en 96 pages et mis en relief grâce à six graphiques, à 90 tableaux et au texte explicatif.

Les données portent sur tous les régimes de retraite offerts par les employeurs des secteurs public et privé. Les auteurs étudient dans un contexte historique l'acquisition des droits, les taux de cotisation, les prestations prévues, les conditions d'admission, l'intégration au Régime de pensions du Canada et au Régime de rentes du Québec, l'âge de la retraite, l'indexation des prestations, la quote-part patronale et la cotisation des employés, le nombre de pensionnés et le montant des prestations versées en vertu de ces régimes. Ils présentent également des données sur la participation à des REÉR.

# Every week

## The numbers that make decisions

## The data that highlight national economic trends

*Infomat* is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

*Infomat,* Catalogue No. 11-002E (weekly), is available for $2.00 per copy/$100.00 annually (in Canada); $3.00 per copy/$150.00 annually (elsewhere), from:

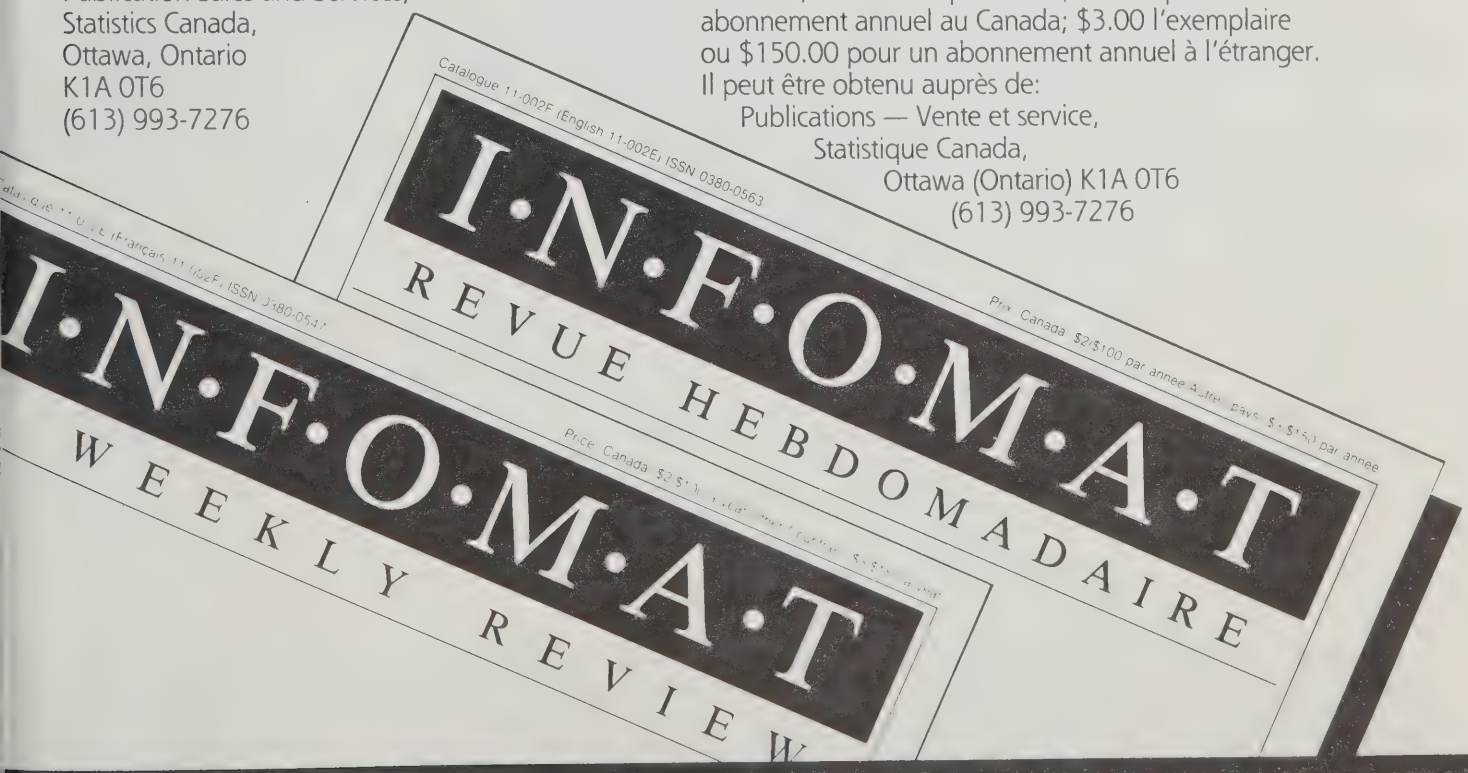
# Toutes les semaines

## Les chiffres qui font les décisions



## Les données illustrant les tendances de l'économie canadienne

*Infomat* est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

*Infomat,* n° 11-002F au catalogue (hebdomadaire), se vend $2.00 l'exemplaire ou $100.00 pour un abonnement annuel au Canada; $3.00 l'exemplaire ou $150.00 pour un abonnement annuel à l'étranger. Il peut être obtenu auprès de:
